AURELIUS DIGITAL SYSTEMS PVT. LTD.

ONBOARDING, INTERNAL TRANSFER & OFFBOARDING SOP

HR-SOP-06 | Version 4.6

Field	Controlled value
Document ID	HR-SOP-06
Version	4.6
Effective date	2026-07-15
Review date	2027-07-14
Classification	INTERNAL
Owner	Maya Thomas (VP, People Operations)
Approver	Kavita Menon (CHRO)
Department	People & Culture
Applicability	Employees and non-employee workers where lifecycle steps apply
Status	APPROVED - CONTROLLED INTERNAL DOCUMENT

Fictional enterprise notice: Aurelius Digital Systems Pvt. Ltd., its identities, systems and internal rules in this document are fictional.

Document Control

HR-SOP-06-DC01 - Document-Control Record

Field	Controlled value
Document ID	HR-SOP-06
Title	Onboarding, Internal Transfer & Offboarding SOP
Version	4.6
Status	Approved - Controlled Internal Document
Effective date	2026-07-15
Review date	2027-07-14
Owner	Maya Thomas (VP, People Operations)
Approver	Kavita Menon (CHRO)
Department	People & Culture
Classification	INTERNAL
Applicability	Employees and non-employee workers where lifecycle steps apply
Controlled repository	VaultPoint DMS
Distribution	Authorized workforce and functions according to classification and applicability
External-law treatment	Where a decision depends on external law or a client obligation not contained here, obtain verified guidance from Legal & Corporate Affairs.

Revision History

HR-SOP-06-RH01 - Revision History

Version	Effective / status	Meaningful change
2.6	Prior controlled release	Initial controlled issue and consolidation of predecessor guidance.
3.1	Prior controlled release	Expanded scope, roles and source-of-truth controls.
3.6	Prior controlled release	Aligned enterprise systems, approval vocabulary and document interfaces.
4.0	Prior controlled release	Added clearer exception, recordkeeping and manager/accountability rules.
4.3	Prior controlled release	Refreshed operational workflows, conditional rules and cross-document handoffs.
4.6	2026-07-15	Current release aligned to enterprise governance baseline and approved process design.

Precedence: This document controls only within its approved subject. Specialist policies, standards and procedures control detailed requirements in their own subject matter; unresolved conflicts are escalated to the relevant Policy Owners.

Table of Contents

1 Purpose, Scope and Lifecycle Principles
- 1.1 Purpose
- 1.2 Worker categories
- 1.3 Systems of record
- 1.4 No self-approval
- 1.5 Urgent lifecycle events

2 Lifecycle Governance and RACI
- 2.1 People Operations
- 2.2 People Manager
- 2.3 Hiring/Business Owner
- 2.4 Corporate Technology and IAM
- 2.5 Security
- 2.6 Procurement/vendor manager
- 2.7 Worker responsibilities

3 Pre-Joining and Offer Acceptance
- 3.1 Accepted offer/engagement trigger
- 3.2 Start-date confirmation
- 3.3 Manager readiness
- 3.4 Pre-joining communications
- 3.5 Changed or withdrawn start

4 Background Verification and Document Collection
- 4.1 Verification initiation
- 4.2 Document checklist
- 4.3 Exception/conditional onboarding
- 4.4 Discrepancy escalation
- 4.5 Privacy handling

5 Equipment, Identity and Access Provisioning Request
- 5.1 PeopleHub worker record
- 5.2 AccessHub identity trigger
- 5.3 Device request
- 5.4 Baseline access
- 5.5 Role-specific access
- 5.6 Privileged/client access handoff

6 Day 1 Onboarding
- 6.1 Identity activation
- 6.2 Device handover
- 6.3 Policy acknowledgements
- 6.4 Mandatory learning assignments
- 6.5 Manager orientation
- 6.6 Issue escalation

7 Week 1 and 30-60-90 Day Onboarding
- 7.1 Week 1 checklist
- 7.2 30-day check
- 7.3 60-day check
- 7.4 90-day check
- 7.5 Learning and access adjustments
- 7.6 Onboarding closure

8 Probation and Confirmation Handoff
- 8.1 Probation milestone data
- 8.2 Manager input
- 8.3 Performance policy interface
- 8.4 Confirmation outcome recording
- 8.5 Extension/exception routing

9 Internal Transfer and Role Change
- 9.1 Transfer trigger
- 9.2 Current/new manager actions
- 9.3 PeopleHub update
- 9.4 Access reassessment

9.5 Asset/location changes
9.6 Effective-date controls
10 Promotion Processing
10.1 Approved promotion trigger
10.2 PeopleHub change
10.3 Compensation handoff
10.4 Role/access reassessment
10.5 Communications
11 Project and Client Reassignment
11.1 Project-change trigger
11.2 Client access
11.3 Removal of prior access
11.4 Data handoff
11.5 Vendor-personnel variant
12 Resignation and Notice Period Administration
12.1 Resignation receipt
12.2 Notice-period record
12.3 Manager/HR planning
12.4 Leave during notice
12.5 Early release request
12.6 Separation-date confirmation
13 Knowledge Transfer and Handover
13.1 Handover plan
13.2 Client/project documentation
13.3 Credentials prohibition
13.4 Record locations
13.5 Completion evidence
14 Asset Return and Recovery
14.1 AssetSphere inventory
14.2 Return scheduling
14.3 Remote return
14.4 Missing/damaged assets
14.5 Vendor-owned equipment
14.6 Security escalation
15 Access Revocation and Identity Closure
15.1 Standard termination trigger
15.2 Same-day/urgent disablement
15.3 Privileged access
15.4 Client/system access
15.5 Service ownership transfer
15.6 Verification of closure
16 Exit Interview and Final Administrative Closure
16.1 Exit interview
16.2 Payroll/final settlement handoff
16.3 Expense/card closure
16.4 Document issuance
16.5 Record completion
17 Involuntary, Immediate or High-Risk Separation
17.1 Restricted planning
17.2 Coordinated disablement
17.3 Security presence
17.4 Asset recovery
17.5 Communications
17.6 Incident handoff if suspicious activity
18 Contractor, Consultant and Vendor Personnel Departure
18.1 Engagement-owner trigger
18.2 Vendor notification
18.3 Access removal
18.4 Data/asset return

18.5 Substitute resource
18.6 Vendor risk follow-up
19 Rehire Eligibility and Post-Separation Requests
19.1 Rehire status recording
19.2 Employment verification
19.3 Reference requests
19.4 Former worker data/access requests
20 Exceptions, Records and Control Assurance
20.1 Lifecycle exception criteria
20.2 Late/missing triggers
20.3 Reconciliation
20.4 Records and audit evidence
20.5 Metrics and escalation

Document Governance and Use

Define the operational joiner-mover-leaver workflow across People Operations, managers, Corporate Technology, IAM, Security, Finance, Procurement and business owners.

Pre-joining, offer acceptance, background verification, document collection, equipment/account provisioning, onboarding milestones, probation handoff, transfers, promotions, role/project changes, resignation, notice, knowledge transfer, asset return, access revocation, exit, final settlement, rehire eligibility and urgent departures.

Audience: People Operations; People Managers; hiring managers; Corporate Technology; IAM; Security; Finance; Procurement/vendor managers; employees and non-employee workers where lifecycle steps apply.

Controlled-source rule: Convenience copies, email extracts, screenshots and local notes do not supersede the controlled document or authoritative enterprise system for the relevant fact.

1 Purpose, Scope and Lifecycle Principles

Onboarding, Internal Transfer & Offboarding SOP | HR-SOP-06 | v4.6 | Effective 2026-07-15 | Section 1 Purpose, Scope and Lifecycle Principles | People & Culture | INTERNAL

Purpose, Scope and Lifecycle Principles establishes the requirements, responsibilities and decision rules that apply within this part of Onboarding, Internal Transfer & Offboarding SOP. The rules are interpreted with the document scope, the employee/worker or system context, and any specialist cross-reference that applies.

1.1 Purpose

Purpose is governed as part of Purpose, Scope and Lifecycle Principles. Lifecycle steps are executed from authoritative worker and engagement records rather than from informal messages or assumptions.

For purpose, the recorded employment category, current role, manager relationship and approved effective dates must be checked before a decision is finalized. The accountable manager or sponsor provides the business trigger; People Operations coordinates the lifecycle event; specialist teams execute the controls they own.

- Managers and sponsors initiate accurate lifecycle events.
- People Operations validates worker status and coordinates workflow.
- Exceptions must be documented in the controlled workflow and may not be created by custom team practice.
- Where a verified external or client requirement is stricter, People & Culture or the specialist owner determines the applicable treatment.

1.2 Worker categories

Worker categories is governed as part of Purpose, Scope and Lifecycle Principles. Lifecycle steps are executed from authoritative worker and engagement records rather than from informal messages or assumptions.

For worker, categories, the recorded employment category, current role, manager relationship and approved effective dates must be checked before a decision is finalized. The accountable manager or sponsor provides the business trigger; People Operations coordinates the lifecycle event; specialist teams execute the controls they own.

- Managers and sponsors initiate accurate lifecycle events.
- People Operations validates worker status and coordinates workflow.
- Exceptions must be documented in the controlled workflow and may not be created by custom team practice.
- Where a verified external or client requirement is stricter, People & Culture or the specialist owner determines the applicable treatment.

1.3 Systems of record

Systems of record is governed as part of Purpose, Scope and Lifecycle Principles. Lifecycle steps are executed from authoritative worker and engagement records rather than from informal messages or assumptions.

For systems, record, the recorded employment category, current role, manager relationship and approved effective dates must be checked before a decision is finalized. The accountable manager or sponsor provides the business trigger; People Operations coordinates the lifecycle event; specialist teams execute the controls they own.

- Managers and sponsors initiate accurate lifecycle events.
- People Operations validates worker status and coordinates workflow.
- Exceptions must be documented in the controlled workflow and may not be created by custom team practice.
- Where a verified external or client requirement is stricter, People & Culture or the specialist owner determines the applicable treatment.

1.4 No self-approval

No self-approval is governed as part of Purpose, Scope and Lifecycle Principles. Lifecycle steps are executed from authoritative worker and engagement records rather than from informal messages or assumptions.

For approval, the recorded employment category, current role, manager relationship and approved effective dates must be checked before a decision is finalized. The accountable manager or sponsor provides the business trigger; People Operations coordinates the lifecycle event; specialist teams execute the controls they own.

- Managers and sponsors initiate accurate lifecycle events.
- People Operations validates worker status and coordinates workflow.
- Exceptions must be documented in the controlled workflow and may not be created by custom team practice.
- Where a verified external or client requirement is stricter, People & Culture or the specialist owner determines the applicable treatment.

1.5 Urgent lifecycle events

Urgent lifecycle events is governed as part of Purpose, Scope and Lifecycle Principles. Lifecycle steps are executed from authoritative worker and engagement records rather than from informal messages or assumptions.

For urgent, lifecycle, events, the recorded employment category, current role, manager relationship and approved effective dates must be checked before a decision is finalized. The accountable manager or sponsor provides the business trigger; People Operations coordinates the lifecycle event; specialist teams execute the controls they own.

- Managers and sponsors initiate accurate lifecycle events.
- People Operations validates worker status and coordinates workflow.
- Exceptions must be documented in the controlled workflow and may not be created by custom team practice.
- Where a verified external or client requirement is stricter, People & Culture or the specialist owner determines the applicable treatment.

2 Lifecycle Governance and RACI

Lifecycle Governance and RACI establishes the requirements, responsibilities and decision rules that apply within this part of Onboarding, Internal Transfer & Offboarding SOP. The rules are interpreted with the document scope, the employee/worker or system context, and any specialist cross-reference that applies.

2.1 People Operations

People Operations is governed as part of Lifecycle Governance and RACI. Lifecycle steps are executed from authoritative worker and engagement records rather than from informal messages or assumptions.

For people, operations, the recorded employment category, current role, manager relationship and approved effective dates must be checked before a decision is finalized. The accountable manager or sponsor provides the business trigger; People Operations coordinates the lifecycle event; specialist teams execute the controls they own.

- Managers and sponsors initiate accurate lifecycle events.
- People Operations validates worker status and coordinates workflow.
- Exceptions must be documented in the controlled workflow and may not be created by custom team practice.
- Where a verified external or client requirement is stricter, People & Culture or the specialist owner determines the applicable treatment.

2.2 People Manager

People Manager is governed as part of Lifecycle Governance and RACI. Lifecycle steps are executed from authoritative worker and engagement records rather than from informal messages or assumptions.

For people, manager, the recorded employment category, current role, manager relationship and approved effective dates must be checked before a decision is finalized. The accountable manager or sponsor provides the business trigger; People Operations coordinates the lifecycle event; specialist teams execute the controls they own.

- Managers and sponsors initiate accurate lifecycle events.
- People Operations validates worker status and coordinates workflow.
- Exceptions must be documented in the controlled workflow and may not be created by custom team practice.
- Where a verified external or client requirement is stricter, People & Culture or the specialist owner determines the applicable treatment.

HR-SOP-06-T01 - Joiner-Mover-Leaver RACI

Role	Accountability	Evidence
Managers and sponsors initia	Managers and sponsors initiate accurate lifecycle events.	Workflow or controlled record
People Operations validates	People Operations validates worker status and coordinates workflow.	Workflow or controlled record
IAM, IT, Security and Procur	IAM, IT, Security and Procurement perform specialist actions triggered by the lifecycle event.	Workflow or controlled record

2.3 Hiring/Business Owner

Hiring/Business Owner is governed as part of Lifecycle Governance and RACI. Lifecycle steps are executed from authoritative worker and engagement records rather than from informal messages or assumptions.

For hiring, business, owner, the recorded employment category, current role, manager relationship and approved effective dates must be checked before a decision is finalized. The accountable manager or sponsor provides the business trigger; People Operations coordinates the lifecycle event; specialist teams execute the controls they own.

- Managers and sponsors initiate accurate lifecycle events.
- People Operations validates worker status and coordinates workflow.
- Exceptions must be documented in the controlled workflow and may not be created by custom team practice.
- Where a verified external or client requirement is stricter, People & Culture or the specialist owner determines the applicable treatment.

2.4 Corporate Technology and IAM

Corporate Technology and IAM is governed as part of Lifecycle Governance and RACI. Lifecycle steps are executed from authoritative worker and engagement records rather than from informal messages or assumptions.

For corporate, technology, the recorded employment category, current role, manager relationship and approved effective dates must be checked before a decision is finalized. The accountable manager or sponsor provides the business trigger; People Operations coordinates the lifecycle event; specialist teams execute the controls they own.

- Managers and sponsors initiate accurate lifecycle events.
- People Operations validates worker status and coordinates workflow.
- Exceptions must be documented in the controlled workflow and may not be created by custom team practice.
- Where a verified external or client requirement is stricter, People & Culture or the specialist owner determines the applicable treatment.

2.5 Security

Security is governed as part of Lifecycle Governance and RACI. Lifecycle steps are executed from authoritative worker and engagement records rather than from informal messages or assumptions.

For security, the recorded employment category, current role, manager relationship and approved effective dates must be checked before a decision is finalized. The accountable manager or sponsor provides the business trigger; People Operations coordinates the lifecycle event; specialist teams execute the controls they own.

- Managers and sponsors initiate accurate lifecycle events.
- People Operations validates worker status and coordinates workflow.
- Exceptions must be documented in the controlled workflow and may not be created by custom team practice.
- Where a verified external or client requirement is stricter, People & Culture or the specialist owner determines the applicable treatment.

2.6 Procurement/vendor manager

Procurement/vendor manager is governed as part of Lifecycle Governance and RACI. Lifecycle steps are executed from authoritative worker and engagement records rather than from informal messages or assumptions.

For procurement, vendor, manager, the recorded employment category, current role, manager relationship and approved effective dates must be checked before a decision is finalized. The accountable manager or sponsor provides the business trigger; People Operations coordinates the lifecycle event; specialist teams execute the controls they own.

- Managers and sponsors initiate accurate lifecycle events.
- People Operations validates worker status and coordinates workflow.
- Exceptions must be documented in the controlled workflow and may not be created by custom team practice.
- Where a verified external or client requirement is stricter, People & Culture or the specialist owner determines the applicable treatment.

Operational scenario S01: New hire start date changes after accounts are already queued for provisioning. Apply the requirements in Onboarding, Internal Transfer & Offboarding SOP to the facts, confirm the relevant source-of-truth record and route any specialist issue to the controlling document or function. If a required fact is missing, do not invent it; obtain the controlled record or specialist decision.

2.7 Worker responsibilities

Worker responsibilities is governed as part of Lifecycle Governance and RACI. Lifecycle steps are executed from authoritative worker and engagement records rather than from informal messages or assumptions.

For worker, responsibilities, the recorded employment category, current role, manager relationship and approved effective dates must be checked before a decision is finalized. The accountable manager or sponsor provides the business trigger; People Operations coordinates the lifecycle event; specialist teams execute the controls they own.

- Managers and sponsors initiate accurate lifecycle events.
- People Operations validates worker status and coordinates workflow.
- Exceptions must be documented in the controlled workflow and may not be created by custom team practice.
- Where a verified external or client requirement is stricter, People & Culture or the specialist owner determines the applicable treatment.

3 Pre-Joining and Offer Acceptance

Onboarding, Internal Transfer & Offboarding SOP | HR-SOP-06 | v4.6 | Effective 2026-07-15 | Section 3 Pre-Joining and Offer Acceptance | People & Culture | INTERNAL

Pre-Joining and Offer Acceptance establishes the requirements, responsibilities and decision rules that apply within this part of Onboarding, Internal Transfer & Offboarding SOP. The rules are interpreted with the document scope, the employee/worker or system context, and any specialist cross-reference that applies.

3.1 Accepted offer/engagement trigger

Accepted offer/engagement trigger is governed as part of Pre-Joining and Offer Acceptance. Lifecycle steps are executed from authoritative worker and engagement records rather than from informal messages or assumptions.

For accepted, offer, engagement, trigger, the recorded employment category, current role, manager relationship and approved effective dates must be checked before a decision is finalized. The accountable manager or sponsor provides the business trigger; People Operations coordinates the lifecycle event; specialist teams execute the controls they own.

- Managers and sponsors initiate accurate lifecycle events.
- People Operations validates worker status and coordinates workflow.
- Exceptions must be documented in the controlled workflow and may not be created by custom team practice.
- Where a verified external or client requirement is stricter, People & Culture or the specialist owner determines the applicable treatment.

3.2 Start-date confirmation

Start-date confirmation is governed as part of Pre-Joining and Offer Acceptance. Lifecycle steps are executed from authoritative worker and engagement records rather than from informal messages or assumptions.

For start, confirmation, the recorded employment category, current role, manager relationship and approved effective dates must be checked before a decision is finalized. The accountable manager or sponsor provides the business trigger; People Operations coordinates the lifecycle event; specialist teams execute the controls they own.

- Managers and sponsors initiate accurate lifecycle events.
- People Operations validates worker status and coordinates workflow.
- Exceptions must be documented in the controlled workflow and may not be created by custom team practice.
- Where a verified external or client requirement is stricter, People & Culture or the specialist owner determines the applicable treatment.

HR-SOP-06-T02 - Pre-Joining Readiness Matrix

Control point	Required treatment	Evidence
Business purpose	Must be defined before action or approval	Request/workflow record
Independent approval	No self-approval where requester benefits or is conflicted	Approval history
Specialist trigger	Route Security/Privacy/Legal/Finance/HR review when criteria apply	Concurrence record
Exception	Document scope, justification, controls and expiry	Approved exception record

3.3 Manager readiness

Manager readiness is governed as part of Pre-Joining and Offer Acceptance. Lifecycle steps are executed from authoritative worker and engagement records rather than from informal messages or assumptions.

For manager, readiness, the recorded employment category, current role, manager relationship and approved effective dates must be checked before a decision is finalized. The accountable manager or sponsor provides the business trigger; People Operations coordinates the lifecycle event; specialist teams execute the controls they own.

- Managers and sponsors initiate accurate lifecycle events.
- People Operations validates worker status and coordinates workflow.
- Exceptions must be documented in the controlled workflow and may not be created by custom team practice.
- Where a verified external or client requirement is stricter, People & Culture or the specialist owner determines the applicable treatment.

3.4 Pre-joining communications

People Operations creates the worker record in PeopleHub only after the approved offer or engagement record is complete. Pre-joining communications must use approved channels and may request only documents required by the approved process. A hiring manager may not promise access, equipment, title, location or benefit terms outside the approved offer and policy framework.

Lifecycle steps are executed from authoritative worker and engagement records rather than from informal messages or assumptions.

For joining, communications, the recorded employment category, current role, manager relationship and approved effective dates must be checked before a decision is finalized. The accountable manager or sponsor provides the business trigger; People Operations coordinates the lifecycle event; specialist teams execute the controls they own.

- Managers and sponsors initiate accurate lifecycle events.
- People Operations validates worker status and coordinates workflow.
- Exceptions must be documented in the controlled workflow and may not be created by custom team practice.
- Where a verified external or client requirement is stricter, People & Culture or the specialist owner determines the applicable treatment.

3.5 Changed or withdrawn start

Changed or withdrawn start is governed as part of Pre-Joining and Offer Acceptance. Lifecycle steps are executed from authoritative worker and engagement records rather than from informal messages or assumptions.

For changed, withdrawn, start, the recorded employment category, current role, manager relationship and approved effective dates must be checked before a decision is finalized. The accountable manager or sponsor provides the business trigger; People Operations coordinates the lifecycle event; specialist teams execute the controls they own.

- Managers and sponsors initiate accurate lifecycle events.
- People Operations validates worker status and coordinates workflow.
- Exceptions must be documented in the controlled workflow and may not be created by custom team practice.
- Where a verified external or client requirement is stricter, People & Culture or the specialist owner determines the applicable treatment.

4 Background Verification and Document Collection

Background Verification and Document Collection establishes the requirements, responsibilities and decision rules that apply within this part of Onboarding, Internal Transfer & Offboarding SOP. The rules are interpreted with the document scope, the employee/worker or system context, and any specialist cross-reference that applies.

4.1 Verification initiation

Verification initiation is governed as part of Background Verification and Document Collection. Lifecycle steps are executed from authoritative worker and engagement records rather than from informal messages or assumptions.

For verification, initiation, the recorded employment category, current role, manager relationship and approved effective dates must be checked before a decision is finalized. The accountable manager or sponsor provides the business trigger; People Operations coordinates the lifecycle event; specialist teams execute the controls they own.

- Managers and sponsors initiate accurate lifecycle events.
- People Operations validates worker status and coordinates workflow.
- Exceptions must be documented in the controlled workflow and may not be created by custom team practice.
- Where a verified external or client requirement is stricter, People & Culture or the specialist owner determines the applicable treatment.

4.2 Document checklist

Document checklist is governed as part of Background Verification and Document Collection. Lifecycle steps are executed from authoritative worker and engagement records rather than from informal messages or assumptions.

For document, checklist, the recorded employment category, current role, manager relationship and approved effective dates must be checked before a decision is finalized. The accountable manager or sponsor provides the business trigger; People Operations coordinates the lifecycle event; specialist teams execute the controls they own.

- Managers and sponsors initiate accurate lifecycle events.
- People Operations validates worker status and coordinates workflow.
- Exceptions must be documented in the controlled workflow and may not be created by custom team practice.
- Where a verified external or client requirement is stricter, People & Culture or the specialist owner determines the applicable treatment.

HR-SOP-06-T03 - Onboarding Document/Verification Checklist

Control point	Required treatment	Evidence
Business purpose	Must be defined before action or approval	Request/workflow record
Independent approval	No self-approval where requester benefits or is conflicted	Approval history
Specialist trigger	Route Security/Privacy/Legal/Finance/HR review when criteria apply	Concurrence record
Exception	Document scope, justification, controls and expiry	Approved exception record

4.3 Exception/conditional onboarding

Exception/conditional onboarding is governed as part of Background Verification and Document Collection. Lifecycle steps are executed from authoritative worker and engagement records rather than from informal messages or assumptions.

For exception, conditional, onboarding, the recorded employment category, current role, manager relationship and approved effective dates must be checked before a decision is finalized. The accountable manager or sponsor provides the business trigger; People Operations coordinates the lifecycle event; specialist teams execute the controls they own.

- Managers and sponsors initiate accurate lifecycle events.
- People Operations validates worker status and coordinates workflow.
- Exceptions must be documented in the controlled workflow and may not be created by custom team practice.
- Where a verified external or client requirement is stricter, People & Culture or the specialist owner determines the applicable treatment.

Operational scenario S02: Background verification is incomplete on the scheduled start date. Apply the requirements in Onboarding, Internal Transfer & Offboarding SOP to the facts, confirm the relevant source-of-truth record and route any specialist issue to the controlling document or function. If a required fact is missing, do not invent it; obtain the controlled record or specialist decision.

4.4 Discrepancy escalation

Discrepancy escalation is governed as part of Background Verification and Document Collection. Lifecycle steps are executed from authoritative worker and engagement records rather than from informal messages or assumptions.

For discrepancy, escalation, the recorded employment category, current role, manager relationship and approved effective dates must be checked before a decision is finalized. The accountable manager or sponsor provides the business trigger; People Operations coordinates the lifecycle event; specialist teams execute the controls they own.

- Managers and sponsors initiate accurate lifecycle events.
- People Operations validates worker status and coordinates workflow.
- Exceptions must be documented in the controlled workflow and may not be created by custom team practice.
- Where a verified external or client requirement is stricter, People & Culture or the specialist owner determines the applicable treatment.

4.5 Privacy handling

Privacy handling is governed as part of Background Verification and Document Collection. Lifecycle steps are executed from authoritative worker and engagement records rather than from informal messages or assumptions.

For privacy, handling, the recorded employment category, current role, manager relationship and approved effective dates must be checked before a decision is finalized. The accountable manager or sponsor provides the business trigger; People Operations coordinates the lifecycle event; specialist teams execute the controls they own.

- Managers and sponsors initiate accurate lifecycle events.
- People Operations validates worker status and coordinates workflow.
- Exceptions must be documented in the controlled workflow and may not be created by custom team practice.
- Where a verified external or client requirement is stricter, People & Culture or the specialist owner determines the applicable treatment.

5 Equipment, Identity and Access Provisioning Request

Onboarding, Internal Transfer & Offboarding SOP | HR-SOP-06 | v4.6 | Effective 2026-07-15 | Section 5 Equipment, Identity and Access Provisioning Request | People & Culture | INTERNAL

Equipment, Identity and Access Provisioning Request establishes the requirements, responsibilities and decision rules that apply within this part of Onboarding, Internal Transfer & Offboarding SOP. The rules are interpreted with the document scope, the employee/worker or system context, and any specialist cross-reference that applies.

5.1 PeopleHub worker record

PeopleHub worker record is governed as part of Equipment, Identity and Access Provisioning Request. Lifecycle steps are executed from authoritative worker and engagement records rather than from informal messages or assumptions.

For peoplehub, worker, record, the recorded employment category, current role, manager relationship and approved effective dates must be checked before a decision is finalized. The accountable manager or sponsor provides the business trigger; People Operations coordinates the lifecycle event; specialist teams execute the controls they own.

- Managers and sponsors initiate accurate lifecycle events.
- People Operations validates worker status and coordinates workflow.
- Exceptions must be documented in the controlled workflow and may not be created by custom team practice.
- Where a verified external or client requirement is stricter, People & Culture or the specialist owner determines the applicable treatment.

HR-SOP-06-T04 - Provisioning Trigger Matrix

Control point	Required treatment	Evidence
Business purpose	Must be defined before action or approval	Request/workflow record
Independent approval	No self-approval where requester benefits or is conflicted	Approval history
Specialist trigger	Route Security/Privacy/Legal/Finance/HR review when criteria apply	Concurrence record
Exception	Document scope, justification, controls and expiry	Approved exception record

5.2 AccessHub identity trigger

The manager submits the role, start date, work location and access profile before the provisioning cut-off. PeopleHub supplies the joiner event to AccessHub; DeviceCentral and AssetSphere track device configuration and custody. Privileged or client-production access is never granted solely because a standard onboarding ticket exists.

Lifecycle steps are executed from authoritative worker and engagement records rather than from informal messages or assumptions.

For accesshub, identity, trigger, the recorded employment category, current role, manager relationship and approved effective dates must be checked before a decision is finalized. The accountable manager or sponsor provides the business trigger; People Operations coordinates the lifecycle event; specialist teams execute the controls they own.

- Managers and sponsors initiate accurate lifecycle events.
- People Operations validates worker status and coordinates workflow.
- Exceptions must be documented in the controlled workflow and may not be created by custom team practice.
- Where a verified external or client requirement is stricter, People & Culture or the specialist owner determines the applicable treatment.

5.3 Device request

Device request is governed as part of Equipment, Identity and Access Provisioning Request. Lifecycle steps are executed from authoritative worker and engagement records rather than from informal messages or assumptions.

For device, request, the recorded employment category, current role, manager relationship and approved effective dates must be checked before a decision is finalized. The accountable manager or sponsor provides the business trigger; People Operations coordinates the lifecycle event; specialist teams execute the controls they own.

- Managers and sponsors initiate accurate lifecycle events.
- People Operations validates worker status and coordinates workflow.
- Exceptions must be documented in the controlled workflow and may not be created by custom team practice.
- Where a verified external or client requirement is stricter, People & Culture or the specialist owner determines the applicable treatment.

5.4 Baseline access

Baseline access is governed as part of Equipment, Identity and Access Provisioning Request. Lifecycle steps are executed from authoritative worker and engagement records rather than from informal messages or assumptions.

For baseline, access, the recorded employment category, current role, manager relationship and approved effective dates must be checked before a decision is finalized. The accountable manager or sponsor provides the business trigger; People Operations coordinates the lifecycle event; specialist teams execute the controls they own.

- Managers and sponsors initiate accurate lifecycle events.
- People Operations validates worker status and coordinates workflow.
- Exceptions must be documented in the controlled workflow and may not be created by custom team practice.
- Where a verified external or client requirement is stricter, People & Culture or the specialist owner determines the applicable treatment.

Operational scenario S03: Employee moves from Engineering to a client consulting role. Apply the requirements in Onboarding, Internal Transfer & Offboarding SOP to the facts, confirm the relevant source-of-truth record and route any specialist issue to the controlling document or function. If a required fact is missing, do not invent it; obtain the controlled record or specialist decision.

5.5 Role-specific access

Role-specific access is governed as part of Equipment, Identity and Access Provisioning Request. Lifecycle steps are executed from authoritative worker and engagement records rather than from informal messages or assumptions.

For specific, access, the recorded employment category, current role, manager relationship and approved effective dates must be checked before a decision is finalized. The accountable manager or sponsor provides the business trigger; People Operations coordinates the lifecycle event; specialist teams execute the controls they own.

- Managers and sponsors initiate accurate lifecycle events.
- People Operations validates worker status and coordinates workflow.
- Exceptions must be documented in the controlled workflow and may not be created by custom team practice.
- Where a verified external or client requirement is stricter, People & Culture or the specialist owner determines the applicable treatment.

5.6 Privileged/client access handoff

Privileged/client access handoff is governed as part of Equipment, Identity and Access Provisioning Request. Lifecycle steps are executed from authoritative worker and engagement records rather than from informal messages or assumptions.

For privileged, client, access, handoff, the recorded employment category, current role, manager relationship and approved effective dates must be checked before a decision is finalized. The accountable manager or sponsor provides the business trigger; People Operations coordinates the lifecycle event; specialist teams execute the controls they own.

- Managers and sponsors initiate accurate lifecycle events.
- People Operations validates worker status and coordinates workflow.
- Exceptions must be documented in the controlled workflow and may not be created by custom team practice.
- Where a verified external or client requirement is stricter, People & Culture or the specialist owner determines the applicable treatment.

5 Equipment, Identity and Access Provisioning Request - continued

6 Day 1 Onboarding

Day 1 Onboarding establishes the requirements, responsibilities and decision rules that apply within this part of Onboarding, Internal Transfer & Offboarding SOP. The rules are interpreted with the document scope, the employee/worker or system context, and any specialist cross-reference that applies.

6.1 Identity activation

The manager submits the role, start date, work location and access profile before the provisioning cut-off. PeopleHub supplies the joiner event to AccessHub; DeviceCentral and AssetSphere track device configuration and custody. Privileged or client-production access is never granted solely because a standard onboarding ticket exists.

Lifecycle steps are executed from authoritative worker and engagement records rather than from informal messages or assumptions.

For identity, activation, the recorded employment category, current role, manager relationship and approved effective dates must be checked before a decision is finalized. The accountable manager or sponsor provides the business trigger; People Operations coordinates the lifecycle event; specialist teams execute the controls they own.

- Managers and sponsors initiate accurate lifecycle events.
- People Operations validates worker status and coordinates workflow.
- Exceptions must be documented in the controlled workflow and may not be created by custom team practice.
- Where a verified external or client requirement is stricter, People & Culture or the specialist owner determines the applicable treatment.

6.2 Device handover

Device handover is governed as part of Day 1 Onboarding. Lifecycle steps are executed from authoritative worker and engagement records rather than from informal messages or assumptions.

For device, handover, the recorded employment category, current role, manager relationship and approved effective dates must be checked before a decision is finalized. The accountable manager or sponsor provides the business trigger; People Operations coordinates the lifecycle event; specialist teams execute the controls they own.

- Managers and sponsors initiate accurate lifecycle events.
- People Operations validates worker status and coordinates workflow.
- Exceptions must be documented in the controlled workflow and may not be created by custom team practice.
- Where a verified external or client requirement is stricter, People & Culture or the specialist owner determines the applicable treatment.

6.3 Policy acknowledgements

Policy acknowledgements is governed as part of Day 1 Onboarding. Lifecycle steps are executed from authoritative worker and engagement records rather than from informal messages or assumptions.

For policy, acknowledgements, the recorded employment category, current role, manager relationship and approved effective dates must be checked before a decision is finalized. The accountable manager or sponsor provides the business trigger; People Operations coordinates the lifecycle event; specialist teams execute the controls they own.

- Managers and sponsors initiate accurate lifecycle events.
- People Operations validates worker status and coordinates workflow.
- Exceptions must be documented in the controlled workflow and may not be created by custom team practice.
- Where a verified external or client requirement is stricter, People & Culture or the specialist owner determines the applicable treatment.

6.4 Mandatory learning assignments

Mandatory learning assignments is governed as part of Day 1 Onboarding. Lifecycle steps are executed from authoritative worker and engagement records rather than from informal messages or assumptions.

For mandatory, learning, assignments, the recorded employment category, current role, manager relationship and approved effective dates must be checked before a decision is finalized. The accountable manager or sponsor provides the business trigger; People Operations coordinates the lifecycle event; specialist teams execute the controls they own.

- Managers and sponsors initiate accurate lifecycle events.
- People Operations validates worker status and coordinates workflow.
- Exceptions must be documented in the controlled workflow and may not be created by custom team practice.
- Where a verified external or client requirement is stricter, People & Culture or the specialist owner determines the applicable treatment.

6.5 Manager orientation

Manager orientation is governed as part of Day 1 Onboarding. Lifecycle steps are executed from authoritative worker and engagement records rather than from informal messages or assumptions.

For manager, orientation, the recorded employment category, current role, manager relationship and approved effective dates must be checked before a decision is finalized. The accountable manager or sponsor provides the business trigger; People Operations coordinates the lifecycle event; specialist teams execute the controls they own.

- Managers and sponsors initiate accurate lifecycle events.
- People Operations validates worker status and coordinates workflow.
- Exceptions must be documented in the controlled workflow and may not be created by custom team practice.
- Where a verified external or client requirement is stricter, People & Culture or the specialist owner determines the applicable treatment.

Operational scenario S04: Promotion changes job title but not access needs. Apply the requirements in Onboarding, Internal Transfer & Offboarding SOP to the facts, confirm the relevant source-of-truth record and route any specialist issue to the controlling document or function. If a required fact is missing, do not invent it; obtain the controlled record or specialist decision.

6.6 Issue escalation

Issue escalation is governed as part of Day 1 Onboarding. Lifecycle steps are executed from authoritative worker and engagement records rather than from informal messages or assumptions.

For issue, escalation, the recorded employment category, current role, manager relationship and approved effective dates must be checked before a decision is finalized. The accountable manager or sponsor provides the business trigger; People Operations coordinates the lifecycle event; specialist teams execute the controls they own.

- Managers and sponsors initiate accurate lifecycle events.
- People Operations validates worker status and coordinates workflow.
- Exceptions must be documented in the controlled workflow and may not be created by custom team practice.
- Where a verified external or client requirement is stricter, People & Culture or the specialist owner determines the applicable treatment.

7 Week 1 and 30-60-90 Day Onboarding

Onboarding, Internal Transfer & Offboarding SOP | HR-SOP-06 | v4.6 | Effective 2026-07-15 | Section 7 Week 1 and 30-60-90 Day Onboarding | People & Culture | INTERNAL

Week 1 and 30-60-90 Day Onboarding establishes the requirements, responsibilities and decision rules that apply within this part of Onboarding, Internal Transfer & Offboarding SOP. The rules are interpreted with the document scope, the employee/worker or system context, and any specialist cross-reference that applies.

7.1 Week 1 checklist

Week 1 checklist is governed as part of Week 1 and 30-60-90 Day Onboarding. Lifecycle steps are executed from authoritative worker and engagement records rather than from informal messages or assumptions.

For checklist, the recorded employment category, current role, manager relationship and approved effective dates must be checked before a decision is finalized. The accountable manager or sponsor provides the business trigger; People Operations coordinates the lifecycle event; specialist teams execute the controls they own.

- Managers and sponsors initiate accurate lifecycle events.
- People Operations validates worker status and coordinates workflow.
- Exceptions must be documented in the controlled workflow and may not be created by custom team practice.
- Where a verified external or client requirement is stricter, People & Culture or the specialist owner determines the applicable treatment.

HR-SOP-06-T05 - 30-60-90 Onboarding Milestones

Control point	Required treatment	Evidence
Business purpose	Must be defined before action or approval	Request/workflow record
Independent approval	No self-approval where requester benefits or is conflicted	Approval history
Specialist trigger	Route Security/Privacy/Legal/Finance/HR review when criteria apply	Concurrence record
Exception	Document scope, justification, controls and expiry	Approved exception record

7.2 30-day check

30-day check is governed as part of Week 1 and 30-60-90 Day Onboarding. Lifecycle steps are executed from authoritative worker and engagement records rather than from informal messages or assumptions.

For check, the recorded employment category, current role, manager relationship and approved effective dates must be checked before a decision is finalized. The accountable manager or sponsor provides the business trigger; People Operations coordinates the lifecycle event; specialist teams execute the controls they own.

- Managers and sponsors initiate accurate lifecycle events.
- People Operations validates worker status and coordinates workflow.
- Exceptions must be documented in the controlled workflow and may not be created by custom team practice.
- Where a verified external or client requirement is stricter, People & Culture or the specialist owner determines the applicable treatment.

7.3 60-day check

60-day check is governed as part of Week 1 and 30-60-90 Day Onboarding. Lifecycle steps are executed from authoritative worker and engagement records rather than from informal messages or assumptions.

For check, the recorded employment category, current role, manager relationship and approved effective dates must be checked before a decision is finalized. The accountable manager or sponsor provides the business trigger; People Operations coordinates the lifecycle event; specialist teams execute the controls they own.

- Managers and sponsors initiate accurate lifecycle events.
- People Operations validates worker status and coordinates workflow.
- Exceptions must be documented in the controlled workflow and may not be created by custom team practice.
- Where a verified external or client requirement is stricter, People & Culture or the specialist owner determines the applicable treatment.

7.4 90-day check

90-day check is governed as part of Week 1 and 30-60-90 Day Onboarding. Lifecycle steps are executed from authoritative worker and engagement records rather than from informal messages or assumptions.

For check, the recorded employment category, current role, manager relationship and approved effective dates must be checked before a decision is finalized. The accountable manager or sponsor provides the business trigger; People Operations coordinates the lifecycle event; specialist teams execute the controls they own.

- Managers and sponsors initiate accurate lifecycle events.
- People Operations validates worker status and coordinates workflow.
- Exceptions must be documented in the controlled workflow and may not be created by custom team practice.
- Where a verified external or client requirement is stricter, People & Culture or the specialist owner determines the applicable treatment.

7.5 Learning and access adjustments

Learning and access adjustments is governed as part of Week 1 and 30-60-90 Day Onboarding. Lifecycle steps are executed from authoritative worker and engagement records rather than from informal messages or assumptions.

For learning, access, adjustments, the recorded employment category, current role, manager relationship and approved effective dates must be checked before a decision is finalized. The accountable manager or sponsor provides the business trigger; People Operations coordinates the lifecycle event; specialist teams execute the controls they own.

- Managers and sponsors initiate accurate lifecycle events.
- People Operations validates worker status and coordinates workflow.
- Exceptions must be documented in the controlled workflow and may not be created by custom team practice.
- Where a verified external or client requirement is stricter, People & Culture or the specialist owner determines the applicable treatment.

Operational scenario S05: Manager moves a worker to a project requiring privileged production access. Apply the requirements in Onboarding, Internal Transfer & Offboarding SOP to the facts, confirm the relevant source-of-truth record and route any specialist issue to the controlling document or function. If a required fact is missing, do not invent it; obtain the controlled record or specialist decision.

7.6 Onboarding closure

Onboarding closure is governed as part of Week 1 and 30-60-90 Day Onboarding. Lifecycle steps are executed from authoritative worker and engagement records rather than from informal messages or assumptions.

For onboarding, closure, the recorded employment category, current role, manager relationship and approved effective dates must be checked before a decision is finalized. The accountable manager or sponsor provides the business trigger; People Operations coordinates the lifecycle event; specialist teams execute the controls they own.

- Managers and sponsors initiate accurate lifecycle events.
- People Operations validates worker status and coordinates workflow.
- Exceptions must be documented in the controlled workflow and may not be created by custom team practice.
- Where a verified external or client requirement is stricter, People & Culture or the specialist owner determines the applicable treatment.

7 Week 1 and 30-60-90 Day Onboarding - continued

8 Probation and Confirmation Handoff

Onboarding, Internal Transfer & Offboarding SOP | HR-SOP-06 | v4.6 | Effective 2026-07-15 | Section 8 Probation and Confirmation Handoff | People & Culture | INTERNAL

Probation and Confirmation Handoff establishes the requirements, responsibilities and decision rules that apply within this part of Onboarding, Internal Transfer & Offboarding SOP. The rules are interpreted with the document scope, the employee/worker or system context, and any specialist cross-reference that applies.

8.1 Probation milestone data

Probation milestone data is governed as part of Probation and Confirmation Handoff. Lifecycle steps are executed from authoritative worker and engagement records rather than from informal messages or assumptions.

For probation, milestone, the recorded employment category, current role, manager relationship and approved effective dates must be checked before a decision is finalized. The accountable manager or sponsor provides the business trigger; People Operations coordinates the lifecycle event; specialist teams execute the controls they own.

- Managers and sponsors initiate accurate lifecycle events.
- People Operations validates worker status and coordinates workflow.
- Exceptions must be documented in the controlled workflow and may not be created by custom team practice.
- Where a verified external or client requirement is stricter, People & Culture or the specialist owner determines the applicable treatment.

8.2 Manager input

Manager input is governed as part of Probation and Confirmation Handoff. Lifecycle steps are executed from authoritative worker and engagement records rather than from informal messages or assumptions.

For manager, input, the recorded employment category, current role, manager relationship and approved effective dates must be checked before a decision is finalized. The accountable manager or sponsor provides the business trigger; People Operations coordinates the lifecycle event; specialist teams execute the controls they own.

- Managers and sponsors initiate accurate lifecycle events.
- People Operations validates worker status and coordinates workflow.
- Exceptions must be documented in the controlled workflow and may not be created by custom team practice.
- Where a verified external or client requirement is stricter, People & Culture or the specialist owner determines the applicable treatment.

8.3 Performance policy interface

Performance policy interface is governed as part of Probation and Confirmation Handoff. Lifecycle steps are executed from authoritative worker and engagement records rather than from informal messages or assumptions.

For performance, policy, interface, the recorded employment category, current role, manager relationship and approved effective dates must be checked before a decision is finalized. The accountable manager or sponsor provides the business trigger; People Operations coordinates the lifecycle event; specialist teams execute the controls they own.

- Managers and sponsors initiate accurate lifecycle events.
- People Operations validates worker status and coordinates workflow.
- Exceptions must be documented in the controlled workflow and may not be created by custom team practice.
- Where a verified external or client requirement is stricter, People & Culture or the specialist owner determines the applicable treatment.

Related controlled source: Performance Management & Career Development Policy (HR-PM-08) §2 - Performance lifecycle interface. This reference supplements this section and does not transfer ownership of unrelated rules.

8.4 Confirmation outcome recording

Confirmation outcome recording is governed as part of Probation and Confirmation Handoff. Lifecycle steps are executed from authoritative worker and engagement records rather than from informal messages or assumptions.

For confirmation, outcome, recording, the recorded employment category, current role, manager relationship and approved effective dates must be checked before a decision is finalized. The accountable manager or sponsor provides the business trigger; People Operations coordinates the lifecycle event; specialist teams execute the controls they own.

- Managers and sponsors initiate accurate lifecycle events.
- People Operations validates worker status and coordinates workflow.
- Exceptions must be documented in the controlled workflow and may not be created by custom team practice.
- Where a verified external or client requirement is stricter, People & Culture or the specialist owner determines the applicable treatment.

8.5 Extension/exception routing

Extension/exception routing is governed as part of Probation and Confirmation Handoff. Lifecycle steps are executed from authoritative worker and engagement records rather than from informal messages or assumptions.

For extension, exception, routing, the recorded employment category, current role, manager relationship and approved effective dates must be checked before a decision is finalized. The accountable manager or sponsor provides the business trigger; People Operations coordinates the lifecycle event; specialist teams execute the controls they own.

- Managers and sponsors initiate accurate lifecycle events.
- People Operations validates worker status and coordinates workflow.
- Exceptions must be documented in the controlled workflow and may not be created by custom team practice.
- Where a verified external or client requirement is stricter, People & Culture or the specialist owner determines the applicable treatment.

9 Internal Transfer and Role Change

Onboarding, Internal Transfer & Offboarding SOP | HR-SOP-06 | v4.6 | Effective 2026-07-15 | Section 9 Internal Transfer and Role Change | People & Culture | INTERNAL

Internal Transfer and Role Change establishes the requirements, responsibilities and decision rules that apply within this part of Onboarding, Internal Transfer & Offboarding SOP. The rules are interpreted with the document scope, the employee/worker or system context, and any specialist cross-reference that applies.

9.1 Transfer trigger

Transfer trigger is governed as part of Internal Transfer and Role Change. Lifecycle steps are executed from authoritative worker and engagement records rather than from informal messages or assumptions.

For transfer, trigger, the recorded employment category, current role, manager relationship and approved effective dates must be checked before a decision is finalized. The accountable manager or sponsor provides the business trigger; People Operations coordinates the lifecycle event; specialist teams execute the controls they own.

- Managers and sponsors initiate accurate lifecycle events.
- People Operations validates worker status and coordinates workflow.
- Exceptions must be documented in the controlled workflow and may not be created by custom team practice.
- Where a verified external or client requirement is stricter, People & Culture or the specialist owner determines the applicable treatment.

HR-SOP-06-T06 - Transfer Access Reassessment Matrix

Control point	Required treatment	Evidence
Business purpose	Must be defined before action or approval	Request/workflow record
Independent approval	No self-approval where requester benefits or is conflicted	Approval history
Specialist trigger	Route Security/Privacy/Legal/Finance/HR review when criteria apply	Concurrence record
Exception	Document scope, justification, controls and expiry	Approved exception record
Operational scenario S06: Employee resigns while on approved leave. Apply the requirements in Onboarding, Internal Transfer & Offboarding SOP to the facts, confirm the relevant source-of-truth record and route any specialist issue to the controlling document or function. If a required fact is missing, do not invent it; obtain the controlled record or specialist decision.		

9.2 Current/new manager actions

Current/new manager actions is governed as part of Internal Transfer and Role Change. Lifecycle steps are executed from authoritative worker and engagement records rather than from informal messages or assumptions.

For current, manager, actions, the recorded employment category, current role, manager relationship and approved effective dates must be checked before a decision is finalized. The accountable manager or sponsor provides the business trigger; People Operations coordinates the lifecycle event; specialist teams execute the controls they own.

- Managers and sponsors initiate accurate lifecycle events.
- People Operations validates worker status and coordinates workflow.
- Exceptions must be documented in the controlled workflow and may not be created by custom team practice.
- Where a verified external or client requirement is stricter, People & Culture or the specialist owner determines the applicable treatment.

9.3 PeopleHub update

PeopleHub update is governed as part of Internal Transfer and Role Change. Lifecycle steps are executed from authoritative worker and engagement records rather than from informal messages or assumptions.

For peoplehub, update, the recorded employment category, current role, manager relationship and approved effective dates must be checked before a decision is finalized. The accountable manager or sponsor provides the business trigger; People Operations coordinates the lifecycle event; specialist teams execute the controls they own.

- Managers and sponsors initiate accurate lifecycle events.
- People Operations validates worker status and coordinates workflow.
- Exceptions must be documented in the controlled workflow and may not be created by custom team practice.
- Where a verified external or client requirement is stricter, People & Culture or the specialist owner determines the applicable treatment.

9.4 Access reassessment

Access reassessment is governed as part of Internal Transfer and Role Change. Lifecycle steps are executed from authoritative worker and engagement records rather than from informal messages or assumptions.

For access, reassessment, the recorded employment category, current role, manager relationship and approved effective dates must be checked before a decision is finalized. The accountable manager or sponsor provides the business trigger; People Operations coordinates the lifecycle event; specialist teams execute the controls they own.

- Managers and sponsors initiate accurate lifecycle events.
- People Operations validates worker status and coordinates workflow.
- Exceptions must be documented in the controlled workflow and may not be created by custom team practice.
- Where a verified external or client requirement is stricter, People & Culture or the specialist owner determines the applicable treatment.

9.5 Asset/location changes

Asset/location changes is governed as part of Internal Transfer and Role Change. Lifecycle steps are executed from authoritative worker and engagement records rather than from informal messages or assumptions.

For asset, location, changes, the recorded employment category, current role, manager relationship and approved effective dates must be checked before a decision is finalized. The accountable manager or sponsor provides the business trigger; People Operations coordinates the lifecycle event; specialist teams execute the controls they own.

- Managers and sponsors initiate accurate lifecycle events.
- People Operations validates worker status and coordinates workflow.
- Exceptions must be documented in the controlled workflow and may not be created by custom team practice.
- Where a verified external or client requirement is stricter, People & Culture or the specialist owner determines the applicable treatment.

9.6 Effective-date controls

Effective-date controls is governed as part of Internal Transfer and Role Change. Lifecycle steps are executed from authoritative worker and engagement records rather than from informal messages or assumptions.

For effective, controls, the recorded employment category, current role, manager relationship and approved effective dates must be checked before a decision is finalized. The accountable manager or sponsor provides the business trigger; People Operations coordinates the lifecycle event; specialist teams execute the controls they own.

- Managers and sponsors initiate accurate lifecycle events.
- People Operations validates worker status and coordinates workflow.
- Exceptions must be documented in the controlled workflow and may not be created by custom team practice.
- Where a verified external or client requirement is stricter, People & Culture or the specialist owner determines the applicable treatment.

10 Promotion Processing

Onboarding, Internal Transfer & Offboarding SOP | HR-SOP-06 | v4.6 | Effective 2026-07-15 | Section 10 Promotion Processing | People & Culture | INTERNAL

Promotion Processing establishes the requirements, responsibilities and decision rules that apply within this part of Onboarding, Internal Transfer & Offboarding SOP. The rules are interpreted with the document scope, the employee/worker or system context, and any specialist cross-reference that applies.

10.1 Approved promotion trigger

Approved promotion trigger is governed as part of Promotion Processing. Lifecycle steps are executed from authoritative worker and engagement records rather than from informal messages or assumptions.

For approved, promotion, trigger, the recorded employment category, current role, manager relationship and approved effective dates must be checked before a decision is finalized. The accountable manager or sponsor provides the business trigger; People Operations coordinates the lifecycle event; specialist teams execute the controls they own.

- Managers and sponsors initiate accurate lifecycle events.
- People Operations validates worker status and coordinates workflow.
- Exceptions must be documented in the controlled workflow and may not be created by custom team practice.
- Where a verified external or client requirement is stricter, People & Culture or the specialist owner determines the applicable treatment.

10.2 PeopleHub change

PeopleHub change is governed as part of Promotion Processing. Lifecycle steps are executed from authoritative worker and engagement records rather than from informal messages or assumptions.

For peoplehub, change, the recorded employment category, current role, manager relationship and approved effective dates must be checked before a decision is finalized. The accountable manager or sponsor provides the business trigger; People Operations coordinates the lifecycle event; specialist teams execute the controls they own.

- Managers and sponsors initiate accurate lifecycle events.
- People Operations validates worker status and coordinates workflow.
- Exceptions must be documented in the controlled workflow and may not be created by custom team practice.
- Where a verified external or client requirement is stricter, People & Culture or the specialist owner determines the applicable treatment.

Operational scenario S07: Departing employee owns a service account used by a production integration. Apply the requirements in Onboarding, Internal Transfer & Offboarding SOP to the facts, confirm the relevant source-of-truth record and route any specialist issue to the controlling document or function. If a required fact is missing, do not invent it; obtain the controlled record or specialist decision.

10.3 Compensation handoff

Compensation handoff is governed as part of Promotion Processing. Lifecycle steps are executed from authoritative worker and engagement records rather than from informal messages or assumptions.

For compensation, handoff, the recorded employment category, current role, manager relationship and approved effective dates must be checked before a decision is finalized. The accountable manager or sponsor provides the business trigger; People Operations coordinates the lifecycle event; specialist teams execute the controls they own.

- Managers and sponsors initiate accurate lifecycle events.
- People Operations validates worker status and coordinates workflow.
- Exceptions must be documented in the controlled workflow and may not be created by custom team practice.
- Where a verified external or client requirement is stricter, People & Culture or the specialist owner determines the applicable treatment.

10.4 Role/access reassessment

Role/access reassessment is governed as part of Promotion Processing. Lifecycle steps are executed from authoritative worker and engagement records rather than from informal messages or assumptions.

For access, reassessment, the recorded employment category, current role, manager relationship and approved effective dates must be checked before a decision is finalized. The accountable manager or sponsor provides the business trigger; People Operations coordinates the lifecycle event; specialist teams execute the controls they own.

- Managers and sponsors initiate accurate lifecycle events.
- People Operations validates worker status and coordinates workflow.
- Exceptions must be documented in the controlled workflow and may not be created by custom team practice.
- Where a verified external or client requirement is stricter, People & Culture or the specialist owner determines the applicable treatment.

10.5 Communications

Communications is governed as part of Promotion Processing. Lifecycle steps are executed from authoritative worker and engagement records rather than from informal messages or assumptions.

For communications, the recorded employment category, current role, manager relationship and approved effective dates must be checked before a decision is finalized. The accountable manager or sponsor provides the business trigger; People Operations coordinates the lifecycle event; specialist teams execute the controls they own.

- Managers and sponsors initiate accurate lifecycle events.
- People Operations validates worker status and coordinates workflow.
- Exceptions must be documented in the controlled workflow and may not be created by custom team practice.
- Where a verified external or client requirement is stricter, People & Culture or the specialist owner determines the applicable treatment.

11 Project and Client Reassignment

Onboarding, Internal Transfer & Offboarding SOP | HR-SOP-06 | v4.6 | Effective 2026-07-15 | Section 11 Project and Client Reassignment | People & Culture | INTERNAL

Project and Client Reassignment establishes the requirements, responsibilities and decision rules that apply within this part of Onboarding, Internal Transfer & Offboarding SOP. The rules are interpreted with the document scope, the employee/worker or system context, and any specialist cross-reference that applies.

11.1 Project-change trigger

Project-change trigger is governed as part of Project and Client Reassignment. Lifecycle steps are executed from authoritative worker and engagement records rather than from informal messages or assumptions.

For project, change, trigger, the recorded employment category, current role, manager relationship and approved effective dates must be checked before a decision is finalized. The accountable manager or sponsor provides the business trigger; People Operations coordinates the lifecycle event; specialist teams execute the controls they own.

- Managers and sponsors initiate accurate lifecycle events.
- People Operations validates worker status and coordinates workflow.
- Exceptions must be documented in the controlled workflow and may not be created by custom team practice.
- Where a verified external or client requirement is stricter, People & Culture or the specialist owner determines the applicable treatment.

11.2 Client access

Client access is governed as part of Project and Client Reassignment. Lifecycle steps are executed from authoritative worker and engagement records rather than from informal messages or assumptions.

For client, access, the recorded employment category, current role, manager relationship and approved effective dates must be checked before a decision is finalized. The accountable manager or sponsor provides the business trigger; People Operations coordinates the lifecycle event; specialist teams execute the controls they own.

- Managers and sponsors initiate accurate lifecycle events.
- People Operations validates worker status and coordinates workflow.
- Exceptions must be documented in the controlled workflow and may not be created by custom team practice.
- Where a verified external or client requirement is stricter, People & Culture or the specialist owner determines the applicable treatment.

11.3 Removal of prior access

Removal of prior access is governed as part of Project and Client Reassignment. Lifecycle steps are executed from authoritative worker and engagement records rather than from informal messages or assumptions.

For removal, prior, access, the recorded employment category, current role, manager relationship and approved effective dates must be checked before a decision is finalized. The accountable manager or sponsor provides the business trigger; People Operations coordinates the lifecycle event; specialist teams execute the controls they own.

- Managers and sponsors initiate accurate lifecycle events.
- People Operations validates worker status and coordinates workflow.
- Exceptions must be documented in the controlled workflow and may not be created by custom team practice.
- Where a verified external or client requirement is stricter, People & Culture or the specialist owner determines the applicable treatment.

11.4 Data handoff

Data handoff is governed as part of Project and Client Reassignment. Lifecycle steps are executed from authoritative worker and engagement records rather than from informal messages or assumptions.

For handoff, the recorded employment category, current role, manager relationship and approved effective dates must be checked before a decision is finalized. The accountable manager or sponsor provides the business trigger; People Operations coordinates the lifecycle event; specialist teams execute the controls they own.

- Managers and sponsors initiate accurate lifecycle events.
- People Operations validates worker status and coordinates workflow.
- Exceptions must be documented in the controlled workflow and may not be created by custom team practice.
- Where a verified external or client requirement is stricter, People & Culture or the specialist owner determines the applicable treatment.

11.5 Vendor-personnel variant

Vendor-personnel variant is governed as part of Project and Client Reassignment. Lifecycle steps are executed from authoritative worker and engagement records rather than from informal messages or assumptions.

For vendor, personnel, variant, the recorded employment category, current role, manager relationship and approved effective dates must be checked before a decision is finalized. The accountable manager or sponsor provides the business trigger; People Operations coordinates the lifecycle event; specialist teams execute the controls they own.

- Managers and sponsors initiate accurate lifecycle events.
- People Operations validates worker status and coordinates workflow.
- Exceptions must be documented in the controlled workflow and may not be created by custom team practice.
- Where a verified external or client requirement is stricter, People & Culture or the specialist owner determines the applicable treatment.

Operational scenario S08: Remote employee cannot return laptop by last working day. Apply the requirements in Onboarding, Internal Transfer & Offboarding SOP to the facts, confirm the relevant source-of-truth record and route any specialist issue to the controlling document or function. If a required fact is missing, do not invent it; obtain the controlled record or specialist decision.

12 Resignation and Notice Period Administration

Onboarding, Internal Transfer & Offboarding SOP | HR-SOP-06 | v4.6 | Effective 2026-07-15 | Section 12 Resignation and Notice Period Administration | People & Culture | INTERNAL

Resignation and Notice Period Administration establishes the requirements, responsibilities and decision rules that apply within this part of Onboarding, Internal Transfer & Offboarding SOP. The rules are interpreted with the document scope, the employee/worker or system context, and any specialist cross-reference that applies.

12.1 Resignation receipt

The standard internal notice baseline is 30 calendar days for Bands 1-3, 60 calendar days for Bands 4-6, and 90 calendar days for Bands 7-8, unless the individual employment terms state another approved period. Fixed-term and non-employee arrangements follow their approved engagement terms. People Operations records the confirmed last working day in PeopleHub.

Lifecycle steps are executed from authoritative worker and engagement records rather than from informal messages or assumptions.

For resignation, receipt, the recorded employment category, current role, manager relationship and approved effective dates must be checked before a decision is finalized. The accountable manager or sponsor provides the business trigger; People Operations coordinates the lifecycle event; specialist teams execute the controls they own.

- Managers and sponsors initiate accurate lifecycle events.
- People Operations validates worker status and coordinates workflow.
- Exceptions must be documented in the controlled workflow and may not be created by custom team practice.
- Where a verified external or client requirement is stricter, People & Culture or the specialist owner determines the applicable treatment.

HR-SOP-06-T07 - Notice-Period Administration Matrix

Control point	Required treatment	Evidence
Business purpose	Must be defined before action or approval	Request/workflow record
Independent approval	No self-approval where requester benefits or is conflicted	Approval history
Specialist trigger	Route Security/Privacy/Legal/Finance/HR review when criteria apply	Concurrence record
Exception	Document scope, justification, controls and expiry	Approved exception record

12.2 Notice-period record

Notice-period record is governed as part of Resignation and Notice Period Administration. Lifecycle steps are executed from authoritative worker and engagement records rather than from informal messages or assumptions.

For notice, period, record, the recorded employment category, current role, manager relationship and approved effective dates must be checked before a decision is finalized. The accountable manager or sponsor provides the business trigger; People Operations coordinates the lifecycle event; specialist teams execute the controls they own.

- Managers and sponsors initiate accurate lifecycle events.
- People Operations validates worker status and coordinates workflow.
- Exceptions must be documented in the controlled workflow and may not be created by custom team practice.
- Where a verified external or client requirement is stricter, People & Culture or the specialist owner determines the applicable treatment.

12.3 Manager/HR planning

Manager/HR planning is governed as part of Resignation and Notice Period Administration. Lifecycle steps are executed from authoritative worker and engagement records rather than from informal messages or assumptions.

For manager, planning, the recorded employment category, current role, manager relationship and approved effective dates must be checked before a decision is finalized. The accountable manager or sponsor provides the business trigger; People Operations coordinates the lifecycle event; specialist teams execute the controls they own.

- Managers and sponsors initiate accurate lifecycle events.
- People Operations validates worker status and coordinates workflow.
- Exceptions must be documented in the controlled workflow and may not be created by custom team practice.
- Where a verified external or client requirement is stricter, People & Culture or the specialist owner determines the applicable treatment.

12.4 Leave during notice

Leave during notice is governed as part of Resignation and Notice Period Administration. Lifecycle steps are executed from authoritative worker and engagement records rather than from informal messages or assumptions.

For leave, during, notice, the recorded employment category, current role, manager relationship and approved effective dates must be checked before a decision is finalized. The accountable manager or sponsor provides the business trigger; People Operations coordinates the lifecycle event; specialist teams execute the controls they own.

- Managers and sponsors initiate accurate lifecycle events.
- People Operations validates worker status and coordinates workflow.
- Exceptions must be documented in the controlled workflow and may not be created by custom team practice.
- Where a verified external or client requirement is stricter, People & Culture or the specialist owner determines the applicable treatment.

12.5 Early release request

Early release request is governed as part of Resignation and Notice Period Administration. Lifecycle steps are executed from authoritative worker and engagement records rather than from informal messages or assumptions.

For early, release, request, the recorded employment category, current role, manager relationship and approved effective dates must be checked before a decision is finalized. The accountable manager or sponsor provides the business trigger; People Operations coordinates the lifecycle event; specialist teams execute the controls they own.

- Managers and sponsors initiate accurate lifecycle events.
- People Operations validates worker status and coordinates workflow.
- Exceptions must be documented in the controlled workflow and may not be created by custom team practice.
- Where a verified external or client requirement is stricter, People & Culture or the specialist owner determines the applicable treatment.

12.6 Separation-date confirmation

Separation-date confirmation is governed as part of Resignation and Notice Period Administration. Lifecycle steps are executed from authoritative worker and engagement records rather than from informal messages or assumptions.

For separation, confirmation, the recorded employment category, current role, manager relationship and approved effective dates must be checked before a decision is finalized. The accountable manager or sponsor provides the business trigger; People Operations coordinates the lifecycle event; specialist teams execute the controls they own.

- Managers and sponsors initiate accurate lifecycle events.
- People Operations validates worker status and coordinates workflow.
- Exceptions must be documented in the controlled workflow and may not be created by custom team practice.
- Where a verified external or client requirement is stricter, People & Culture or the specialist owner determines the applicable treatment.

Operational scenario S09: Employee is separated immediately for a high-risk matter. Apply the requirements in Onboarding, Internal Transfer & Offboarding SOP to the facts, confirm the relevant source-of-truth record and route any specialist issue to the controlling document or function. If a required fact is missing, do not invent it; obtain the controlled record or specialist decision.

13 Knowledge Transfer and Handover

Onboarding, Internal Transfer & Offboarding SOP | HR-SOP-06 | v4.6 | Effective 2026-07-15 | Section 13 Knowledge Transfer and Handover | People & Culture | INTERNAL

Knowledge Transfer and Handover establishes the requirements, responsibilities and decision rules that apply within this part of Onboarding, Internal Transfer & Offboarding SOP. The rules are interpreted with the document scope, the employee/worker or system context, and any specialist cross-reference that applies.

13.1 Handover plan

Handover plan is governed as part of Knowledge Transfer and Handover. Lifecycle steps are executed from authoritative worker and engagement records rather than from informal messages or assumptions.

For handover, the recorded employment category, current role, manager relationship and approved effective dates must be checked before a decision is finalized. The accountable manager or sponsor provides the business trigger; People Operations coordinates the lifecycle event; specialist teams execute the controls they own.

- Managers and sponsors initiate accurate lifecycle events.
- People Operations validates worker status and coordinates workflow.
- Exceptions must be documented in the controlled workflow and may not be created by custom team practice.
- Where a verified external or client requirement is stricter, People & Culture or the specialist owner determines the applicable treatment.

13.2 Client/project documentation

Client/project documentation is governed as part of Knowledge Transfer and Handover. Lifecycle steps are executed from authoritative worker and engagement records rather than from informal messages or assumptions.

For client, project, documentation, the recorded employment category, current role, manager relationship and approved effective dates must be checked before a decision is finalized. The accountable manager or sponsor provides the business trigger; People Operations coordinates the lifecycle event; specialist teams execute the controls they own.

- Managers and sponsors initiate accurate lifecycle events.
- People Operations validates worker status and coordinates workflow.
- Exceptions must be documented in the controlled workflow and may not be created by custom team practice.
- Where a verified external or client requirement is stricter, People & Culture or the specialist owner determines the applicable treatment.

13.3 Credentials prohibition

Credentials prohibition is governed as part of Knowledge Transfer and Handover. Lifecycle steps are executed from authoritative worker and engagement records rather than from informal messages or assumptions.

For credentials, prohibition, the recorded employment category, current role, manager relationship and approved effective dates must be checked before a decision is finalized. The accountable manager or sponsor provides the business trigger; People Operations coordinates the lifecycle event; specialist teams execute the controls they own.

- Managers and sponsors initiate accurate lifecycle events.
- People Operations validates worker status and coordinates workflow.
- Exceptions must be documented in the controlled workflow and may not be created by custom team practice.
- Where a verified external or client requirement is stricter, People & Culture or the specialist owner determines the applicable treatment.

13.4 Record locations

Record locations is governed as part of Knowledge Transfer and Handover. Lifecycle steps are executed from authoritative worker and engagement records rather than from informal messages or assumptions.

For record, locations, the recorded employment category, current role, manager relationship and approved effective dates must be checked before a decision is finalized. The accountable manager or sponsor provides the business trigger; People Operations coordinates the lifecycle event; specialist teams execute the controls they own.

- Managers and sponsors initiate accurate lifecycle events.
- People Operations validates worker status and coordinates workflow.
- Exceptions must be documented in the controlled workflow and may not be created by custom team practice.
- Where a verified external or client requirement is stricter, People & Culture or the specialist owner determines the applicable treatment.

13.5 Completion evidence

Completion evidence is governed as part of Knowledge Transfer and Handover. Lifecycle steps are executed from authoritative worker and engagement records rather than from informal messages or assumptions.

For completion, evidence, the recorded employment category, current role, manager relationship and approved effective dates must be checked before a decision is finalized. The accountable manager or sponsor provides the business trigger; People Operations coordinates the lifecycle event; specialist teams execute the controls they own.

- Managers and sponsors initiate accurate lifecycle events.
- People Operations validates worker status and coordinates workflow.
- Exceptions must be documented in the controlled workflow and may not be created by custom team practice.
- Where a verified external or client requirement is stricter, People & Culture or the specialist owner determines the applicable treatment.

14 Asset Return and Recovery

Onboarding, Internal Transfer & Offboarding SOP | HR-SOP-06 | v4.6 | Effective 2026-07-15 | Section 14 Asset Return and Recovery | People & Culture | INTERNAL

Asset Return and Recovery establishes the requirements, responsibilities and decision rules that apply within this part of Onboarding, Internal Transfer & Offboarding SOP. The rules are interpreted with the document scope, the employee/worker or system context, and any specialist cross-reference that applies.

14.1 AssetSphere inventory

AssetSphere inventory is governed as part of Asset Return and Recovery. Lifecycle steps are executed from authoritative worker and engagement records rather than from informal messages or assumptions.

For assetsphere, inventory, the recorded employment category, current role, manager relationship and approved effective dates must be checked before a decision is finalized. The accountable manager or sponsor provides the business trigger; People Operations coordinates the lifecycle event; specialist teams execute the controls they own.

- Managers and sponsors initiate accurate lifecycle events.
- People Operations validates worker status and coordinates workflow.
- Exceptions must be documented in the controlled workflow and may not be created by custom team practice.
- Where a verified external or client requirement is stricter, People & Culture or the specialist owner determines the applicable treatment.

14.2 Return scheduling

Return scheduling is governed as part of Asset Return and Recovery. Lifecycle steps are executed from authoritative worker and engagement records rather than from informal messages or assumptions.

For return, scheduling, the recorded employment category, current role, manager relationship and approved effective dates must be checked before a decision is finalized. The accountable manager or sponsor provides the business trigger; People Operations coordinates the lifecycle event; specialist teams execute the controls they own.

- Managers and sponsors initiate accurate lifecycle events.
- People Operations validates worker status and coordinates workflow.
- Exceptions must be documented in the controlled workflow and may not be created by custom team practice.
- Where a verified external or client requirement is stricter, People & Culture or the specialist owner determines the applicable treatment.

HR-SOP-06-T08 - Asset Return Decision Table

Situation	Primary approver	Specialist concurrence	Evidence
Routine request	Line Manager / designated owner	As triggered	Business purpose + workflow record
Material or high-risk request	Functional Head / Business Owner	Security/Privacy/Legal/Finance as applicable	Risk and exception rationale
Enterprise exception	Executive Approver or governance committee	Policy Owner	Scope, conditions, expiry, review date

14.3 Remote return

Remote return is governed as part of Asset Return and Recovery. Lifecycle steps are executed from authoritative worker and engagement records rather than from informal messages or assumptions.

For remote, return, the recorded employment category, current role, manager relationship and approved effective dates must be checked before a decision is finalized. The accountable manager or sponsor provides the business trigger; People Operations coordinates the lifecycle event; specialist teams execute the controls they own.

- Managers and sponsors initiate accurate lifecycle events.
- People Operations validates worker status and coordinates workflow.
- Exceptions must be documented in the controlled workflow and may not be created by custom team practice.
- Where a verified external or client requirement is stricter, People & Culture or the specialist owner determines the applicable treatment.

Operational scenario S10: Contractor leaves unexpectedly but still has client access. The sponsor triggers the departure immediately; IAM suspends access under IAM-STD-03; Vendor Management coordinates the supplier action; Security is engaged if the departure is unexplained or suspicious. Client-data access is not left active merely because paperwork is incomplete.

14.4 Missing/damaged assets

Missing/damaged assets is governed as part of Asset Return and Recovery. Lifecycle steps are executed from authoritative worker and engagement records rather than from informal messages or assumptions.

For missing, damaged, assets, the recorded employment category, current role, manager relationship and approved effective dates must be checked before a decision is finalized. The accountable manager or sponsor provides the business trigger; People Operations coordinates the lifecycle event; specialist teams execute the controls they own.

- Managers and sponsors initiate accurate lifecycle events.
- People Operations validates worker status and coordinates workflow.
- Exceptions must be documented in the controlled workflow and may not be created by custom team practice.
- Where a verified external or client requirement is stricter, People & Culture or the specialist owner determines the applicable treatment.

14.5 Vendor-owned equipment

The manager submits the role, start date, work location and access profile before the provisioning cut-off. PeopleHub supplies the joiner event to AccessHub; DeviceCentral and AssetSphere track device configuration and custody. Privileged or client-production access is never granted solely because a standard onboarding ticket exists.

Lifecycle steps are executed from authoritative worker and engagement records rather than from informal messages or assumptions.

For vendor, owned, equipment, the recorded employment category, current role, manager relationship and approved effective dates must be checked before a decision is finalized. The accountable manager or sponsor provides the business trigger; People Operations coordinates the lifecycle event; specialist teams execute the controls they own.

- Managers and sponsors initiate accurate lifecycle events.
- People Operations validates worker status and coordinates workflow.
- Exceptions must be documented in the controlled workflow and may not be created by custom team practice.
- Where a verified external or client requirement is stricter, People & Culture or the specialist owner determines the applicable treatment.

14.6 Security escalation

Security escalation is governed as part of Asset Return and Recovery. Lifecycle steps are executed from authoritative worker and engagement records rather than from informal messages or assumptions.

For security, escalation, the recorded employment category, current role, manager relationship and approved effective dates must be checked before a decision is finalized. The accountable manager or sponsor provides the business trigger; People Operations coordinates the lifecycle event; specialist teams execute the controls they own.

- Managers and sponsors initiate accurate lifecycle events.
- People Operations validates worker status and coordinates workflow.
- Exceptions must be documented in the controlled workflow and may not be created by custom team practice.
- Where a verified external or client requirement is stricter, People & Culture or the specialist owner determines the applicable treatment.

Related controlled source: Information Security Policy & Procedures Manual (SEC-POL-01) §4 - Asset lifecycle/loss handling. This reference supplements this section and does not transfer ownership of unrelated rules.

15 Access Revocation and Identity Closure

Onboarding, Internal Transfer & Offboarding SOP | HR-SOP-06 | v4.6 | Effective 2026-07-15 | Section 15 Access Revocation and Identity Closure | People & Culture | INTERNAL

Access Revocation and Identity Closure establishes the requirements, responsibilities and decision rules that apply within this part of Onboarding, Internal Transfer & Offboarding SOP. The rules are interpreted with the document scope, the employee/worker or system context, and any specialist cross-reference that applies.

15.1 Standard termination trigger

Standard termination trigger is governed as part of Access Revocation and Identity Closure. Lifecycle steps are executed from authoritative worker and engagement records rather than from informal messages or assumptions.

For standard, termination, trigger, the recorded employment category, current role, manager relationship and approved effective dates must be checked before a decision is finalized. The accountable manager or sponsor provides the business trigger; People Operations coordinates the lifecycle event; specialist teams execute the controls they own.

- Managers and sponsors initiate accurate lifecycle events.
- People Operations validates worker status and coordinates workflow.
- Exceptions must be documented in the controlled workflow and may not be created by custom team practice.
- Where a verified external or client requirement is stricter, People & Culture or the specialist owner determines the applicable treatment.

HR-SOP-06-T09 - Access Revocation Timing Matrix

Control point	Required treatment	Evidence
Business purpose	Must be defined before action or approval	Request/workflow record
Independent approval	No self-approval where requester benefits or is conflicted	Approval history
Specialist trigger	Route Security/Privacy/Legal/Finance/HR review when criteria apply	Concurrence record
Exception	Document scope, justification, controls and expiry	Approved exception record

15.2 Same-day/urgent disablement

Same-day/urgent disablement is governed as part of Access Revocation and Identity Closure. Lifecycle steps are executed from authoritative worker and engagement records rather than from informal messages or assumptions.

For urgent, disablement, the recorded employment category, current role, manager relationship and approved effective dates must be checked before a decision is finalized. The accountable manager or sponsor provides the business trigger; People Operations coordinates the lifecycle event; specialist teams execute the controls they own.

- Managers and sponsors initiate accurate lifecycle events.
- People Operations validates worker status and coordinates workflow.
- Exceptions must be documented in the controlled workflow and may not be created by custom team practice.
- Where a verified external or client requirement is stricter, People & Culture or the specialist owner determines the applicable treatment.

Related controlled source: Identity, Access Management & Acceptable Technology Use Standard (IAM-STD-03) §4 - Identity lifecycle closure. This reference supplements this section and does not transfer ownership of unrelated rules.

15.3 Privileged access

Privileged access is governed as part of Access Revocation and Identity Closure. Lifecycle steps are executed from authoritative worker and engagement records rather than from informal messages or assumptions.

For privileged, access, the recorded employment category, current role, manager relationship and approved effective dates must be checked before a decision is finalized. The accountable manager or sponsor provides the business trigger; People Operations coordinates the lifecycle event; specialist teams execute the controls they own.

- Managers and sponsors initiate accurate lifecycle events.
- People Operations validates worker status and coordinates workflow.
- Exceptions must be documented in the controlled workflow and may not be created by custom team practice.
- Where a verified external or client requirement is stricter, People & Culture or the specialist owner determines the applicable treatment.

15.4 Client/system access

Client/system access is governed as part of Access Revocation and Identity Closure. Lifecycle steps are executed from authoritative worker and engagement records rather than from informal messages or assumptions.

For client, system, access, the recorded employment category, current role, manager relationship and approved effective dates must be checked before a decision is finalized. The accountable manager or sponsor provides the business trigger; People Operations coordinates the lifecycle event; specialist teams execute the controls they own.

- Managers and sponsors initiate accurate lifecycle events.
- People Operations validates worker status and coordinates workflow.
- Exceptions must be documented in the controlled workflow and may not be created by custom team practice.
- Where a verified external or client requirement is stricter, People & Culture or the specialist owner determines the applicable treatment.

Operational scenario S11: Vendor replaces an engineer without notifying Aurelius in advance. Apply the requirements in Onboarding, Internal Transfer & Offboarding SOP to the facts, confirm the relevant source-of-truth record and route any specialist issue to the controlling document or function. If a required fact is missing, do not invent it; obtain the controlled record or specialist decision.

15.5 Service ownership transfer

Service ownership transfer is governed as part of Access Revocation and Identity Closure. Lifecycle steps are executed from authoritative worker and engagement records rather than from informal messages or assumptions.

For service, ownership, transfer, the recorded employment category, current role, manager relationship and approved effective dates must be checked before a decision is finalized. The accountable manager or sponsor provides the business trigger; People Operations coordinates the lifecycle event; specialist teams execute the controls they own.

- Managers and sponsors initiate accurate lifecycle events.
- People Operations validates worker status and coordinates workflow.
- Exceptions must be documented in the controlled workflow and may not be created by custom team practice.
- Where a verified external or client requirement is stricter, People & Culture or the specialist owner determines the applicable treatment.

15.6 Verification of closure

Verification of closure is governed as part of Access Revocation and Identity Closure. Lifecycle steps are executed from authoritative worker and engagement records rather than from informal messages or assumptions.

For verification, closure, the recorded employment category, current role, manager relationship and approved effective dates must be checked before a decision is finalized. The accountable manager or sponsor provides the business trigger; People Operations coordinates the lifecycle event; specialist teams execute the controls they own.

- Managers and sponsors initiate accurate lifecycle events.
- People Operations validates worker status and coordinates workflow.
- Exceptions must be documented in the controlled workflow and may not be created by custom team practice.
- Where a verified external or client requirement is stricter, People & Culture or the specialist owner determines the applicable treatment.

15 Access Revocation and Identity Closure - continued

16 Exit Interview and Final Administrative Closure

Exit Interview and Final Administrative Closure establishes the requirements, responsibilities and decision rules that apply within this part of Onboarding, Internal Transfer & Offboarding SOP. The rules are interpreted with the document scope, the employee/worker or system context, and any specialist cross-reference that applies.

16.1 Exit interview

Exit interview is governed as part of Exit Interview and Final Administrative Closure. Lifecycle steps are executed from authoritative worker and engagement records rather than from informal messages or assumptions.

For interview, the recorded employment category, current role, manager relationship and approved effective dates must be checked before a decision is finalized. The accountable manager or sponsor provides the business trigger; People Operations coordinates the lifecycle event; specialist teams execute the controls they own.

- Managers and sponsors initiate accurate lifecycle events.
- People Operations validates worker status and coordinates workflow.
- Exceptions must be documented in the controlled workflow and may not be created by custom team practice.
- Where a verified external or client requirement is stricter, People & Culture or the specialist owner determines the applicable treatment.

16.2 Payroll/final settlement handoff

Payroll/final settlement handoff is governed as part of Exit Interview and Final Administrative Closure. Lifecycle steps are executed from authoritative worker and engagement records rather than from informal messages or assumptions.

For payroll, final, settlement, handoff, the recorded employment category, current role, manager relationship and approved effective dates must be checked before a decision is finalized. The accountable manager or sponsor provides the business trigger; People Operations coordinates the lifecycle event; specialist teams execute the controls they own.

- Managers and sponsors initiate accurate lifecycle events.
- People Operations validates worker status and coordinates workflow.
- Exceptions must be documented in the controlled workflow and may not be created by custom team practice.
- Where a verified external or client requirement is stricter, People & Culture or the specialist owner determines the applicable treatment.

16.3 Expense/card closure

Expense/card closure is governed as part of Exit Interview and Final Administrative Closure. Lifecycle steps are executed from authoritative worker and engagement records rather than from informal messages or assumptions.

For expense, closure, the recorded employment category, current role, manager relationship and approved effective dates must be checked before a decision is finalized. The accountable manager or sponsor provides the business trigger; People Operations coordinates the lifecycle event; specialist teams execute the controls they own.

- Managers and sponsors initiate accurate lifecycle events.
- People Operations validates worker status and coordinates workflow.
- Exceptions must be documented in the controlled workflow and may not be created by custom team practice.
- Where a verified external or client requirement is stricter, People & Culture or the specialist owner determines the applicable treatment.

16.4 Document issuance

Document issuance is governed as part of Exit Interview and Final Administrative Closure. Lifecycle steps are executed from authoritative worker and engagement records rather than from informal messages or assumptions.

For document, issuance, the recorded employment category, current role, manager relationship and approved effective dates must be checked before a decision is finalized. The accountable manager or sponsor provides the business trigger; People Operations coordinates the lifecycle event; specialist teams execute the controls they own.

- Managers and sponsors initiate accurate lifecycle events.
- People Operations validates worker status and coordinates workflow.
- Exceptions must be documented in the controlled workflow and may not be created by custom team practice.
- Where a verified external or client requirement is stricter, People & Culture or the specialist owner determines the applicable treatment.

Operational scenario S12: Offboarding discovers active corporate-card transactions. Apply the requirements in Onboarding, Internal Transfer & Offboarding SOP to the facts, confirm the relevant source-of-truth record and route any specialist issue to the controlling document or function. If a required fact is missing, do not invent it; obtain the controlled record or specialist decision.

16.5 Record completion

Record completion is governed as part of Exit Interview and Final Administrative Closure. Lifecycle steps are executed from authoritative worker and engagement records rather than from informal messages or assumptions.

For record, completion, the recorded employment category, current role, manager relationship and approved effective dates must be checked before a decision is finalized. The accountable manager or sponsor provides the business trigger; People Operations coordinates the lifecycle event; specialist teams execute the controls they own.

- Managers and sponsors initiate accurate lifecycle events.
- People Operations validates worker status and coordinates workflow.
- Exceptions must be documented in the controlled workflow and may not be created by custom team practice.
- Where a verified external or client requirement is stricter, People & Culture or the specialist owner determines the applicable treatment.

17 Involuntary, Immediate or High-Risk Separation

Onboarding, Internal Transfer & Offboarding SOP | HR-SOP-06 | v4.6 | Effective 2026-07-15 | Section 17 Involuntary, Immediate or High-Risk Separation | People & Culture | INTERNAL

Involuntary, Immediate or High-Risk Separation establishes the requirements, responsibilities and decision rules that apply within this part of Onboarding, Internal Transfer & Offboarding SOP. The rules are interpreted with the document scope, the employee/worker or system context, and any specialist cross-reference that applies.

17.1 Restricted planning

Restricted planning is governed as part of Involuntary, Immediate or High-Risk Separation. Lifecycle steps are executed from authoritative worker and engagement records rather than from informal messages or assumptions.

For restricted, planning, the recorded employment category, current role, manager relationship and approved effective dates must be checked before a decision is finalized. The accountable manager or sponsor provides the business trigger; People Operations coordinates the lifecycle event; specialist teams execute the controls they own.

- Managers and sponsors initiate accurate lifecycle events.
- People Operations validates worker status and coordinates workflow.
- Exceptions must be documented in the controlled workflow and may not be created by custom team practice.
- Where a verified external or client requirement is stricter, People & Culture or the specialist owner determines the applicable treatment.

HR-SOP-06-T10 - Urgent Separation Coordination Matrix

Control point	Required treatment	Evidence
Business purpose	Must be defined before action or approval	Request/workflow record
Independent approval	No self-approval where requester benefits or is conflicted	Approval history
Specialist trigger	Route Security/Privacy/Legal/Finance/HR review when criteria apply	Concurrence record
Exception	Document scope, justification, controls and expiry	Approved exception record

17.2 Coordinated disablement

Coordinated disablement is governed as part of Involuntary, Immediate or High-Risk Separation. Lifecycle steps are executed from authoritative worker and engagement records rather than from informal messages or assumptions.

For coordinated, disablement, the recorded employment category, current role, manager relationship and approved effective dates must be checked before a decision is finalized. The accountable manager or sponsor provides the business trigger; People Operations coordinates the lifecycle event; specialist teams execute the controls they own.

- Managers and sponsors initiate accurate lifecycle events.
- People Operations validates worker status and coordinates workflow.
- Exceptions must be documented in the controlled workflow and may not be created by custom team practice.
- Where a verified external or client requirement is stricter, People & Culture or the specialist owner determines the applicable treatment.

17.3 Security presence

Security presence is governed as part of Involuntary, Immediate or High-Risk Separation. Lifecycle steps are executed from authoritative worker and engagement records rather than from informal messages or assumptions.

For security, presence, the recorded employment category, current role, manager relationship and approved effective dates must be checked before a decision is finalized. The accountable manager or sponsor provides the business trigger; People Operations coordinates the lifecycle event; specialist teams execute the controls they own.

- Managers and sponsors initiate accurate lifecycle events.
- People Operations validates worker status and coordinates workflow.
- Exceptions must be documented in the controlled workflow and may not be created by custom team practice.
- Where a verified external or client requirement is stricter, People & Culture or the specialist owner determines the applicable treatment.

17.4 Asset recovery

Asset recovery is governed as part of Involuntary, Immediate or High-Risk Separation. Lifecycle steps are executed from authoritative worker and engagement records rather than from informal messages or assumptions.

For asset, recovery, the recorded employment category, current role, manager relationship and approved effective dates must be checked before a decision is finalized. The accountable manager or sponsor provides the business trigger; People Operations coordinates the lifecycle event; specialist teams execute the controls they own.

- Managers and sponsors initiate accurate lifecycle events.
- People Operations validates worker status and coordinates workflow.
- Exceptions must be documented in the controlled workflow and may not be created by custom team practice.
- Where a verified external or client requirement is stricter, People & Culture or the specialist owner determines the applicable treatment.

17.5 Communications

Communications is governed as part of Involuntary, Immediate or High-Risk Separation. Lifecycle steps are executed from authoritative worker and engagement records rather than from informal messages or assumptions.

For communications, the recorded employment category, current role, manager relationship and approved effective dates must be checked before a decision is finalized. The accountable manager or sponsor provides the business trigger; People Operations coordinates the lifecycle event; specialist teams execute the controls they own.

- Managers and sponsors initiate accurate lifecycle events.
- People Operations validates worker status and coordinates workflow.
- Exceptions must be documented in the controlled workflow and may not be created by custom team practice.
- Where a verified external or client requirement is stricter, People & Culture or the specialist owner determines the applicable treatment.

Operational scenario S13: Knowledge-transfer document contains passwords pasted by the departing worker. Do not share credentials. Use AccessHub/KeyFort emergency or delegated-access procedures and report suspected compromise. Operational urgency changes the escalation path, not the requirement for individual accountability.

17.6 Incident handoff if suspicious activity

Incident handoff if suspicious activity is governed as part of Involuntary, Immediate or High-Risk Separation. Lifecycle steps are executed from authoritative worker and engagement records rather than from informal messages or assumptions.

For incident, handoff, suspicious, activity, the recorded employment category, current role, manager relationship and approved effective dates must be checked before a decision is finalized. The accountable manager or sponsor provides the business trigger; People Operations coordinates the lifecycle event; specialist teams execute the controls they own.

- Managers and sponsors initiate accurate lifecycle events.
- People Operations validates worker status and coordinates workflow.
- Exceptions must be documented in the controlled workflow and may not be created by custom team practice.
- Where a verified external or client requirement is stricter, People & Culture or the specialist owner determines the applicable treatment.

Related controlled source: Information Security Policy & Procedures Manual (SEC-POL-01) §18 - Security incident reporting handoff for suspicious departure. This reference supplements this section and does not transfer ownership of unrelated rules.

17 Involuntary, Immediate or High-Risk Separation - continued

18 Contractor, Consultant and Vendor Personnel Departure

Onboarding, Internal Transfer & Offboarding SOP | HR-SOP-06 | v4.6 | Effective 2026-07-15 | Section 18 Contractor, Consultant and Vendor Personnel Departure | People & Culture | INTERNAL

Contractor, Consultant and Vendor Personnel Departure establishes the requirements, responsibilities and decision rules that apply within this part of Onboarding, Internal Transfer & Offboarding SOP. The rules are interpreted with the document scope, the employee/worker or system context, and any specialist cross-reference that applies.

18.1 Engagement-owner trigger

Engagement-owner trigger is governed as part of Contractor, Consultant and Vendor Personnel Departure. Lifecycle steps are executed from authoritative worker and engagement records rather than from informal messages or assumptions.

For engagement, owner, trigger, the recorded employment category, current role, manager relationship and approved effective dates must be checked before a decision is finalized. The accountable manager or sponsor provides the business trigger; People Operations coordinates the lifecycle event; specialist teams execute the controls they own.

- Managers and sponsors initiate accurate lifecycle events.
- People Operations validates worker status and coordinates workflow.
- Exceptions must be documented in the controlled workflow and may not be created by custom team practice.
- Where a verified external or client requirement is stricter, People & Culture or the specialist owner determines the applicable treatment.

HR-SOP-06-T11 - Non-Employee Departure Matrix

Control point	Required treatment	Evidence
Business purpose	Must be defined before action or approval	Request/workflow record
Independent approval	No self-approval where requester benefits or is conflicted	Approval history
Specialist trigger	Route Security/Privacy/Legal/Finance/HR review when criteria apply	Concurrence record
Exception	Document scope, justification, controls and expiry	Approved exception record

18.2 Vendor notification

Vendor notification is governed as part of Contractor, Consultant and Vendor Personnel Departure. Lifecycle steps are executed from authoritative worker and engagement records rather than from informal messages or assumptions.

For vendor, notification, the recorded employment category, current role, manager relationship and approved effective dates must be checked before a decision is finalized. The accountable manager or sponsor provides the business trigger; People Operations coordinates the lifecycle event; specialist teams execute the controls they own.

- Managers and sponsors initiate accurate lifecycle events.
- People Operations validates worker status and coordinates workflow.
- Exceptions must be documented in the controlled workflow and may not be created by custom team practice.
- Where a verified external or client requirement is stricter, People & Culture or the specialist owner determines the applicable treatment.

18.3 Access removal

Access removal is governed as part of Contractor, Consultant and Vendor Personnel Departure. Lifecycle steps are executed from authoritative worker and engagement records rather than from informal messages or assumptions.

For access, removal, the recorded employment category, current role, manager relationship and approved effective dates must be checked before a decision is finalized. The accountable manager or sponsor provides the business trigger; People Operations coordinates the lifecycle event; specialist teams execute the controls they own.

- Managers and sponsors initiate accurate lifecycle events.
- People Operations validates worker status and coordinates workflow.
- Exceptions must be documented in the controlled workflow and may not be created by custom team practice.
- Where a verified external or client requirement is stricter, People & Culture or the specialist owner determines the applicable treatment.

18.4 Data/asset return

Data/asset return is governed as part of Contractor, Consultant and Vendor Personnel Departure. Lifecycle steps are executed from authoritative worker and engagement records rather than from informal messages or assumptions.

For asset, return, the recorded employment category, current role, manager relationship and approved effective dates must be checked before a decision is finalized. The accountable manager or sponsor provides the business trigger; People Operations coordinates the lifecycle event; specialist teams execute the controls they own.

- Managers and sponsors initiate accurate lifecycle events.
- People Operations validates worker status and coordinates workflow.
- Exceptions must be documented in the controlled workflow and may not be created by custom team practice.
- Where a verified external or client requirement is stricter, People & Culture or the specialist owner determines the applicable treatment.

Operational scenario S14: AccessHub closure succeeds but a client-side account is not visible in the standard inventory. Apply the requirements in Onboarding, Internal Transfer & Offboarding SOP to the facts, confirm the relevant source-of-truth record and route any specialist issue to the controlling document or function. If a required fact is missing, do not invent it; obtain the controlled record or specialist decision.

18.5 Substitute resource

Substitute resource is governed as part of Contractor, Consultant and Vendor Personnel Departure. Lifecycle steps are executed from authoritative worker and engagement records rather than from informal messages or assumptions.

For substitute, resource, the recorded employment category, current role, manager relationship and approved effective dates must be checked before a decision is finalized. The accountable manager or sponsor provides the business trigger; People Operations coordinates the lifecycle event; specialist teams execute the controls they own.

- Managers and sponsors initiate accurate lifecycle events.
- People Operations validates worker status and coordinates workflow.
- Exceptions must be documented in the controlled workflow and may not be created by custom team practice.
- Where a verified external or client requirement is stricter, People & Culture or the specialist owner determines the applicable treatment.

18.6 Vendor risk follow-up

Vendor risk follow-up is governed as part of Contractor, Consultant and Vendor Personnel Departure. Lifecycle steps are executed from authoritative worker and engagement records rather than from informal messages or assumptions.

For vendor, follow, the recorded employment category, current role, manager relationship and approved effective dates must be checked before a decision is finalized. The accountable manager or sponsor provides the business trigger; People Operations coordinates the lifecycle event; specialist teams execute the controls they own.

- Managers and sponsors initiate accurate lifecycle events.
- People Operations validates worker status and coordinates workflow.
- Exceptions must be documented in the controlled workflow and may not be created by custom team practice.
- Where a verified external or client requirement is stricter, People & Culture or the specialist owner determines the applicable treatment.

Related controlled source: Procurement, Vendor & Third-Party Risk Management Policy (PROC-TPRM-11) §19 - Vendor/personnel termination. This reference supplements this section and does not transfer ownership of unrelated rules.

19 Rehire Eligibility and Post-Separation Requests

Rehire Eligibility and Post-Separation Requests establishes the requirements, responsibilities and decision rules that apply within this part of Onboarding, Internal Transfer & Offboarding SOP. The rules are interpreted with the document scope, the employee/worker or system context, and any specialist cross-reference that applies.

19.1 Rehire status recording

Rehire status recording is governed as part of Rehire Eligibility and Post-Separation Requests. Lifecycle steps are executed from authoritative worker and engagement records rather than from informal messages or assumptions.

For rehire, status, recording, the recorded employment category, current role, manager relationship and approved effective dates must be checked before a decision is finalized.
