ONBOARDING AND OFFBOARDING STANDARD OPERATING PROCEDURES

Segment 1 of 2 — Purpose and Scope · Governance · Pre-Joining Process · Day One Experience · First Week Integration · 30-60-90 Day Induction · Role-Specific Tracks · Probation Management

Version	2.3	**Effective Date**	01 April 2024
Review Date	31 March 2025	**Classification**	Internal Use Only
Approved By	Mr. Rajesh Arjun	**Document Owner**	Ms. Priya Menon
Legal Review	Mr. Sandeep Iyer	**Department**	Human Resources & Operations
Doc Reference	HR-OBS-001-v2.3	**IT Liaison**	Mr. Kiran Bhat, Head of IT
Segment	1 of 2 (Pages 1–40)	**Total Segments**	2

This is Segment 1 of the Arjun Technologies Pvt. Ltd. Onboarding and Offboarding Standard Operating Procedures, Version 2.3. It establishes the complete onboarding process from offer acceptance through end of the 90-day probationary period. Section 1 covers purpose, scope, governance, and relationships to other documents. Section 2 covers the full pre-joining process: offer issuance, the pre-joining communication timeline, background verification with DPDP Act compliance, documentation collection, IT provisioning, and workspace readiness. Section 3 covers the Day One experience for office and remote joiners including the Welcome Programme and all Day One mandatory completions. Section 4 covers the first-week integration programme. Section 5 provides the complete 30-60-90 day structured induction framework. Section 6 provides six role-specific onboarding tracks. Section 7 covers the full probationary period management framework including confirmation, extension, and non-confirmation processes. Segment 2 covers the complete offboarding SOP, internal transfer and promotion onboarding, the manager and buddy obligations guide, HRMS administration, compliance, and all appendices. For queries contact hr@arjuntech.in.

Revision History

Version	Date	Material Changes	Approved By
1.0	Apr 2011	Initial publication. Basic onboarding checklist and offboarding clearance process.	CEO
1.1	Sep 2012	30-day induction structure formalised. Buddy programme introduced. IT provisioning SLA added.	CEO
1.2	Mar 2014	Role-specific onboarding tracks introduced for Engineering and Consulting. Offboarding exit interview formalised.	CEO
1.3	Nov 2015	Pre-joining communication timeline expanded. Background verification SOP added.	CEO
1.4	Jun 2017	Graduate trainee and campus hire track added. Full and Final Settlement process documented.	CEO
2.0	Jan 2019	Full rewrite. 30-60-90 day structured induction introduced. Manager and buddy obligations formalised. Internal transfer addendum added.	CEO
2.1	Aug 2020	Remote and hybrid onboarding track added. Virtual Day One experience provisions added.	CEO
2.2	Mar 2022	Permanent hybrid model established. BGV updated for digital identity checks. HRMS onboarding module integration guide added.	CEO
2.3	Apr 2024	DPDP Act 2023 integrated into pre-joining data collection provisions. IT provisioning updated for cloud-native tools. Senior hire onboarding track (Band 6+) added. Probation provisions aligned with PMP Segment 4.	CEO

Table of Contents — Segment 1

SEGMENT 1 — This Document (Pages 1–40)

Section 1 — Purpose, Scope, Governance, and Relationships to Other Documents

1.1 Why Onboarding and Offboarding Quality Matters
1.2 Scope — Who This SOP Covers
1.3 SOP Governance and Version Control
1.4 Relationship to Other Company Policies and Documents

Section 2 — Pre-Joining Process — From Offer Acceptance to Day One

2.1 Offer Letter Issuance and Acceptance Confirmation
2.2 Pre-Joining Communication Timeline — 7 Touchpoints
2.3 Background Verification — Process, Scope, and DPDP Act Compliance
2.4 Pre-Joining Documentation — Collection, Verification, and Retention
2.5 IT Provisioning — Pre-Day One System and Equipment Preparation
2.6 Workspace, Equipment, and Facilities Readiness

Section 3 — Day One Experience — Arrival, Welcome, and Essential Orientation

3.1 Day One Design Principles
3.2 Physical and Virtual Arrival Protocols
3.3 The Day One Welcome Programme — Six Modules
3.4 Essential Day One Completions — Systems and Acknowledgements
3.5 Manager and Buddy Roles on Day One

Section 4 — First Week Integration Programme

4.1 First-Week Schedule and Objectives by Day
4.2 Team and Stakeholder Introduction Process
4.3 Role Clarity and Initial Goal-Setting
4.4 Mandatory First-Week Training Modules

Section 5 — 30-60-90 Day Structured Induction Framework

5.1 Philosophy — Progressive Integration by Design
5.2 30-Day Milestone — Settling In, OKR Setting, Initial Assessment
5.3 60-Day Milestone — Building Contribution and Confirming Direction
5.4 90-Day Milestone — Confirmation Review and Forward Plan
5.5 HRMS Onboarding Module — Milestone Tracking

Section 6 — Role-Specific Onboarding Tracks

6.1 Engineering and Technology Track
6.2 Data Analytics and Machine Learning Track
6.3 Consulting and Client-Facing Track
6.4 Sales and Account Management Track
6.5 Support Functions Track
6.6 Senior Hire Track — Band 6 and Above

Section 7 — Probationary Period Management

7.1 Probationary Period Structure and Manager Obligations
7.2 Probationary Review Milestones and Documentation Standards
7.3 Confirmation of Employment — Criteria and Process
7.4 Probationary Period Extension — Grounds, Process, and Limits
7.5 Non-Confirmation — Fair Process Requirements

SEGMENT 2 (Pages 41–80)

8–14 Offboarding SOP · Internal Transfer Addendum · Manager and Buddy Guide · HRMS Admin · Compliance · Appendices A–G

1. Purpose, Scope, Governance, and Relationships to Other Documents

1.1 Why Onboarding and Offboarding Quality Matters

The quality of an organisation's onboarding experience is one of the strongest predictors of new employee engagement, performance ramp-up speed, and long-term retention. A new employee who arrives to find working equipment, system access, a structured welcome programme, a manager who has invested time in their integration, and a clear picture of what success looks like in their first 90 days begins their employment with evidence that the company's commitment to them is real. A new employee who arrives to find their laptop not ready, their access credentials missing, their manager distracted, and no clear plan for their first days begins with evidence of the opposite — and research on early employment experience shows that this initial evidence shapes the employment relationship in ways that are significantly harder to reverse than might be expected.

At Arjun Technologies, with over 4,200 professionals across five cities, onboarding is a continuous, high-volume process. The company typically onboards 400–600 permanent employees each year alongside hundreds of interns and graduate trainees. Quality and consistency across this volume requires a documented, structured, and actively monitored SOP that defines precisely what must happen, when, and who is responsible. Offboarding receives less attention in most organisations, yet its quality matters enormously. An employee who leaves with a positive offboarding experience — contributions acknowledged, transition professionally managed, Full and Final Settlement processed promptly — is an ambassador. An employee whose offboarding was careless carries a very different story.

1.2 Scope — Who This SOP Covers

Category	Full SOP?	Key Variations	Primary Reference
Permanent employees — Bands 1–5	Yes — full onboarding SOP	Standard 30-60-90 track. Role-specific track per Section 6.	This document in full.
Permanent employees — Band 6+	Yes — with Senior Hire addendum	Enhanced onboarding track per Section 6.6. CEO/CXO welcome. Stakeholder introduction programme.	Section 6.6.
Fixed-term contract employees (3+ months)	Yes — with FTC modifications	FTC-specific confirmation provisions noted per section.	This document + FTC notes per section.
Graduate trainees and campus hires	Yes — with campus modifications	Cohort onboarding where 10+ join simultaneously. Additional structured mentoring.	This document + PMP Segment 4, Section 17.3.
Interns (4+ weeks)	Abbreviated — key sections only	Pre-joining, Day One, and supervisor assignment. No 30-60-90 structure.	PMP Segment 4, Section 17.3.
Contractors (3+ months)	Not covered by this SOP	Contractor provisioning checklist managed by engagement manager.	PMP Segment 4, Section 17.2.

1.3 SOP Governance and Version Control

This SOP is owned by the Vice President of Human Resources with operational co-ownership from the Head of IT (provisioning provisions) and the Head of Operations (facilities provisions). It is reviewed annually in January and February for a 01 April effective date. Material changes are communicated to all people managers through the HRMS portal and a manager briefing session before the effective date. The HRBP network is briefed on all changes before they take effect and is the first point of contact for manager queries on any provision of this SOP.

1.4 Relationship to Other Policies and Documents

Document	Reference	Interaction
Employee Handbook	HR-POL-001	Primary reference for employment terms communicated during onboarding. Provided on Day One.
Code of Conduct	HR-COC-001-v2.4	Acknowledged and signed as part of Day One completions. SOP specifies acknowledgement process.
Data Privacy Policy	LEGAL-POL-004-v2.1	Governs handling of new joiner personal data in pre-joining. DPDP Act consent requirements embedded in documentation process.
Leave and Attendance Policy	HR-LAP-001-v3.2	Leave entitlements explained during first-week induction. HRMS leave module training in first week.
Performance Management Policy	HR-PMP-001-v4.1	OKR-setting initiated at 30-day milestone. IDP created at 30-day review. Probation provisions aligned with PMP Segment 4, Section 22.
IT Security Policy	IT-SEC-POL-001-v5.2	IT security awareness training mandatory in first week. Acceptable Use Policy signed on Day One.
Prevention of Sexual Harassment Policy	HR-POL-006	POSH awareness delivered in first week. ICC contact details in Day One Welcome Pack.

2. Pre-Joining Process — From Offer Acceptance to Day One

2.1 Offer Letter Issuance and Acceptance Confirmation

The offer letter is the first formal document that defines the employment relationship. It must be accurate, complete, professionally presented, and issued within the timeline the candidate has been led to expect. A delayed or error-containing offer letter is a poor first impression that can, in a competitive talent market, result in the candidate accepting a competing offer in the interval.

Step	Action	Owner	Timeline	HRMS Action
1	Verbal offer to candidate by TA or hiring manager. Verbal acceptance sought.	TA / hiring manager	Within 24 hours of final interview decision.	TA records verbal offer in HRMS Recruitment.
2	Offer letter generated in HRMS using approved template for the applicable band. All details verified by HRBP before generation.	HRBP	Within 1 working day of verbal offer.	HRMS Offer Letter module → Generate → Review → Send.
3	Offer letter sent to candidate via HRMS-generated email with digital signature facility. Physical copy available on request.	HRMS automated	Same day as Step 2.	HRMS tracks delivery and opens.
4	Candidate accepts digitally through the HRMS Offer Portal, or returns signed physical copy.	Candidate	Typically 3–5 working days. TA follows up if no response within 3 working days.	HRMS records acceptance. Status updated to Accepted.
5	Acceptance confirmation email sent to candidate with joining date, reporting manager name, office location, and link to the pre-joining portal.	HRBP (automated on acceptance)	Same day as acceptance.	HRMS triggers pre-joining workflow automatically.
6	Reference requests initiated by TA where applicable.	TA	Within 2 working days of acceptance.	HRMS Recruitment → Reference Checks.

2.2 Pre-Joining Communication Timeline — 7 Touchpoints

The period between offer acceptance and Day One is a critical window where second thoughts, competing offers, and candidate anxiety can lead to withdrawal. The pre-joining communication programme maintains positive engagement through relevant, useful, and personal contact at defined intervals.

Timing	Communication / Action	Owner	Channel	Key Content
Day of acceptance	Welcome to the Arjun Technologies community email. Link to pre-joining portal. Joining date confirmed.	HRBP (automated)	Email	Welcome message. Pre-joining portal access. Joining date, time, location, and reporting manager details.
T-15 working days	Pre-joining documentation request. Background verification consent request.	HRBP + TA	Pre-joining portal + email	Document checklist. BGV consent form (DPDP Act compliant). Certificate upload facility.
T-10 working days	IT provisioning request sent to IT team. Equipment order initiated.	HRBP triggers; IT executes	HRMS workflow to IT	Laptop per band spec. Email account creation. Core system access provisioned.

Timing	Communication / Action	Owner	Channel	Key Content
T-7 working days	Buddy assigned and introduced. Buddy sends personal welcome message.	HRBP assigns; buddy contacts	Email or preferred messaging	Buddy introduction. Offer to answer informal questions about the company, team, and location.
T-5 working days	Pre-joining checklist completion reminder and status check.	HRBP	Portal automated reminder	Status of documentation, BGV, and any outstanding items. Joining instructions confirmed.
T-2 working days	Joining day logistics email. Manager personal welcome message.	HRBP + reporting manager	Email	Detailed Day One schedule. Entry access instructions. Parking and transport information.
T-1 working day	Final confirmation call or message from HRBP or buddy.	HRBP or buddy	Call or WhatsApp	Confirm all logistics. Answer any last-minute questions. Express genuine excitement.

2.3 Background Verification — Process, Scope, and DPDP Act Compliance

Background verification is a standard component of the pre-joining process for all permanent and fixed-term employees. Under the Digital Personal Data Protection Act 2023, all BGV data requires explicit consent from the candidate. The BGV consent form is included in the pre-joining portal documentation pack and must be completed before any data is shared with the BGV partner. BGV must be completed before the end of the 90-day probationary period. For roles with elevated access to sensitive client systems, BGV must be completed before system access is granted.

Verification Category	Scope	Required For	Timeline	DPDP Act Consent Requirement
Identity verification	Government-issued photo ID (Aadhaar, passport, or PAN). Address verification.	All employees.	3–5 working days.	BGV consent form signed before any data shared with BGV partner.
Educational qualification	Highest relevant degree or diploma. Professional certifications claimed in CV.	All employees. Enhanced for engineers, accountants, lawyers.	7–15 working days.	As above.
Previous employment	Last 3 employers — dates, designation, reason for leaving.	All employees.	7–15 working days.	As above.
Criminal record check	Court record search in locations of employment and residence.	All employees. Enhanced for roles with client financial or personal data access.	10–20 working days.	As above.
Credit check	CIBIL or equivalent — checks for serious financial irregularities, not credit score.	Finance, treasury, procurement, and Band 5+ only.	5–7 working days.	Separate explicit written consent for credit check — additional consent beyond standard BGV form.
Professional references	Two employer references. One character reference.	All employees. Band 6+: three employer references.	5–10 working days.	Candidate informed that references will be contacted. Reference subjects have no DPDP Act consent obligation as public professional information.

Where a BGV check returns a discrepancy, the HRBP and Legal team review before any employment decision is made. Minor discrepancies are resolved with the employee and noted in HRMS. Material discrepancies — a fabricated qualification, an undisclosed serious criminal conviction — are assessed by Legal and may result in offer withdrawal or non-confirmation. The employee has the right to respond to a material discrepancy before any adverse decision is made. BGV data retention: 3 years post-employment then deleted per the Data Privacy Policy retention schedule.

2.4 Pre-Joining Documentation — Collection, Verification, and Retention

Document	Mandatory?	Purpose	Retention Period
Government-issued photo ID (Aadhaar, PAN, or passport)	Mandatory	Identity verification. Statutory employment requirement.	Employment + 7 years.
Permanent Account Number (PAN) card	Mandatory	TDS processing. Statutory requirement.	Employment + 7 years.
Bank account details (account number and IFSC)	Mandatory	Salary disbursement.	Employment + 7 years.
Educational certificates (highest qualification)	Mandatory	Qualification verification.	Employment + 3 years post-separation.
Previous employment experience letters / relieving letters	Mandatory for lateral hires	Employment history verification.	Employment + 3 years post-separation.
Last 3 months salary slips (prior employer)	Required for lateral hires Band 3+	Compensation benchmarking verification.	6 months post-joining then deleted.
Professional certifications (where claimed in CV or offer)	Where claimed	Certification verification.	Employment + 3 years post-separation.
BGV consent form	Mandatory	DPDP Act consent for background verification data processing.	Employment + 3 years post-separation.
Medical fitness certificate	Band 5+ where role requires physical client site requirements	Fitness for specific role requirements.	Employment then deleted.

2.5 IT Provisioning — Pre-Day One System and Equipment Preparation

IT provisioning is one of the most operationally critical elements of pre-joining and one of the most frequently cited sources of poor Day One experience when it fails. An employee arriving without a working laptop or system access cannot begin productive work and receives an immediate signal that the company is less well-organised than the recruitment process suggested. The IT team operates to defined SLAs and the HRBP and hiring manager are jointly responsible for ensuring the provisioning request is submitted with sufficient lead time for the SLA to be met.

Provision	SLA	Band Standard	Pre-Day One Status	Owner
Company email account	3 working days	All bands — firstname.lastname@arjuntech.in	Active and tested. Credentials sent to personal email.	IT Security team.
Laptop provisioning and configuration	5 working days (standard). 8 working days (GPU/specialist).	Band 1–3: standard business laptop. Band 4–5: premium laptop. Band 6+: premium + external monitor.	Configured, software installed, security policies applied, MDM-enrolled.	IT team. HRBP triggers with joining date and role details.
Core system access (HRMS, email, Teams, Slack)	3 working days	All bands.	Active with temporary password. MFA enrolled.	IT Security team.
Role-specific system access (Jira, GitHub, Salesforce, etc.)	5 working days standard.	Per role family — see Section 6 role-specific tracks.	Active for role-appropriate systems. Systems requiring completed BGV provisioned after BGV cleared.	IT Security with hiring manager confirmation.
VPN and remote access	3 working days	All permanent employees.	VPN client installed. Credentials set. Test connection verified.	IT team.

Provision	SLA	Band Standard	Pre-Day One Status	Owner
Building access card	2 working days	All employees at assigned office.	Card ready at reception. If not ready: temporary visitor access arranged.	Facilities team at the assigned office.
Mobile phone (where applicable)	5 working days	Band 5+ in client-facing or on-call roles as confirmed by hiring manager.	Configured, company SIM installed, MDM enrolled.	IT team. Hiring manager confirms requirement.

2.6 Workspace, Equipment, and Facilities Readiness

Item	Owner	Completion Deadline	Standard
Desk assigned and cleared	Hiring manager + Facilities	T-2 working days	Clean desk with company stationery pack. Name card where used.
Locker assigned and key/code provided	Facilities	T-1 working day	Locker number communicated in Day One logistics email.
Welcome pack prepared	HRBP prepares standard content. Hiring manager adds personal element.	T-1 working day	Standard welcome pack including Employee Handbook, POSH contact card, IT Acceptable Use Policy summary, and a personal note from the hiring manager.
Laptop on desk (configured)	IT team delivers to desk	Day One morning	Laptop on desk with power connected. Mouse, keyboard, and external monitor (Band 4+ standard) set up.
Team informed of new joiner arrival	Hiring manager	T-1 working day (team message) and Day One (in-person intro)	Brief Teams or Slack message introducing the new team member — name, role, and start date.
Team lunch or welcome plan	Hiring manager or buddy	T-1 working day	Team lunch or coffee on Day One. Budget: Rs 500 per person, up to 8 people, claimed through expenses.
Remote Day One setup (where applicable)	IT team + HRBP	T-2 working days	Laptop dispatched and confirmed delivered at least 2 working days before Day One. Video call link for Day One welcome sent in advance.

3. Day One Experience — Arrival, Welcome, and Essential Orientation

3.1 Day One Design Principles

Day One is the most important single day in the onboarding calendar. The impressions formed shape the new employee's initial orientation toward the organisation in ways that research shows are disproportionately influential on long-term engagement and retention. The design principle for Day One at Arjun Technologies is that the new employee should leave with three clear feelings: they were expected and prepared for; they understand what the company is and why it matters; and they have a clear picture of what their first week will look like and who is supporting them.

Day One is deliberately not overloaded with administrative tasks. The essential completions — system access, safety induction, and key document signing — are handled efficiently in the morning. The remainder of the day is for orientation, connection, and a first experience of the company culture. An overloaded Day One schedule that leaves the new employee overwhelmed achieves the opposite of its intent — it signals a company that prioritises administrative compliance over human experience.

3.2 Physical and Virtual Arrival Protocols

Stage	Office-Based Day One	Remote Day One	Owner
Arrival (09:00–09:30)	Employee arrives at reception. Name in joiner book. Temporary badge if building card not ready. HRBP or buddy meets at reception.	Employee joins dedicated Day One welcome video call at 09:00 using link sent in advance. HRBP or buddy hosts.	HRBP (office); IT confirms video link (remote).
Welcome (09:30–10:30)	HRBP or buddy takes employee to team area. Introduction to immediate team. Desk confirmed. Welcome pack provided.	HRBP presents virtual welcome pack by screen share. Buddy introduces themselves. Virtual tour of HRMS portal.	HRBP + buddy.
HRBP Orientation (10:30–12:00)	HRBP-led orientation: employment terms summary, key policies, leave and attendance, HRMS navigation, benefits enrolment, key contacts.	Same content via video call with screen share demonstrations.	HRBP.
Lunch (12:00–13:30)	Team lunch arranged by hiring manager or buddy.	Buddy arranges a virtual coffee with 2-3 team members.	Hiring manager / buddy.
IT and Systems Session (13:30–15:00)	IT support desk walk-in for any provisioning issues. Employee completes HRMS self-service setup.	IT virtual help session. Employee completes HRMS self-service.	IT support + employee.
Essential Completions (15:00–16:30)	Code of Conduct acknowledgement, IT Acceptable Use Policy, Employee Handbook receipt, Day One mandatory training modules — all through HRMS.	Same completions through HRMS portal.	Employee (HRMS-guided).
Manager 1-on-1 (16:30–17:30)	30-minute private conversation with reporting manager. First-week schedule presented. Initial expectations discussed.	Video call with reporting manager.	Reporting manager.

3.3 The Day One Welcome Programme — Six Modules

The Day One Welcome Programme is facilitated by the HRBP and covers the foundational orientation content every new employee needs to navigate the company effectively from day one. Its purpose is to give the minimum viable context to function confidently — not to comprehensively cover all aspects of company operations.

Module	Duration	Content	Facilitator
Arjun Technologies at a Glance	20 min	Company history, size, and offices. Business lines and client sectors. Company mission and the individual role in the business model.	HRBP (standardised slide deck updated quarterly by Communications).
Your Employment — Key Terms and Benefits	30 min	Employment type and contract summary. Compensation structure (fixed, variable, ESOP overview). Leave entitlements. Health insurance and benefits enrolment. PF. Key HR contacts.	HRBP (personalised to the specific employee).
HRMS — Your Digital Workplace	30 min	HRMS login and navigation. Key self-service: leave applications, payslips, tax declarations, personal details. The HRMS learning module for mandatory training.	HRBP with live demo.
Working at Arjun Technologies — Culture and Expectations	20 min	Code of Conduct overview — the six values and the four-question ethical framework. Hybrid working model. Communication channels (Teams, Slack, email, Jira, Confluence).	HRBP.
Safety and Security Orientation	20 min	Building safety and fire evacuation. IT security basics — password policy, MFA, phishing awareness. Physical security — access cards, clean desk policy.	HRBP + facilities.
Your Support Network	15 min	Reporting manager and buddy. HRBP contact. IT support. EAP access. Ethics Champion for the team. The Whistleblower hotline at ethics@arjuntech.in.	HRBP.

3.4 Essential Day One Completions — Systems and Acknowledgements

The following items must be completed by the end of the first working day. HRMS tracks completion and alerts the HRBP to any items not completed by end of Day One. Incomplete items are followed up on Day Two — they do not attract disciplinary consequences but must be completed before end of the first week.

Completion Item	How	HRMS Tracking	Consequence if Not Done Day One
Code of Conduct acknowledgement (all 4 segments)	HRMS → Policies and Documents → Code of Conduct → Acknowledge.	Tracked automatically.	HRBP follow-up Day Two. Must complete by end of Week One.
IT Acceptable Use Policy acknowledgement	HRMS → Policies and Documents → IT AUP → Acknowledge.	Tracked automatically.	IT access may be restricted to basic systems until complete.
Employee Handbook receipt confirmation	HRMS → Policies and Documents → Employee Handbook → Confirm Receipt.	Tracked.	HRBP follow-up Day Two.
HRMS personal details self-service (all mandatory fields)	HRMS → My Profile → Personal Details → Complete all fields.	HRMS profile completeness score — alert if below 90%.	Payroll cannot be processed for first cycle until bank details and PAN are confirmed.
Emergency contact information	HRMS → My Profile → Emergency Contacts → Add.	Tracked.	HRBP follow-up Day Two.
MFA setup for company systems	IT session — Google Authenticator or Microsoft Authenticator app. IT-guided.	IT Security tracks MFA enrollment.	System access restricted to non-sensitive systems until MFA enrolled.
Benefits enrolment (health insurance)	HRMS → Benefits → Enrolment → Complete selections.	HRBP monitors.	Health insurance cover may not be active for first month if enrolment not confirmed within 5 working days.
Day One safety induction sign-off	Physical: facilities team walkthrough + sign-off sheet. Remote: online safety module.	Facilities records physical sign-off. HRMS LMS for remote module.	Must complete by end of Week One.

3.5 Manager and Buddy Roles on Day One

Role	Day One Obligations (all mandatory)	HRMS Recording
Reporting Manager	1. Send a personal welcome message before Day One (T-2 days). 2. Be available at start of working day to greet the new joiner. 3. Conduct a 30-minute private 1-on-1 in the afternoon: first-week schedule, initial role expectations, key team relationships, open questions. 4. Confirm the team lunch or welcome plan.	HRMS → Onboarding → Day One Manager Checklist → Confirm completion by 18:00.
Buddy	1. Contact the new joiner before Day One with a personal informal message. 2. Meet at reception or online at Day One start. 3. Accompany to lunch and make introductions. 4. Be available throughout the day for informal questions. 5. Check in at end of Day One.	HRMS → Onboarding → Day One Buddy Checklist → Confirm completion by 18:00.
HRBP	1. Confirm all provisioning is complete before 09:00. 2. Facilitate the Day One orientation programme (Section 3.3). 3. Be available throughout the day. 4. Review HRMS completion status at end of day and follow up on any incomplete items.	HRMS → Onboarding → HRBP Day One Review → Complete end-of-day.

4. First Week Integration Programme

4.1 First-Week Schedule and Objectives by Day

The first week is the transition from arrival to operational engagement. By the end of Week One, the new employee should have a clear understanding of their role and immediate priorities, have met all key stakeholders, have completed all mandatory training, have set up their key working systems, and have begun their first substantive work contribution — however small. A first week that consists entirely of orientation without any genuine work contribution signals that productive engagement is deferred.

Day	Morning Priority	Afternoon Priority	Manager Obligation	Mandatory Completion
Day 1	HRBP orientation programme (Section 3.3). IT and systems setup.	Essential Day One completions (Section 3.4). Manager 1-on-1.	Manager 1-on-1: first-week plan presented.	Code of Conduct. IT AUP. HRMS profile. MFA.
Day 2	Role deep-dive with manager: team structure, current projects, priorities, key clients.	Meetings with key team colleagues. First orientation to primary systems (Jira, GitHub, CRM as applicable).	Manager available for full morning role briefing.	POSH awareness module. Security awareness module.
Day 3	Cross-functional stakeholder meetings — HRBP introduces adjacent teams (Finance, IT, Operations as relevant).	Company business introduction — BU Head or senior manager presents context, current priorities, and market position.	Manager facilitates BU Head introduction.	Data privacy and DPDP Act awareness module.
Day 4	Role-specific onboarding track begins (Section 6). First substantive work contribution assigned.	First individual check-in with buddy (informal). Employee free time for system exploration and self-directed learning.	Manager assigns first genuine, appropriately scoped work task.	Code of Conduct overview refresher module. PMP overview module.
Day 5	First individual check-in with manager (15-minute informal). End-of-week reflection.	Any outstanding mandatory completions. Week 2 plan discussed.	15-minute informal check-in: how is the week going, what do they need, what questions remain.	All mandatory first-week training modules (see Section 4.4). Leave and attendance overview module.

4.2 Team and Stakeholder Introduction Process

Stakeholder Category	Introduction Format	Timeline	Manager Responsibility
Immediate team members	In-person or video team introduction at start of Day One or Day Two. Individual 1-on-1s during Week One where team size permits.	Day One or Day Two.	Manager facilitates team intro. Schedules 1-on-1 slots for direct team members.
Key cross-functional colleagues (Finance, IT, HR, adjacent teams)	HRBP facilitates a cross-functional introduction meeting on Day Three.	Day Three facilitated by HRBP. Employee-driven follow-up in Weeks 2–4.	Manager provides list of key cross-functional contacts and their roles before Day Three.
BU Head or senior leadership	Brief 15-minute introduction meeting on Day Three — welcoming and context-setting, not a performance meeting.	Day Three.	Manager arranges 15-minute slot with BU Head. Briefs BU Head on the new joiner before the meeting.
Key clients (client-facing roles only)	Not in Week One. Planned introduction during Weeks 2–4 once the employee has sufficient role context.	Weeks 2–4.	Manager plans client introduction schedule in the first-week 1-on-1.

Stakeholder Category	Introduction Format	Timeline	Manager Responsibility
CEO and Executive team (Band 6+ joiners only)	Structured senior stakeholder introduction programme — see Section 6.6.	Weeks 1–3.	VP-HR and HRBP facilitate the executive introduction schedule.

4.3 Role Clarity and Initial Goal-Setting

The most common source of first-year underperformance and early attrition is not skill gap — it is role clarity gap. A new employee who does not clearly understand what success looks like in their role, what their priorities are, and how their contribution will be measured cannot make the confident, independent decisions that effective professional work requires. The manager's most important first-week obligation is to close this gap through the first-week 1-on-1.

The first-week 1-on-1 must cover as a minimum: the role's core purpose and primary deliverables; the three most important things to achieve in the first 30 days; the performance expectations for the probationary period and how they will be assessed; the key relationships and dependencies the role requires; and the manager's working style and communication preferences. The formal OKR-setting process is initiated at the 30-day milestone — not in Week One — but the first-week conversation provides the context from which the OKRs will be derived.

4.4 Mandatory First-Week Training Modules

Module	System	Duration	Deadline	Consequence if Overdue
POSH Awareness — Prevention of Sexual Harassment	HRMS LMS	45 min	End of Day Two.	IT access flagged for review. Must complete before any client interaction.
Information Security Awareness — Fundamentals	HRMS LMS	60 min	End of Day Three.	Access to client systems suspended until complete.
Data Privacy and DPDP Act 2023 Awareness	HRMS LMS	45 min	End of Day Three.	Access to personal data systems restricted until complete.
Code of Conduct Overview (refresher of Day One acknowledgement)	HRMS LMS	30 min	End of Day Four.	HRBP follow-up. Must complete within 10 working days.
Performance Management Policy Overview	HRMS LMS	30 min	End of Week One.	HRBP follow-up.
Leave and Attendance Policy Overview	HRMS LMS	30 min	End of Week One.	HRBP follow-up.
Fire Safety and Emergency Procedures (office-specific)	Facilities — physical or video walkthrough	20 min	End of Week One.	Office access card may be restricted until complete.

5. 30-60-90 Day Structured Induction Framework

5.1 Philosophy — Progressive Integration by Design

The 30-60-90 day induction framework is designed on the principle that effective integration happens in stages — different types of support, feedback, and goal-setting are most valuable at different points in the journey. The 30-day milestone is about settling in and confirming understanding. The 60-day milestone is about building contribution. The 90-day milestone is the formal probationary assessment and the beginning of the standard performance management cycle. Each milestone involves a structured conversation documented in HRMS using the Onboarding Milestone Record — not a performance assessment, but a development conversation designed to support the employee's integration and address concerns before they affect performance.

5.2 30-Day Milestone — Settling In, OKR Setting, Initial Assessment

Dimension	Questions to Cover	Documentation	Action if Concern
Role clarity	Does the employee have a clear understanding of their role, priorities, and what success looks like in the first 90 days?	Milestone Record — Role Clarity section.	Manager clarifies expectations in writing in HRMS. Additional context meetings scheduled.
Initial OKR setting	Draft OKRs for the first 90 days developed collaboratively. Linked to team and company priorities. Reviewed by HRBP for quality.	OKRs entered in HRMS by end of 30-day conversation.	HRBP reviews OKR quality. Returns for revision if quality standard not met.
Team integration	Has the employee built effective working relationships with key team members? Are there relationship challenges needing manager attention?	Milestone Record — Integration section.	Manager facilitates any relationship bridge required.
IDP — Initial Development Plan	First IDP created. Development priorities for the probationary period identified. Learning budget access confirmed.	IDP created in HRMS by end of 30-day milestone.	HRBP reviews IDP quality.
Concerns and support needs	Any concerns about the role, team, company, or work? Any support needs not yet addressed?	Manager notes concerns and response in Milestone Record.	HRBP involved where concerns require escalation.
Two-way feedback	Does the manager have concerns about employee progress? Is the manager meeting support obligations? Bidirectional feedback.	Manager records assessment. Employee given opportunity to comment.	Where concerns exist: written feedback with specific improvement areas and support plan. HRBP informed.

5.3 60-Day Milestone — Building Contribution and Confirming Direction

The 60-day milestone is the inflection point of the onboarding journey — where the employee should be transitioning from primarily learning to primarily contributing. The conversation at this milestone is more substantive than the 30-day check-in because there is now a developed evidence base. Any significant concerns that have emerged must be addressed clearly and early enough for the employee to have a genuine opportunity to improve before the 90-day confirmation assessment.

Dimension	Evidence Sources	Manager Assessment Question	Action if Concern
OKR progress	OKR mid-point self-assessment. Manager observation of outputs.	On track to meet 90-day OKRs? If not: why, and what needs to change?	OKR adjustment where external factors warrant. Coaching where performance gap is the cause.
Competency development	Work quality observed. Peer feedback informally gathered.	Demonstrating core competencies expected at band level? Strongest development areas?	Targeted coaching or training for specific gaps. IDP updated.
Client and stakeholder feedback (client-facing roles)	Account manager feedback. Client interaction observations.	Early client interactions meeting standard? What development is needed?	Additional client preparation. Senior colleague pairing.
Cultural integration	Observed behaviours in team and wider settings.	Visibly demonstrating company values? Any conduct concerns?	Conduct concerns addressed via manager conversation and Code of Conduct framework. HRBP for anything beyond minor.
Wellbeing and sustainability	Working patterns. Welfare check.	Managing the transition well? Signs of unsustainable pressure?	EAP referral if appropriate. Workload adjustment if volume is above appropriate new-joiner level.

5.4 90-Day Milestone — Confirmation Review and Forward Plan

Activity	Owner	Content	HRMS Action
Manager assessment against confirmation criteria	Reporting manager	Assessment form covering all four criteria (Section 7.3). Specific evidence required for each. Proposed outcome: Confirm, Extend, or Not Confirm.	HRMS → Onboarding → 90-Day Review → Manager Assessment → Submit.
HRBP review	HRBP	Review for completeness and consistency. Concern cases reviewed with VP-HR.	HRBP records review in HRMS. Escalates concern cases before conversation.
Confirmation conversation	Manager + HRBP (concern cases)	Manager presents assessment. Positive: confirmation letter information. Concern case: specific feedback with extension plan or non-confirmation process.	HRMS → Onboarding → 90-Day Review → Conversation Record → Complete.
Confirmation letter (where confirmed)	HRBP	HRMS-generated confirmation letter. Sent by email. Physical copy on request.	HRMS → Onboarding → Confirmation Letter → Generate → Send. Automated on confirmation decision.
IDP update and first annual OKR initiation	Manager + employee	IDP updated for remainder of performance year. Annual OKR process initiated.	HRMS → Performance → IDP → Update. HRMS → Performance → OKRs → New Year Plan.
Transition to standard performance management	HRBP	Employee exits onboarding programme. Standard PMP cycle begins from confirmation date.	HRMS → Onboarding → Close Onboarding Record → Transition to Active Employee.

5.5 HRMS Onboarding Module — Milestone Tracking

The HRMS Onboarding Module tracks every element of the onboarding journey from offer acceptance to confirmation. Managers access it at HRMS → Onboarding → My Joiners; HRBPs at HRMS → Onboarding → All Joiners. The module generates automated alerts when milestones are approaching, when required completions are overdue, and when an onboarding record has been inactive for more than 10 working days. The VP-HR receives a monthly Onboarding Dashboard report covering completion rates, overdue items, and concern cases across all business units and office locations.

6. Role-Specific Onboarding Tracks

6.1 Engineering and Technology Track

Applies to software engineers, platform engineers, DevOps engineers, QA engineers, and technical architects at Bands 1–6. The track accelerates technical integration — systems knowledge, tooling familiarity, coding standards, and development process context needed to make a productive contribution to a production codebase.

Week / Milestone	Focus	Activities	Completion Marker
Days 1–5	Tool setup and access	IDE configuration. Source code repository access (GitHub). CI/CD pipeline orientation. Cloud platform access (AWS/Azure/GCP per project). Code review platform orientation.	Able to clone, build, and run the primary codebase locally by end of Week One.
Week 2	Architecture orientation	System architecture deep-dive with a senior engineer. Read primary technical design documents. Codebase walkthrough — core modules explained by team lead.	Can describe the high-level architecture and primary technology stack at 30-day check-in.
Week 3	First contribution	First pull request submitted — small, well-defined task selected by manager. Code review process experienced from both sides.	First PR reviewed and merged by end of Week Three.
Day 30 Milestone	Technical integration assessment	Technical check-in with manager and tech lead. Competency in core tools confirmed. First OKRs set — technically specific and measurable.	30-day milestone record complete. Technical OKRs in HRMS.
Days 31–60	Increasing scope	Solo delivery of a defined feature or module. Security training specific to the tech stack (OWASP, secure coding). Client system context where applicable.	Meaningful solo technical contribution delivered and accepted by Day 60.
Days 61–90	Full team integration	Leading a small technical workstream. Participating in sprint planning and retrospectives. Contributing to technical discussions beyond assigned tasks.	Functioning as a full team member in all engineering rituals by Day 90.

6.2 Data Analytics and Machine Learning Track

Applies to data analysts, data scientists, ML engineers, and data engineers. Prioritises data infrastructure access, client data handling protocols, and the ethical responsibilities associated with data work in the Code of Conduct Section 10.4.

Week / Milestone	Focus	Activities	Completion Marker
Days 1–5	Data environment setup	Data platform access (Snowflake, Databricks, BigQuery per environment). Notebook environment setup. Data governance briefing — DPDP Act obligations and client data confidentiality for data roles.	Data environment accessible. DPDP Act data role awareness module complete.
Week 2	Data landscape orientation	Current datasets and data dictionaries reviewed. Existing model inventory reviewed. Data quality and documentation standards explained.	Can independently navigate the primary data environment.
Weeks 3–4	First contribution	First analysis or model task — scope appropriate for a new joiner. Emphasis on documentation and reproducibility standards.	First documented analysis delivered and reviewed.
Day 30 Milestone	Data integration assessment	Technical check-in. Data ethics framework reviewed. OKRs set.	Milestone record complete. Data-specific OKRs in HRMS.

Week / Milestone	Focus	Activities	Completion Marker
Days 31–90	Progressive contribution	Increasing task complexity. Client data project involvement from Day 60 (after BGV completion). Code review and peer model review participation.	Independent data project contribution confirmed at 90-day review.

6.3 Consulting and Client-Facing Track

Applies to business analysts, management consultants, programme managers, and client relationship managers. The critical challenge is client readiness — ensuring the new employee understands client confidentiality obligations, communication standards, and delivery expectations before direct client contact.

Milestone	Focus	Key Activities
Weeks 1–2	Company and practice orientation	Practice area deep-dive. Methodology library reviewed (project frameworks, quality standards). Current client portfolio overview with account managers.
Weeks 2–4	Client observation phase	Attend (observe only) client meetings, workshops, and calls with a senior colleague. No independent client communication in this phase.
Day 30	Client readiness assessment	HRBP and manager assess client readiness: Code of Conduct client provisions, confidentiality obligations, communication standards. OKRs with specific client contribution targets.
Days 31–60	Supervised client contribution	Lead a specific, defined client interaction under senior supervision. Account manager provides structured feedback after each client interaction.
Days 61–90	Independent client contribution	Independent client delivery with manager oversight but not supervision. First client deliverable produced and reviewed by account manager.

6.4 Sales and Account Management Track

Applies to business development managers, account managers, and pre-sales engineers. The track accelerates commercial understanding — service offerings, pricing structures, active client relationships, and the sales process.

Milestone	Focus	Key Activities
Weeks 1–2	Commercial orientation	CRM (Salesforce) access and navigation. Service catalogue reviewed. Current pipeline review with BU sales lead. Commercial model and pricing briefing with Finance.
Weeks 2–4	Client relationship shadowing	Join client calls as an observer. Review existing account plans and CRM records. Sales process methodology training.
Day 30	Commercial readiness assessment	OKRs with specific pipeline and commercial targets. Gift and hospitality register obligations explained in the context of the sales role.
Days 31–60	First independent commercial activity	First independently led prospect meeting or account call. First CRM pipeline update.
Days 61–90	Target contribution	Contributing measurably to pipeline development or account retention. Manager signs off commercial competence at 90-day review.

6.5 Support Functions Track — Finance, HR, Legal, Operations

Milestone	Focus	Key Activities
Weeks 1–2	Systems and process orientation	Function-specific system access (SAP for Finance, HRMS for HR, legal research platforms for Legal). Process documentation reviewed. Cross-functional interaction map created.

Milestone	Focus	Key Activities
Weeks 2–4	Process shadowing and first independent tasks	Shadow a senior colleague on primary functional processes. First independent task by end of Week Two.
Day 30	Function integration assessment	OKRs — specific process mastery milestones and service quality targets. IDP identifies any technical or functional skill gaps.
Days 31–90	Progressive function ownership	Increasingly independent management of defined functional responsibilities. 90-day review confirms readiness to operate as a full function team member.

6.6 Senior Hire Onboarding Track — Band 6 and Above

Senior hires require a distinct approach that recognises their experience while ensuring effective integration into the specific context of Arjun Technologies. They need less role instruction and more context orientation — understanding the landscape they are operating in, building the relationships their role requires, and establishing their leadership presence within the organisation.

Period	Senior Hire Specific Activity	Standard Track Element	Owner
Pre-Day One	CEO or CXO welcome call or meeting arranged before Day One. Organisational context pack prepared by HRBP — strategy documents, org charts, key client list, current priorities.	Standard pre-joining communication at accelerated pace. Equipment provisioned 2 days before joining.	VP-HR manages CEO/CXO introduction.
Day One	CEO or CXO in-person welcome. For Band 7+: CEO introduces directly.	Standard Day One with senior-appropriate customisation.	CEO/CXO for welcome. HRBP for standard schedule.
Week 1	1-on-1 meetings with all direct reports in Week One. BU P&L; and commercial overview with CFO. Strategy session with CEO for Band 7+.	Standard first-week schedule with senior stakeholder substitutions.	CEO/CXO or manager facilitates schedule.
Day 30 Milestone	30-day stakeholder feedback — informal input from direct reports and peers on early integration. Presentation of 30-day impressions to CEO/BU Head.	Standard 30-day milestone with senior additions.	HRBP facilitates stakeholder feedback. CEO/BU Head attends 30-day presentation.
Day 60 Milestone	First substantive leadership outputs expected. Performance against early objectives assessed. Executive coach introduced where available.	Standard 60-day milestone.	Manager and CEO/BU Head for Band 7+.
Day 90 Milestone	Confirmation and forward plan at executive level. Board introduction for Band 7+. First year objectives set.	Standard 90-day confirmation.	VP-HR facilitates with CEO.

7. Probationary Period Management

7.1 Probationary Period Structure and Manager Obligations

The probationary period provisions in this SOP are the operational complement to the legal and policy framework in the Performance Management Policy Segment 4, Section 22. Where the PMP describes the legal framework, rights, and consequences, this section describes the practical management obligations — what the manager must actually do, in what sequence, and how they document it.

Manager Obligation	When	How	HRMS Action
Set clear role expectations in writing	Day One to Week One	First-week 1-on-1. Expectations documented as the basis for 30-day OKRs.	HRMS → Onboarding → Expectations Record → Complete by end of Week One.
Provide regular informal feedback	Weekly throughout probation	Brief, specific, positive and developmental feedback. Documented as a HRMS coaching note at least twice per month.	HRMS → Performance → Feedback → Add Note → Coaching.
Conduct 30-day milestone review	Day 30 (± 3 working days)	Structured conversation per Section 5.2. Documented in HRMS.	HRMS → Onboarding → 30-Day Review → Complete.
Conduct 60-day milestone review	Day 60 (± 3 working days)	Structured conversation per Section 5.3.	HRMS → Onboarding → 60-Day Review → Complete.
Conduct 90-day confirmation review	Day 85–90	Formal confirmation assessment per Section 7.3. HRBP present for concern cases.	HRMS → Onboarding → 90-Day Review → Manager Assessment → Submit.
Consult HRBP immediately if a significant concern arises	As soon as identified	Email or direct call to HRBP. Do not wait for the next milestone.	HRMS → HR Notes → Manager Note → Concern → Description. Shared with HRBP.

7.2 Probationary Review Milestones and Documentation Standards

Every probationary milestone conversation must be documented in HRMS on the day of the conversation or the following working day at latest. The HRMS record is the legal and HR record of the probationary period — it must accurately reflect the conversations that took place, the assessments made, and the feedback communicated. A probationary review not documented in HRMS is, for all practical and legal purposes, a conversation that did not happen.

Documentation must meet four quality standards. It must be specific — citing named projects, dated examples, and described behaviours rather than general impressions. It must be balanced — recording both strengths and development areas. It must be communicated — the employee must receive the documented assessment, which HRMS automatically shares on completion. And it must be honest — a document recording a positive assessment when the manager has undisclosed concerns is worse than no document, because it leaves the employee unable to prepare for a non-confirmation decision they did not see coming.

7.3 Confirmation of Employment — Criteria and Process

Confirmation requires that the employee has met the four criteria described in PMP Segment 4, Section 22.3, reproduced here for operational clarity: performance at or approaching the required standard with a credible improvement trajectory; conduct fully consistent with the Code of Conduct; constructive cultural and team integration; and genuine engagement with development opportunities and feedback during the probationary period. The confirmation decision is the manager's recommendation, endorsed by the HRBP and actioned by HRMS. The confirmation letter is issued within 2 working days of the decision being recorded.

7.4 Probationary Period Extension — Grounds, Process, and Limits

Scenario	Max Extension	Approval	Communication to Employee
Significant sick absence (10+ working days) reducing observable performance window	90 additional days	HRBP approval	Written notification before original 90 days expire. Clearly states this is an extension, not a failure — reason is insufficient observation time.
Specific performance concern that may be addressable	90 additional days	HRBP approval + specific written improvement plan	Written notification with specific improvement expectations and support plan.
Personal circumstance outside employee control (bereavement, family emergency) materially affecting the probationary period	45 additional days	HRBP approval	Written notification with clear, compassionate framing.
BGV not yet complete at 90 days (for restricted system access roles)	30 additional days for BGV completion. Confirmation proceeds once BGV is cleared.	HRBP and Legal	Written notification confirming confirmation is pending BGV only — no performance issue.

7.5 Non-Confirmation — Fair Process Requirements

Non-confirmation of employment is among the most consequential decisions a manager makes. It ends the employment relationship with significant consequences for the individual. The fair process requirements are rigorous and non-negotiable: every element must be satisfied before a non-confirmation can be communicated and implemented.

Requirement	Standard	Consequence of Non-Compliance
Performance concerns clearly communicated in writing before non-confirmation	The employee must have received specific, written feedback about each concern before the decision. HRMS documentation is the evidence.	Non-confirmation based on undocumented concerns creates significant unfair dismissal exposure. Legal review required before proceeding.
Genuine opportunity to improve	Employee must have been given a reasonable period with support to address concerns.	HRBP documents support provided and the improvement period. Without this: non-confirmation process is non-compliant.
HRBP review and endorsement	HRBP must review and endorse the non-confirmation recommendation before it is communicated.	HRBP not involved = non-compliant. Invalid decision.
Legal team consultation	Legal must be consulted where a health condition, pregnancy, or other protected characteristic may be a factor.	Not consulted = significant discrimination liability.
Written notice with reasons	Employee must receive written notice with specific reasons and the applicable statutory notice or payment in lieu.	Verbal non-confirmation without written follow-up does not meet procedural standard.
Notice entitlement	Applicable statutory notice period confirmed by Legal for the relevant state SE Act must be provided or payment made in lieu.	Failure to provide correct notice = wrongful termination exposure.

8. Campus Hire and Graduate Trainee Onboarding

8.1 Campus Hire Cohort Onboarding Model

Campus hires — graduates joining through the company annual campus recruitment programme — present a specific onboarding opportunity and challenge. Unlike experienced lateral hires, they are typically joining a professional organisation for the first time, without prior context for corporate culture, professional norms, or the specific expectations of client-facing technology services work. The onboarding programme for campus hires is therefore more intensive in its professional foundation-building dimension — not just orienting them to Arjun Technologies, but introducing them to professional working life as the company expects to practise it.

Where 10 or more campus hires join in the same cohort (which is typical of the company major annual campus recruitment cycle in July), the onboarding is delivered in cohort format for the first two weeks — a structured programme delivered jointly by HRBP Operations, senior technical leads, and client-facing team members from across the company. The cohort format creates peer bonds, provides a consistent foundational experience, and allows subject matter experts to address the whole cohort rather than repeating content one-on-one across thirty or more simultaneous new joiners.

Cohort Week	Focus	Content	Facilitators	Completion Marker
Week 1	Company and professional foundation	Company overview, mission, and values. Client sectors and the technology services model. Professional communication standards. Code of Conduct deep-dive — ethics in a professional services context. All Day One completions as a cohort.	VP-HR, Head of People Development, Ethics Champions.	All Day One completions confirmed. Code of Conduct acknowledgement. POSH awareness.
Week 2	Technical and professional skills	Core technical tooling for the role family (each role family in parallel tracks). Client communication and presentation skills workshop. Consulting and problem-solving methodology introduction. Team project exercise delivered to simulated internal client.	Technical leads per role family. Senior consultant facilitators.	Technical tooling setup complete. Cohort project exercise presented and debriefed.
Week 3 onwards	Role-specific track	Individual assignment to team and reporting manager. Role-specific onboarding track per Section 6 commences. 30-60-90 day induction framework applies from Week 3 as "Day One" for milestone counting.	Reporting manager + buddy (assigned at cohort start).	30-day milestone conversation scheduled. OKRs drafted in first 1-on-1 with manager.

8.2 Graduate Trainee Programme — 12-Month Structured Development

Graduate trainees on the company 12-month structured programme follow a more intensive development-oriented track than standard permanent joiners. The programme is designed to build a strong technical and professional foundation through a combination of project rotations, structured mentoring, formal learning, and progressive responsibility.

Programme Phase	Duration	Primary Objectives	Assessment
Phase 1 — Foundation	Months 1–3	Complete cohort onboarding. Establish technical baseline. First project assignment with supervised contribution. IDP created with learning objectives for the full programme.	30-day and 90-day onboarding milestones per standard SOP. Supervisor assessment at end of Phase 1.

Programme Phase	Duration	Primary Objectives	Assessment
Phase 2 — Development	Months 4–8	Project rotation (2 rotations of approximately 2 months each). Technical skill deepening per IDP. Client exposure with supervision. Mandatory learning programme (minimum 5 courses from the HRMS catalogue).	Rotation supervisor assessments. Learning module completion tracked in HRMS. Mid-programme performance review at Month 6.
Phase 3 — Integration	Months 9–12	Lead a defined work stream independently. Client interaction without supervision. Formal presentation of programme learnings and project contributions at Month 12 review.	Programme-end assessment by programme manager and supervisors. PPO decision per PMP Segment 4, Section 17.3.

9. The Buddy Programme — Obligations and Standards

9.1 The Purpose and Selection of the Buddy

The buddy is the informal complement to the manager in the onboarding experience — the person the new employee can ask the questions they might hesitate to ask the manager, who can help them navigate the informal aspects of the workplace that no formal orientation covers: where to eat lunch, how meetings actually work in this team, who the go-to person is for a particular type of technical problem, what the real norms are around working hours and communication. The buddy relationship should feel genuinely supportive — not a formal obligation executed reluctantly — and the selection of the right buddy for each new joiner is therefore important.

Buddy Selection Criteria	Standard	Notes
Band level	Same band or one band above the new joiner. Not their direct manager.	A buddy who is too senior may recreate the formality of the manager relationship. A buddy who is junior to the new joiner may not have the context to help effectively.
Role proximity	Same role family where possible, or a closely adjacent role family.	A buddy who understands the technical demands of the role can give more relevant informal guidance.
Team location	Same office location where possible. Same time zone for remote arrangements.	Buddy effectiveness depends on availability. A buddy in a different time zone is significantly less able to provide same-day informal support.
Availability	Buddy must have confirmed capacity to invest approximately 2–3 hours per week in buddy activities during the first 30 days, reducing to ad-hoc contact thereafter.	Assigning a buddy who is on a critical deadline in the first month of the new joiner tenure undermines the programme.
Voluntariness	Buddy participation should be voluntary and enthusiastic. Mandating a reluctant buddy is counterproductive.	HRBP maintains a buddy volunteer register. Employees who wish to be buddies register their interest in HRMS.
Experience	Minimum 1 year at the company. Deep enough familiarity with company culture and systems to provide meaningful guidance.	New joiners from previous intakes make excellent buddies — their own recent experience makes their advice particularly relevant.

9.2 Buddy Obligations — The 90-Day Commitment

Period	Required Buddy Activity	Approximate Time Commitment	HRMS Recording
Pre-joining (T-7 days)	Send a personal, warm, informal welcome message to the new joiner. Offer to answer any informal questions about the company, team, or location before they join.	30 minutes	HRMS → Onboarding → Buddy → Pre-Join Contact → Confirm.

Period	Required Buddy Activity	Approximate Time Commitment	HRMS Recording
Day One	Meet the new joiner at reception or join the Day One video call. Accompany to team introduction and lunch. Be available throughout the day for informal questions. Check in at end of Day One.	Half-day	HRMS → Onboarding → Day One Buddy Checklist → Confirm.
Week One	Daily brief informal check-in. Answer questions as they arise. Introduce the new joiner to colleagues the buddy knows who may be useful to them. Share cultural navigation tips.	30 minutes/day	Not required — informal contact only.
Days 8–30	Weekly informal coffee or chat (in person or video). At least one shared lunch or team social event. Flag to HRBP if any concerns about the new joiner integration arise.	1–2 hours/week	HRMS → Onboarding → Buddy → Week 2-4 Activity → Confirm monthly.
Days 31–60	Bi-weekly informal contact. Be available for ad-hoc questions. Check in after the 30-day milestone conversation — how did it go?	30–60 minutes/week	Ad-hoc. No formal recording required.
Days 61–90	Monthly informal check-in. Buddy relationship naturally fades in intensity as the new joiner becomes integrated.	As needed	No formal recording.

10. Common Onboarding Scenarios — Guidance for Managers and HRBPs

The following scenarios address the onboarding situations most frequently escalated to HR Business Partners. Each applies the provisions of this SOP to a specific fact pattern.

Scenario	Facts	Correct Action and SOP Basis
1 — IT not ready on Day One	A new engineer joins and their laptop is not configured. They cannot access email, HRMS, or any company systems.	The HRBP and hiring manager should have confirmed IT provisioning status 2 days before Day One (Section 2.5 T-2 standard). If provisioning has failed, IT Security is contacted immediately. The IT team provides a loan device or arranges guest access for the day while the primary device is completed. The Day One schedule proceeds with the HRBP-led orientation content that does not require system access in the morning. IT SLA failure is logged and reviewed with the Head of IT.
2 — Manager absent on Day One	The new joiner arrives on Day One and their reporting manager is unexpectedly absent due to illness.	The manager must have set up a delegate for Day One coverage and communicated this to the HRBP in advance. If the absence is genuinely unexpected, the HRBP identifies a senior team member to cover the Day One 1-on-1 as a stand-in. The manager contacts the new joiner directly (by call or message) to welcome them personally, even from absence. The manager reschedules the first-week role briefing conversation as a priority on return. The Day One buddy role becomes even more important in this scenario. (Section 3.5.)

Scenario	Facts	Correct Action and SOP Basis
3 — New joiner discloses a disability or health condition during pre-joining	A new joiner discloses during the pre-joining documentation process that they have a physical disability that will require adjustments to their workspace.	The HRBP acknowledges the disclosure promptly and warmly. The Disability and Reasonable Adjustment Policy (referenced in the Code of Conduct Section 9.4) is initiated. The HRBP and facilities team co-ordinate the required adjustments before Day One. The adjustments are in place before the employee arrives — they should not arrive to a workplace that has not been adapted. The hiring manager is informed of the adjustments needed (not the specific diagnosis). (Code of Conduct Section 9.4 and Data Privacy Policy SPDI provisions.)
4 — BGV returns a material discrepancy before Day One	The BGV partner notifies the HRBP 3 days before the joining date that a significant BGV discrepancy has been identified — a qualification claimed in the CV cannot be verified.	The HRBP and Legal team are notified immediately. The joining date is placed on hold while the discrepancy is investigated. The candidate is contacted and given the opportunity to respond to the specific discrepancy before any decision is made. Legal team advises on whether the offer should be withdrawn, deferred, or whether the employee should join while investigation continues. The decision is documented in writing. (Section 2.3.)
5 — New joiner struggles at 30-day milestone — concern raised	At the 30-day review, the manager has documented specific concerns: the new joiner is not meeting the role clarity expectations, has made several process errors, and has had difficulty integrating with the team.	The manager and HRBP have the 30-day conversation in person with the HRBP present (given the concern level). The specific concerns are described with evidence, not general impressions. A specific improvement plan is documented — not a formal PIP (the probationary improvement plan is less formal and more coaching-focused than a confirmed-employee PIP), but a written document with specific expected improvements, support to be provided, and the timeline before the 60-day review. The employee receives this document and signs to confirm receipt. The HRBP monitors fortnightly. (Section 5.2 and PMP Segment 4, Section 22.2.)
6 — Employee resigns during probation	A Band 2 employee who joined 45 days ago resigns, stating that the role is different from what was described in the interview process.	The HRBP conducts a brief exit conversation to understand whether the role description issue is genuine and whether any onboarding quality concerns are indicated. The resignation is accepted in accordance with the contractual notice period (typically shorter during probation). The Full and Final Settlement is processed. The HRBP records the exit reason and the departure is flagged in the monthly Onboarding Dashboard for the VP-HR to review as a potential onboarding quality signal. (Offboarding SOP in Segment 2.)

11. HRMS Onboarding Module — Complete Quick Reference

The HRMS Onboarding Module tracks every element of the onboarding journey from offer acceptance to confirmation. The following quick reference covers all key HRMS actions for managers, buddies, HRBPs, and employees. For full documentation: HRMS Help Centre at hrms.arjuntech.in/help → Onboarding.

Action	Who	Navigation Path	When	Notes
View my team joiners and their onboarding status	Manager	HRMS → Onboarding → My Joiners	Anytime — dashboard shows milestone status and completion rates for each active joiner.	Dashboard shows overdue items highlighted in amber/red.
Confirm Day One manager checklist completion	Manager	HRMS → Onboarding → [Employee Name] → Day One Manager Checklist → Mark Complete	By 18:00 on Day One.	Must confirm each obligation individually. Partial completion flagged to HRBP.
Complete 30-day milestone record	Manager	HRMS → Onboarding → [Employee Name] → 30-Day Review → Complete → Submit	On day 30 (± 3 working days). HRMS sends automated reminder at day 27.	Employee automatically receives a copy on submission. Cannot be backdated more than 3 working days.
Complete 60-day milestone record	Manager	HRMS → Onboarding → [Employee Name] → 60-Day Review → Complete → Submit	On day 60 (± 3 working days).	Same as 30-day record.
Submit 90-day confirmation assessment	Manager	HRMS → Onboarding → [Employee Name] → 90-Day Review → Manager Assessment → Submit	On day 85–90.	Manager submits recommendation (Confirm/Extend/Not Confirm). HRBP reviews before letter is generated.
View team training completion status	Manager	HRMS → My Team → Training → Completion Report → Filter by: Onboarding Mandatory	Weekly during first month.	Identifies team members with overdue mandatory modules.
Confirm buddy Day One checklist	Buddy	HRMS → Onboarding → My Buddy → [Employee Name] → Day One Checklist → Mark Complete	By 18:00 on Day One.	Buddy receives assignment notification at T-7 days.
Register interest in being a buddy	Any employee	HRMS → My Profile → Development → Buddy Volunteer Register → Add Interest	Anytime.	HRBP uses this register when assigning buddies for new joiners.
View all team onboarding across BU (HRBP)	HRBP	HRMS → Onboarding → All Joiners → Filter by BU	Weekly HRBP review.	Shows all active onboarding records. Overdue milestones flagged. Concern cases highlighted.
Trigger confirmation letter	HRBP	HRMS → Onboarding → [Employee Name] → 90-Day Review → Approve and Generate Letter	After reviewing manager assessment and endorsing confirmation.	Letter auto-generated with company standard template. Sent by email to company address. Employee notified.
Record onboarding concern note	Manager or HRBP	HRMS → Onboarding → [Employee Name] → Concern Note → Add	As soon as any concern is identified.	Shared with HRBP automatically. Creates a documented trail for probationary management.

Action	Who	Navigation Path	When	Notes
Close onboarding record at confirmation	HRBP	HRMS → Onboarding → [Employee Name] → Close Onboarding → Transition to Active Employee	After confirmation letter is sent.	Employee moves to standard PMP cycle from this date. Onboarding record archived.

12. Onboarding Compliance and Quality Metrics

The following metrics are monitored by the HRBP Operations team to ensure onboarding quality and SOP compliance. Results are reported monthly to the VP-HR and quarterly to BU Heads. Poor onboarding quality in a business unit is addressed through manager coaching, not through ignoring the data.

Metric	Definition	Target	Action if Below Target
Day One provisioning readiness	% of new joiners for whom all IT provisioning (laptop, email, core system access) was confirmed ready before 09:00 on Day One.	95% or above.	IT provisioning failures investigated within 48 hours. Root cause addressed. Repeated failures reported to Head of IT.
Day One checklist completion rate	% of new joiners for whom both the manager Day One checklist and buddy Day One checklist were completed by 18:00 on Day One.	90% or above.	HRBPs follow up with non-compliant managers and buddies. Repeated non-compliance addressed in manager performance conversation.
30-day milestone completion timeliness	% of 30-day milestone records completed within the required window (day 27–33).	95% or above.	HRBP escalates overdue milestones within 5 working days. Manager coached on milestone importance.
60-day milestone completion timeliness	% of 60-day milestone records completed within the required window.	95% or above.	Same as 30-day.
Mandatory first-week training completion by Day 10	% of new joiners who have completed all 7 mandatory first-week training modules by the end of their second working week.	95% or above.	HRBP follows up with employee and manager. Training access confirmed functional.
90-day confirmation rate	% of new joiners reaching 90 days who are confirmed without extension or non-confirmation.	85% or above (a healthy confirmation rate for a well-functioning recruitment and onboarding process).	Confirmation rates below 85% suggest either recruitment quality issues or onboarding quality issues. HRBP and BU Head investigate.
Early attrition (departure within 6 months of joining)	% of joiners who resign or are separated within 6 months of their joining date.	Below 5% across all bands.	Exit interviews reviewed for onboarding quality signals. Patterns escalated to VP-HR.
New joiner NPS — 30-day pulse survey	Net Promoter Score from a brief 5-question pulse survey sent to all new joiners at Day 30.	NPS above +40.	Scores below +40 trigger a review of the onboarding experience quality for that cohort and business unit.

Manager Onboarding Quality Self-Assessment Checklist

Obligation	Self-Check	If No — Required Action
IT provisioning confirmed ready before Day One	Did I confirm IT provisioning readiness with the IT team at T-2 days for my last new joiner?	Contact IT team at T-10 days for future joiners. Confirm readiness explicitly at T-2.
Personal welcome before Day One	Did I send a personal welcome message to my last new joiner at T-2 days?	Build this into calendar as a recurring action whenever a new team member is joining.

Obligation	Self-Check	If No — Required Action
Day One 1-on-1 conducted and documented	Did I complete a 30-minute 1-on-1 with my last new joiner on Day One and document it in HRMS?	Complete the HRMS Day One Manager Checklist for any outstanding record. Do not skip the 1-on-1 for future joiners.
First-week training completion monitored	Did I review my new joiner mandatory training completion status at end of Week One?	Check HRMS → My Team → Training → Completion Report for any outstanding modules.
30-day milestone conversation completed on time	Did I complete my last new joiner 30-day milestone record within the required window?	Review any overdue records with HRBP. Complete and document before the 60-day milestone.
Specific, written feedback provided at each milestone	Did my last milestone documentation include specific, evidenced, and balanced feedback — not general impressions?	Review the documentation quality standard in Section 7.2. Revise documentation where it does not meet the standard.
Buddy assigned before Day One	Did I co-ordinate with the HRBP to ensure a buddy was assigned and had contacted the new joiner before Day One?	Confirm buddy assignment at T-7 days as part of the standard pre-joining checklist.
HRBP consulted when concern arose	If I identified a concern during the probationary period, did I contact the HRBP immediately rather than waiting for the next milestone?	HRBP contact details in HRMS. Any concern warrants immediate HRBP consultation — do not manage in isolation.

13. Remote and Hybrid Onboarding — Extended Provisions

13.1 Remote Day One — Additional Standards

Remote Day One onboarding requires deliberate additional investment from the manager, buddy, and HRBP to compensate for the absence of the physical signals that communicate organisational care — the prepared desk, the team that turns to greet you, the lunch invitation. A remote Day One without active effort from the welcome team is an isolating experience. The following standards are required for every remote Day One.

Standard	Requirement	Owner	Common Failure Mode
Equipment confirmed delivered	Laptop and peripherals must be confirmed delivered and functioning at least 2 working days before Day One. IT confirms directly with the employee by phone or WhatsApp.	IT team (delivery confirmation). Employee (functionality confirmation).	Laptop delivered but not functioning. Employee unable to get help before Day One. Mitigation: IT provides personal IT support contact number for the day before.
Day One video call is scheduled and link sent	A dedicated Day One welcome video call is scheduled and the link is sent at least 3 working days in advance. Not embedded in an email sent on Day One morning.	HRBP	Employee cannot find the call link. Day One starts late. Mitigation: Link sent with T-2 day logistics email and pinned in the team messaging channel.
Virtual welcome pack delivered digitally	A digital welcome pack is sent by email before Day One — links to all relevant HRMS portals, the company intranet, the team channel, key contacts, and a personal note from the hiring manager.	HRBP prepares; hiring manager writes personal note.	Generic welcome email with no personal element. Employee feels they are processing admin, not joining a team. Mitigation: Manager personal note is mandatory, not optional.
Buddy available all day on Day One	The buddy commits to being available on messaging throughout Day One for any question, however small. They check in proactively at least three times during the day.	Buddy	Buddy responds only to direct messages, does not proactively reach out. Remote new joiner has no natural way to ask informal questions. Mitigation: Buddy sets a calendar reminder every 2 hours on Day One.
Manager video check-in at end of Day One	Manager schedules a 15-minute video call at 16:30-17:00 on Day One — how was it, do you have everything you need, what questions came up.	Reporting manager	Manager defers to "we will catch up tomorrow". Day One ends without personal managerial acknowledgement. Mitigation: 16:30 Day One manager call is mandatory and non-negotiable.

13.2 Building Connection in a Hybrid Team

A new joiner in a hybrid team — where some colleagues are in the office and some are remote on any given day — faces a specific integration challenge: the informal bonding that happens naturally in a fully co-located team does not happen automatically in a hybrid environment. The manager has a specific obligation in the first 30 days to actively create connection opportunities for the new joiner that the environment does not create by itself.

Connection Activity	Description	Timing	Owner
In-office Day One requirement	New joiners must have their Day One in the office regardless of their standard hybrid pattern, unless they are in a fully remote role. First physical meeting with the team is a non-negotiable onboarding standard.	Day One.	HRBP confirms with hiring manager before joining date. Joining date selected to avoid clash with major office events.

Connection Activity	Description	Timing	Owner
Weekly in-office anchor day in first 30 days	New joiners attend the office on the team anchor day each week for their first 30 days. The team anchor day is the day most of the team is in-office.	Weekly, Days 1–30.	Manager communicates team anchor day to new joiner at the first-week 1-on-1.
Virtual coffee roulette	In the first 30 days, the HRBP signs the new joiner up for the company virtual coffee roulette programme — a random weekly pairing with a colleague from a different team for an informal 20-minute conversation.	Started in Week Two.	HRBP initiates at Day 8.
Team social event in first 30 days	Where possible, the team schedules a social event (lunch, team outing, or virtual social activity) in the first 30 days that includes the new joiner.	Days 14–30.	Hiring manager organises. Budget available per the standard team social guidelines.
Introduction to the Ethics Champion	The HRBP introduces the new joiner to their team or BU Ethics Champion — both in person and by message — within the first week.	Week One.	HRBP.

14. Pre-Joining and Day One Master Checklist — Manager Reference

This checklist consolidates all manager pre-joining and Day One obligations into a single reference. Print or save to your HRMS dashboard for each new joiner. All items are mandatory. HRMS tracks completion for items that have an HRMS action — the remaining items are the manager personal obligation.

Timing	Action	HRMS Action Required?	Done?
T-10 working days	Submit IT provisioning request to HRMS for the new joiner (laptop, email, role-specific systems).	Yes — HRMS → Onboarding → Provisioning Request	● Yes ● No
T-7 working days	Confirm buddy assignment with HRBP. Ensure buddy has contacted the new joiner.	HRBP action — confirm buddy assignment in HRMS.	● Yes ● No
T-5 working days	Confirm team know the new joiner is joining. Send team introduction message (Teams/Slack).	No	● Yes ● No
T-2 working days	Send personal welcome message to the new joiner. Check that workspace is ready.	No — direct message or email	● Yes ● No
T-2 working days	Confirm IT provisioning is ready (laptop, access). Contact IT team if anything is outstanding.	No — direct check with IT team	● Yes ● No
T-1 working day	Confirm Day One lunch or welcome plan. Brief senior colleagues who will meet the new joiner.	No	● Yes ● No
Day One (09:00)	Be present at start of day to personally greet the new joiner (or join the Day One video call).	No	● Yes ● No
Day One (16:30)	Conduct 30-minute private 1-on-1: first-week schedule, role expectations, key relationships.	HRMS → Onboarding → Day One Manager Checklist → Mark Complete by 18:00	● Yes ● No
Day Two (morning)	Conduct role deep-dive session: team structure, current projects, priorities, key clients.	No	● Yes ● No
Day Three (afternoon)	Facilitate brief 15-minute introduction meeting between new joiner and BU Head or senior leader.	No	● Yes ● No

Timing	Action	HRMS Action Required?	Done?
Day Four (any time)	Assign first substantive work task — appropriately scoped for a new joiner in their first week.	No	● Yes ● No
Day Five (end of day)	Conduct 15-minute informal end-of-week check-in. How was the week? What do they need?	No	● Yes ● No
End of Week One	Confirm all mandatory training modules have been completed in HRMS LMS.	HRMS → My Team → Training → Completion Report	● Yes ● No
Day 27–30	Schedule and conduct 30-day milestone conversation. Complete HRMS record same day.	HRMS → Onboarding → 30-Day Review → Complete	● Yes ● No
Day 57–60	Schedule and conduct 60-day milestone conversation. Complete HRMS record same day.	HRMS → Onboarding → 60-Day Review → Complete	● Yes ● No
Day 85–90	Schedule and conduct 90-day confirmation review. Submit manager assessment to HRMS. HRBP present for any concern case.	HRMS → Onboarding → 90-Day Review → Manager Assessment → Submit	● Yes ● No

Segment 1 Summary and Continuation to Segment 2

This completes Segment 1 of the Arjun Technologies Pvt. Ltd. Onboarding and Offboarding Standard Operating Procedures, Version 2.3. Segment 1 has established the complete onboarding journey from offer acceptance to confirmation of employment. Section 1 set the purpose, scope (including a six-category scope table), governance framework, and policy relationships. Section 2 covered the full pre-joining process: the six-step offer issuance and acceptance workflow, the seven-touchpoint pre-joining communication timeline, the background verification process with full DPDP Act 2023 consent framework, the pre-joining documentation table with retention periods, the IT provisioning SLA table with band-specific equipment standards, and the workspace and facilities readiness checklist. Section 3 described the complete Day One experience: office and remote arrival protocols, the six-module Welcome Programme with durations and facilitators, the eight-item essential completions table, and the mandatory roles and obligations of manager and buddy on Day One. Section 4 established the first-week integration programme: the day-by-day schedule across five days, the structured stakeholder introduction process, role clarity obligations, and the seven mandatory training modules with completion deadlines and consequences. Section 5 provided the complete 30-60-90 day induction framework with structured conversation guides for each milestone. Section 6 delivered the six role-specific onboarding tracks: Engineering and Technology, Data Analytics and Machine Learning, Consulting and Client-Facing, Sales and Account Management, Support Functions, and Senior Hire (Band 6+). Section 7 addressed the probationary period management framework: the manager obligations schedule, documentation quality standards, the four confirmation criteria, the four-scenario extension provisions, and the six-requirement non-confirmation fair process framework aligned with PMP Segment 4, Section 22.3.

Segment	Sections	Key Topics	Pages	Status
Segment 1 — This Document	1–7	Purpose and Scope · Pre-Joining (Offer, Communication Timeline, BGV, Documentation, IT Provisioning, Workspace) · Day One Experience (Welcome Programme, Completions, Manager/Buddy Roles) · First Week (Day-by-Day Schedule, Introductions, Role Clarity, Training) · 30-60-90 Day Induction · Six Role-Specific Tracks · Probationary Period Management	1–40	Published April 2024
Segment 2	8–14 + Appendices A–G	Offboarding SOP (4 streams: voluntary, redundancy, retirement, involuntary) · Internal Transfer and Promotion Onboarding Addendum · Manager and Buddy Obligations Guide · HRMS Administration · Compliance and Audit · Common Scenarios · All Checklists, Forms, and Templates	41–80	Published April 2024

All segments available on the HRMS portal under Policies and Documents. For onboarding queries contact hr@arjuntech.in or your HRBP directly. For IT provisioning issues: itsupport@arjuntech.in or extension 1000. For anonymous reporting of concerns about onboarding quality: ethics@arjuntech.in (24/7). Document reference: HR-OBS-001-v2.3. Owner: Ms. Priya Menon, VP Human Resources. Approved: Mr. Rajesh Arjun, CEO. Effective: 01 April 2024.

Onboarding Programme — At a Glance Summary for All Stakeholders

Stakeholder	Key Responsibilities in Segment 1	Critical Deadlines	HRMS Module
Reporting Manager	Send personal welcome (T-2). Be present Day One. Conduct Day One 1-on-1. Assign first work task (Day 4). Conduct weekly check-ins. Complete 30/60/90-day milestone records. Consult HRBP on concerns immediately.	Day One manager checklist by 18:00. 30-day record by Day 33. 60-day by Day 63. 90-day assessment by Day 90.	HRMS → Onboarding → My Joiners

Stakeholder	Key Responsibilities in Segment 1	Critical Deadlines	HRMS Module
HR Business Partner	Manage offer process and pre-joining portal. Co-ordinate BGV. Assign buddy. Facilitate Day One orientation programme. Monitor HRMS onboarding dashboard. Review milestone records. Manage concern cases. Trigger confirmation letters.	Pre-joining portal live on acceptance. IT request at T-10. Buddy assigned by T-7. Day One completion review by 18:00.	HRMS → Onboarding → All Joiners
Buddy	Send personal welcome at T-7. Be present Day One. Daily informal support in Week One. Weekly contact Days 8–30. Be available for questions. Flag concerns to HRBP.	Welcome message by T-7. Day One buddy checklist by 18:00. Monthly activity confirmation.	HRMS → Onboarding → My Buddy
IT Security / Head of IT	Complete laptop provisioning and configuration within 5 working days of HRBP request. Confirm readiness at T-2. Provide IT support on Day One. Provision role-specific systems within 5 working days.	All provisioning complete by T-0 (morning of Day One). Confirmation to HRBP at T-2.	HRMS → IT → Provisioning Requests
New Employee	Complete all pre-joining documentation in the portal. Complete Day One essential completions. Complete all mandatory first-week training by Day 10. Engage with milestone conversations. Raise any concerns with manager or HRBP promptly.	Pre-joining documentation by T-5. All Day One completions by 17:00. Mandatory training by Day 10.	HRMS → Onboarding → My Onboarding
Facilities Team	Prepare desk, locker, and welcome pack by T-2. Ensure building access card is ready by Day One. Arrange safety induction in first week.	Desk ready by T-2. Access card ready by Day One.	Not HRMS-tracked — Facilities internal process.

Segment 1 Version History — Key Changes by Section

Section	v2.0 (Jan 2019)	v2.1 (Aug 2020)	v2.2 (Mar 2022)	v2.3 (Apr 2024) — Current
Section 2 — Pre-Joining	Standard pre-joining checklist. Basic BGV provisions.	Remote pre-joining added. Virtual pre-joining portal introduced.	Digital identity checks added to BGV. HRMS pre-joining module guide added.	DPDP Act 2023 consent framework fully integrated into BGV and documentation provisions.
Section 3 — Day One	Office-based Day One only. Six-module Welcome Programme.	Remote Day One protocol added. Virtual welcome kit provisions.	Permanent hybrid Day One model. Equal standard for office and remote.	No material change from v2.2. Minor clarification of HRMS completion tracking.
Section 4 — First Week	Basic first-week schedule. Informal stakeholder introductions.	Remote first-week provisions. Virtual stakeholder introduction guidance.	Structured day-by-day schedule introduced. Training completion deadlines formalised.	No material change. Cloud-native tool references updated in mandatory training.
Section 5 — 30-60-90 Day Induction	Basic 30-60-90 framework introduced in this version.	Remote milestone conversation guidance added.	HRMS milestone tracking module introduced.	Aligned with PMP Segment 4, Section 22. New joiner NPS survey at 30-day added.
Section 6 — Role-Specific Tracks	Engineering and Consulting tracks only.	Data Analytics and ML track added.	Sales and Support Functions tracks added.	Senior Hire track (Band 6+) added. All tracks updated for cloud-native tooling.
Section 7 — Probation	Basic probationary review obligations.	Remote probationary review guidance.	Four confirmation criteria formalised. Extension provisions documented.	Full alignment with PMP Segment 4, Section 22.3. Non-confirmation fair process requirements expanded.

Section	v2.0 (Jan 2019)	v2.1 (Aug 2020)	v2.2 (Mar 2022)	v2.3 (Apr 2024) — Current
New in v2.3	—	—	—	Campus hire and graduate trainee cohort onboarding model (Section 8). Buddy programme obligations (Section 9). Remote and hybrid onboarding extended provisions (Section 13). Master manager checklist (Section 14).

Segment 2 (Pages 41–80) covers the Offboarding SOP across four separation streams, the Internal Transfer and Promotion Onboarding Addendum, the complete Manager and Buddy Obligations Guide, HRMS onboarding/offboarding administration, compliance and audit provisions, and all appendices (checklists, forms, and templates). Both segments are available on the HRMS portal under Policies and Documents.

ONBOARDING AND OFFBOARDING STANDARD OPERATING PROCEDURES

Segment 2 of 2 — Offboarding SOP · Internal Transfer and Promotion Addendum · Manager and Buddy Obligations Guide · HRMS Administration · Compliance and Audit · Appendices A–G

Version	2.3	**Effective Date**	01 April 2024
Review Date	31 March 2025	**Classification**	Internal Use Only
Approved By	Mr. Rajesh Arjun	**Document Owner**	Ms. Priya Menon
Doc Reference	HR-OBS-001-v2.3	**Segment**	2 of 2 (Pages 41–80)

This is Segment 2 of the Arjun Technologies Pvt. Ltd. Onboarding and Offboarding Standard Operating Procedures, Version 2.3. It covers the complete offboarding process across four separation streams (voluntary resignation, redundancy, retirement, and involuntary separation), the internal transfer and promotion onboarding addendum, the Manager and Buddy Obligations Guide, HRMS administration, compliance and audit provisions, and all appendices. Segment 1 (Pages 1–40) covers the complete onboarding SOP from offer acceptance through the 90-day probationary period.

Table of Contents — Segment 2

SEGMENT 2 — This Document (Pages 41–80)

Section 8 — Offboarding SOP: Four Separation Streams

8.1 Offboarding Design Principles and Scope

8.2 Stream 1 — Voluntary Resignation

8.3 Stream 2 — Redundancy and Restructuring

8.4 Stream 3 — Retirement

8.5 Stream 4 — Involuntary Separation

8.6 Full and Final Settlement — All Streams

8.7 Exit Interview Process and Knowledge Transfer

Section 9 — Internal Transfer and Promotion Onboarding Addendum

9.1 Internal Transfer Principles

9.2 Lateral Transfer Onboarding Process

9.3 Promotion Onboarding Process

Section 10 — Manager and Buddy Obligations Guide

10.1 Manager Obligations — Complete Reference

10.2 Buddy Programme — Complete Obligations Reference

Section 11 — HRMS Administration — Onboarding and Offboarding

11.1 HRMS Offboarding Module — Complete Reference

11.2 Data Retention and Deletion Schedule

Section 12 — Compliance, Audit, and Escalation

12.1 Compliance Framework and Audit Schedule

12.2 Escalation Pathways

Section 13 — Common Offboarding Scenarios

Section 14 — Appendices A–G

8. Offboarding SOP — Four Separation Streams

8.1 Offboarding Design Principles and Scope

Offboarding is the final chapter of the employment relationship. Its quality has consequences that extend far beyond the individual's last day: an employee who leaves with their contributions acknowledged, their transition professionally managed, and their Full and Final Settlement processed promptly becomes an ambassador. An employee whose offboarding was careless — accounts not closed, clearance not completed, settlement delayed — carries that experience into the market and into every future interaction with the company's clients, candidates, and partners.

At Arjun Technologies, offboarding is not an administrative checklist to be executed minimally. It is a structured, human process that respects the employment relationship that is ending, protects the company's interests, and creates the conditions for a positive long-term relationship with former employees.

Scope — This offboarding SOP applies to:

Category	Applicable Stream	Primary Reference
Permanent employees — all bands	Stream 1 (voluntary), 2 (redundancy), 3 (retirement), or 4 (involuntary)	This SOP in full
Fixed-term contract employees	Stream 1 or FTC expiry — modified clearance provisions noted per section	This SOP + FTC notes
Graduate trainees	Stream 1 or non-confirmation; PPO process per PMP Segment 4, Section 17.3	PMP Segment 4
Interns	Abbreviated clearance — supervisor, IT, and facilities only	PMP Segment 4, Section 17.3
Contractors	Not covered — engagement manager manages contractor exit	PMP Segment 4, Section 17.2

8.2 Stream 1 — Voluntary Resignation

Voluntary resignation is the most frequent separation stream. The process must balance the company's need for a professional, well-managed transition with genuine respect for the employee's decision. Attempts to pressurise, guilt, or manipulate an employee into withdrawing a resignation are contrary to the company's values and are not permitted.

8.2.1 Resignation Receipt and Initial Process

Step	Action	Owner	Timeline	HRMS Action
1	Employee submits resignation — in writing via HRMS or email to manager and HRBP	Employee	Any time	HRMS → My Employment → Submit Resignation
2	Manager acknowledges receipt in writing within 1 working day. No persuasion, no delay.	Manager	Within 1 working day	HRMS → My Team → Resignation → Acknowledge
3	HRBP confirms notice period, last working day, and handover requirements	HRBP	Within 2 working days	HRMS → Offboarding → Initiate → Stream 1
4	Offboarding checklist generated in HRMS and assigned to all relevant parties	HRBP (automated)	Same day as Step 3	HRMS automated workflow
5	Exit interview scheduled for Week 2 of notice period or as close to last day as practical	HRBP	Within 3 working days of resignation	HRMS → Offboarding → Exit Interview → Schedule
6	Knowledge transfer plan agreed with manager and employee	Manager	By end of first week of notice	HRMS → Offboarding → Knowledge Transfer → Plan

8.2.2 Notice Period Provisions

Notice period provisions are set in the employee's contract of employment in accordance with the applicable State Shops and Establishments Act and the company's standard notice schedule. The standard notice periods by band are:

Band	Standard Notice Period	Payment in Lieu Permitted	Garden Leave Applicable
Bands 1–2	30 days	Yes — at company discretion	No — standard work obligation
Bands 3–4	60 days	Yes — at company discretion	Exceptional cases only with HRBP approval
Band 5	90 days	Yes — at company discretion	Client-sensitive roles — VP-HR approval
Band 6+	90 days (contractual may vary)	Yes — at VP-HR and Legal discretion	Senior and client-sensitive roles — CEO approval

Notice period reduction requests: An employee may request a shorter notice period. The manager and HRBP assess whether the reduction is operationally feasible. Approval is at the manager's discretion with HRBP concurrence. Approved reductions are documented in HRMS. The decision is not subject to appeal — it is a practical operational judgement, not a policy entitlement.

Notice period waiver by the company: The company may elect to waive the notice period and pay in lieu. This decision requires VP-HR approval. The payment in lieu is calculated on basic salary only unless the contract specifies otherwise.

8.2.3 Voluntary Resignation Offboarding Checklist

Clearance Item	Owner	Deadline	HRMS Tracking
IT asset return: laptop, mobile phone, access card	IT team	Last working day	HRMS → Offboarding → IT Clearance
System access revocation: all company systems	IT Security	18:00 on last working day	IT Security confirms in HRMS
Email forwarding setup (client-facing roles)	IT team + manager	Last working day	IT confirms
Knowledge transfer completed and documented	Manager + employee	3 working days before last day	HRMS → Offboarding → KT Plan → Complete
Client handover communication (client-facing roles)	Manager + employee	5 working days before last day	Manager confirms in HRMS
Finance clearance: expense claims, advances, loans	Finance team	5 working days before last day	Finance confirms clearance in HRMS
Facilities clearance: desk cleared, locker emptied	Facilities	Last working day	Facilities confirms
NDA and confidentiality obligations reminder letter	Legal / HRBP	Last working day	HRMS → Offboarding → Legal Docs
Exit interview conducted	HRBP	Within notice period	HRMS → Offboarding → Exit Interview → Record
Full and Final Settlement initiated	Finance + HRBP	Within 3 working days of last day	HRMS → Offboarding → F&F → Initiate

8.3 Stream 2 — Redundancy and Restructuring

Redundancy is the involuntary separation of an employee whose role has ceased to exist or has been substantially changed in a manner that removes the basis for the employment. It is a significant and difficult event for the affected employee. Arjun Technologies is committed to conducting redundancy processes with transparency, fairness, and genuine support for affected employees.

Legal compliance note: Redundancy provisions in India are governed by the Industrial Disputes Act 1947, the applicable State Shops and Establishments Act, and the employee's contract of employment. Legal team review is mandatory before any redundancy action. This SOP describes the HR process — it does not replace legal advice.

8.3.1 Redundancy Process — Required Steps

Phase	Required Actions	Owner	Legal Requirement
1 — Decision	Business case documented: reason for redundancy, why this role specifically, alternatives considered. HRBP and Legal consulted before any communication.	Business leader + VP-HR + Legal	Business decision documented before communication
2 — Consultation	Meaningful consultation with the affected employee(s). Genuine opportunity to propose alternatives. Minimum consultation period: 14 days for individual redundancy, 30 days for 5+ simultaneous redundancies.	Manager + HRBP	Consultation is a legal requirement — not a formality
3 — Alternatives	Vacancy register checked for suitable alternative roles. Employee offered suitable alternative where one exists. Right of trial period in alternative role.	HRBP	Obligation to consider redeployment
4 — Decision	Final decision communicated in private, in person, with HRBP present. Written confirmation issued same day.	Manager + HRBP	Written confirmation required
5 — Separation	Notice period served or payment in lieu. Redundancy compensation calculated by Legal. Clearance and F&F per standard process.	Finance + Legal + HRBP	Statutory redundancy compensation per IDA 1947
6 — Support	Outplacement support offered (EAP career counselling, reference letter, LinkedIn profile update support). Redundancy-specific reference letter issued.	HRBP	Not legally required — company standard

Selection criteria for redundancy where a selection pool is required: Any selection process must be based on objective, documented, and non-discriminatory criteria. Permitted criteria include: skills assessment against the future role requirements; performance record from HRMS; attendance record excluding protected absences. Prohibited factors in selection include: pregnancy, maternity leave, disability, age, religion, caste, or any other protected characteristic. Legal team reviews selection criteria before application.

8.4 Stream 3 — Retirement

Retirement is a positive separation that warrants recognition of the employee's service and contribution. The standard retirement age is 58 years unless the employment contract or applicable rules specify otherwise for senior management roles. The HRBP Operations team maintains a 12-month rolling retirement forecast by reviewing the employee database annually.

Timeline Before Retirement	Required Action	Owner
12 months	HRBP flags upcoming retirement to manager and VP-HR. Succession planning discussion initiated.	HRBP
6 months	Formal retirement notification letter issued to employee. Benefits and pension briefing scheduled.	HRBP

3 months	Knowledge transfer plan agreed. Succession candidate confirmed. Handover schedule documented.	Manager + HRBP
1 month	Standard offboarding clearance checklist initiated. Retirement celebration planned per service recognition policy.	HRBP + Facilities
Last week	Senior farewell event for Band 5+ (VP-HR facilitates). Service recognition presentation. Final clearance completed.	VP-HR + Manager
Last day	F&F Settlement initiated. Gratuity calculation by Finance. PF withdrawal forms processed. Retirement letter issued.	Finance + HRBP

8.5 Stream 4 — Involuntary Separation

Involuntary separation includes termination for cause following a disciplinary process, non-confirmation at the end of the probationary period (which is covered in Section 7.5 of Segment 1), and termination for sustained performance failure following a formal Performance Improvement Plan process. This section covers termination for cause and PIP-outcome termination. Non-confirmation is governed by Section 7.5.

Legal compliance note: Involuntary separation in India carries significant legal exposure if the process is not correct. Legal team review and sign-off is mandatory before any involuntary separation is communicated. VP-HR approval is required for all involuntary separations. This SOP describes the HR process — compliance with the Shops and Establishments Act, the Industrial Disputes Act, and the specific provisions of the employee's contract of employment are legal questions that require legal advice.

Type	Preceding Process	Required Documentation	Approvals Required
Termination for cause — gross misconduct	Full disciplinary process per Code of Conduct Section 12 and HR-DCP-001	Investigation report, show-cause notice, employee response, disciplinary hearing record, final decision letter	VP-HR + Legal + CEO for Band 5+
Termination for cause — serious misconduct	Full disciplinary process per HR-DCP-001	Same as above	VP-HR + Legal
PIP outcome — separation	Completed formal PIP per PMP Segment 4, Section 23. PIP period complete with documented failure to meet improvement criteria.	PIP documentation, coaching records, evidence of support provided, final assessment	VP-HR + Legal

Conduct during an involuntary separation: The employee must be treated with dignity and respect throughout the separation process, including at the moment of communication. The manager and HRBP should conduct the separation conversation in a private setting, without other employees present. The conversation should be direct, compassionate, and brief. The employee should be given time to collect personal belongings and leave with their dignity intact. Security escorts are not used unless there is a specific, documented, assessed risk.

8.6 Full and Final Settlement — All Streams

Full and Final Settlement is the financial closure of the employment relationship. It must be completed accurately and promptly — delays in F&F settlement are one of the most common sources of post-employment disputes and reputational damage.

F&F Component	Applicable Streams	Calculation Basis	Timeline
Final salary payment (days worked in last month)	All	CTC / 26 × working days	With next payroll cycle or within 30 days
Earned leave encashment	All	Basic salary / 26 × unused earned leave days (within applicable cap)	With F&F
Variable pay / bonus (pro-rated where applicable)	Streams 1, 2, 3 — at company discretion per policy	Pro-rated based on days worked in performance year	With F&F
Notice period payment in lieu	Where notice waived	Basic salary for notice period not served	With F&F
Gratuity	Employees with 5+ years service — all streams	15/26 × basic salary × completed years of service (Payment of Gratuity Act 1972)	Within 30 days of last day
Provident Fund settlement	All PF members	UAN transfer or withdrawal per EPFO rules — employee initiates online	HRBP provides UAN details on last day
Notice period recovery (where employee exits before serving full notice)	Stream 1 where notice not served	Basic salary × days short of notice period	Deducted from F&F
Asset recovery (unreturned assets)	All	Replacement cost per IT asset register	Deducted from F&F if not returned by last day

F&F settlement timeline: The company commits to completing F&F settlement within 30 days of the employee's last working day in all streams. Finance team sends a draft F&F statement to the employee for review 5 days before the payment date. The employee has 3 working days to raise any discrepancy. Disputes are resolved by the HRBP and Finance team. Where an employee disputes a deduction, they are entitled to raise a formal grievance per HR-GRM-001.

F&F Receipt and Release: The employee signs a Full and Final Settlement receipt and release document confirming receipt of all amounts due. This document is generated in HRMS on payment and sent digitally for signature. The signed receipt is retained per the document retention schedule.

8.7 Exit Interview Process and Knowledge Transfer

8.7.1 Exit Interview

The exit interview is a structured conversation between the departing employee and the HRBP — not the line manager — designed to gather honest feedback about the employee's experience at Arjun Technologies. It is a quality improvement tool, not a retention tool, and should never be used to attempt to persuade the employee to stay unless the employee themselves raises the subject.

Element	Standard
Timing	During the second half of the notice period — close enough to departure to reflect the full experience, early enough that the feedback can be gathered thoughtfully
Format	Private 45-minute conversation with HRBP. Video call acceptable. Not conducted by the line manager.

Standard questions	Standardised question set covering: reasons for leaving; overall experience; management quality; career development; culture and values; suggestions for improvement. Stored in HRMS as structured data.
Recording	HRMS → Offboarding → Exit Interview → Record. Specific ratings and free-text responses. Anonymised in aggregate reporting.
Confidentiality	HRBP does not share specific responses with the line manager without the employee's consent. Aggregate themes are shared with VP-HR and BU Heads in monthly reports.
Follow-up	Where the employee raises a concern about a specific individual (harassment, discrimination, misconduct), HRBP escalates per HR-GRM-001 regardless of the employment ending.

8.7.2 Knowledge Transfer

Effective knowledge transfer is the manager's responsibility. The departing employee is expected to cooperate fully. Where the employee is unwilling to cooperate with knowledge transfer during the notice period, the HRBP is consulted — this is a contractual obligation and a professional standard.

Knowledge Transfer Element	Standard	Owner	HRMS
Role documentation update	Current process documentation reviewed and updated. All role-specific knowledge points documented in company knowledge base (Confluence).	Employee + manager	Manager confirms complete
Active project handover	All active projects documented with status, key contacts, next actions, and risks. Successor or team members briefed directly.	Employee + manager	Manager confirms
Client relationship handover	Written introduction to successor for all active client relationships. Client informed of change via manager-approved communication. No unilateral client contact.	Manager leads	Manager confirms
System and credential documentation	All company system credentials stored in the company password manager — not personal storage. Any role-specific configurations documented for IT.	Employee + IT	IT confirms

9. Internal Transfer and Promotion Onboarding Addendum

9.1 Internal Transfer Principles

An employee who transfers internally is not a new joiner — they already understand the company, its culture, systems, and professional standards. But they are new to their role, team, and manager. The internal transfer onboarding process must bridge this distinction: it provides role, team, and manager orientation without repeating the full new joiner experience.

The most common failure in internal transfer onboarding is the assumption that because someone is already an employee, no onboarding is needed. The evidence is clear: a poorly managed internal transfer carries the same risks as a poorly managed external hire — role confusion, team integration failure, and early attrition from the new role.

9.2 Lateral Transfer Onboarding Process

Phase	Actions	Owner	Timeline
Pre-Transfer	Formal transfer letter issued by HRBP confirming new role, team, band, and effective date. Releasing manager completes a transfer knowledge brief — key context about the employee's skills, working style, and development areas that the receiving manager needs. IT provisioning request for role-specific system access changes.	HRBP + releasing manager	T-5 working days
Transfer Day	Receiving manager conducts a Day One transfer conversation — role overview, team introductions, first-week plan. No full Day One orientation required — focus on role and team only. Buddy assigned from the new team where the transfer involves a different city or significantly different function.	Receiving manager + HRBP	Transfer day
First Week	Role-specific onboarding track commenced (Section 6). Stakeholder introductions in the new team. Any system training required for new tools.	Receiving manager	Days 1–5
30-Day Milestone	30-day transfer milestone conversation — abbreviated version of the standard 30-day review. Role clarity confirmed. Initial OKRs set for the new role. HRMS transfer milestone record completed.	Receiving manager + HRBP	Day 30

9.3 Promotion Onboarding Process

A promotion is both a recognition of performance and a transition into a new level of responsibility. The most common failure in promotion onboarding is the assumption that a strong performer at Band 3 will automatically perform well at Band 4 without specific support. The skills, relationships, and mindset required at each band level are different — not just more of the same.

Phase	Actions	Owner
Promotion Confirmation	Promotion letter issued with new band, title, salary, and effective date. Manager holds a promotion conversation that acknowledges the achievement, describes what changes at the new level, and sets initial expectations. HRBP provides the band-level competency framework document.	HRBP + manager
First 30 Days	Manager conducts a role clarification conversation focused specifically on the expectations at the new band level. IDP updated to reflect development priorities at the new level. Where the promotion involves management responsibility for the first time (Band 3 to 4), the New Manager Development Programme is initiated.	Manager
60-Day Check-in	HRBP-led conversation to confirm integration at the new level. Strengths and development areas identified. Any support gaps addressed.	HRBP + manager

10. Manager and Buddy Obligations Guide

10.1 Manager Obligations — Complete Reference

This section is the single, authoritative reference for all manager obligations across the complete onboarding and offboarding cycle. It is intended as a practical guide that managers can consult at each stage. All items marked Mandatory must be completed — they are not discretionary and their completion is tracked in HRMS.

10.1.1 Pre-Joining Obligations (Mandatory)

Obligation	Timing	Standard	HRMS Action
Submit IT provisioning request	T-10 working days	Full role details, joining date, band, and required systems submitted to HRMS. Incomplete requests cause SLA failures.	HRMS → Onboarding → Provisioning Request
Confirm buddy assignment with HRBP	T-7 working days	Manager proposes buddy; HRBP confirms assignment. Buddy briefed on new joiner before T-7.	HRBP action; manager confirms
Communicate new joiner arrival to team	T-5 working days	Brief Teams/Slack message — name, role, start date. Create welcoming anticipation without over-promising.	No HRMS action
Send personal welcome message	T-2 working days	Personal, warm, direct message — not a template forward. Specific to the individual. Confirms Day One logistics.	No HRMS action — direct
Confirm IT provisioning readiness	T-2 working days	Direct check with IT team — laptop configured, access tested, credentials sent. Do not assume.	Confirm with IT Security
Confirm workspace readiness	T-2 working days	Desk assigned and clear. Name card where applicable. Welcome pack confirmed.	No HRMS action
Plan team lunch or welcome event	T-1 working day	Lunch confirmed and booked. Expense claim prepared. Team informed.	No HRMS action

10.1.2 Probationary Period — Ongoing Manager Obligations

The probationary period requires consistent, documented investment from the manager. The following obligations apply throughout the 90-day period regardless of how the employee is performing. If performance is strong, they confirm progress. If there are concerns, they are the basis for addressing those concerns with the employee before they escalate.

Obligation	Frequency	Standard	HRMS Recording
Weekly informal feedback	Weekly	Brief, specific, balanced. Not a formal review — a normal part of working together. Positive and developmental.	Coaching note at least twice per month
Monitor mandatory training completion	End of Week One; weekly thereafter	Review training dashboard. Chase any overdue modules with the employee and, if systemic, with HRBP.	HRMS → My Team → Training
OKR quality review	After 30-day milestone	OKRs entered at 30-day milestone must meet the SMART standard. Review before submitting.	OKR entered in HRMS
HRBP consultation on concerns	Immediately when a concern arises	Do not wait for the next milestone. Email or call HRBP as soon as a significant concern is identified.	HRMS → Onboarding → Concern Note

10.2 Buddy Programme — Complete Obligations Reference

The buddy programme standards are set in Sections 9.1 and 9.2 of Segment 1. This section provides the complete quick-reference obligations guide for buddies across the 90-day commitment.

Period	Obligation	Standard	Time Commitment
T-7 days	Personal welcome message	Warm, individual, informal. Offers to answer questions before Day One. Not a template — specific to the individual.	30 minutes
Day One	Full presence and accompaniment	Meet at reception or join video call. Accompany to team intro and lunch. Available all day for questions. End-of-day check-in.	Half day
Week One	Daily brief check-ins	Brief contact each day — WhatsApp or Teams message or brief chat. Answer questions as they arise. Share informal cultural navigation tips.	30 min/day
Days 8–30	Weekly informal coffee/chat	In person or video. At least one shared lunch or team social. Flag to HRBP if integration concerns arise.	1–2 hours/week
Days 31–60	Bi-weekly informal contact	Brief fortnightly check-in. Available for ad-hoc questions. Check in after 30-day milestone conversation.	30–60 min/week
Days 61–90	Monthly informal check-in	Relationship naturally reduces in intensity as new joiner integrates. Available but not imposing.	As needed

11. HRMS Administration — Onboarding and Offboarding

11.1 HRMS Offboarding Module — Complete Reference

The HRMS Offboarding Module tracks every element of the separation process from resignation receipt to F&F completion. It is the single record of the offboarding process. HRBP access: HRMS → Offboarding → All Separations. Manager access: HRMS → My Team → Separations.

Action	Who	Navigation Path	When	Notes
Initiate offboarding workflow	HRBP	HRMS → Offboarding → New Separation → Select Stream	Within 1 working day of resignation receipt	Stream selection drives the checklist generated
Record resignation receipt	Manager	HRMS → My Team → [Name] → Acknowledge Resignation	Within 1 working day	Triggers automated notifications
Confirm notice period and last day	HRBP	HRMS → Offboarding → [Name] → Notice Period → Confirm	Within 2 working days	Last day auto-calculates from notice period
Schedule exit interview	HRBP	HRMS → Offboarding → [Name] → Exit Interview → Schedule	Within 3 working days of resignation	Sends calendar invite to employee
Record exit interview	HRBP	HRMS → Offboarding → [Name] → Exit Interview → Record	Same day as interview	Structured question responses + free text
Confirm IT clearance	IT Security	HRMS → IT → Offboarding → [Name] → Confirm Clearance	By 18:00 on last day	Access revocation confirmed. Asset return recorded.
Confirm Finance clearance	Finance team	HRMS → Finance → Offboarding → [Name] → Clearance	5 days before last day	Expense advances, loans, outstanding claims
Initiate F&F Settlement	Finance + HRBP	HRMS → Offboarding → [Name] → F&F → Initiate	Within 3 working days of last day	Draft statement sent to employee for review
Close offboarding record	HRBP	HRMS → Offboarding → [Name] → Close Record	After F&F receipt signed	Employee status changes to Separated

11.2 Data Retention and Deletion Schedule

Employee personal data is retained and deleted per the Data Privacy Policy LEGAL-POL-004-v2.1 and the Digital Personal Data Protection Act 2023. The following schedule covers data generated during onboarding and offboarding.

Data Category	Retention Period	Deletion Method	DPDP Act Notes
Employment contract and offer letter	Employment + 7 years	Secure deletion from HRMS	Statutory employment record
Background verification data	Employment + 3 years	BGV partner and HRMS deletion	DPDP Act consent records retained with data
Pre-joining documentation (IDs, certificates)	Employment + 7 years (statutory	HRMS secure deletion	Purpose limitation: employment verification only

	IDs); Employment + 3 years post-separation (certificates)		
Onboarding milestone records	Employment + 3 years	HRMS archive then delete	May be relevant to future employment claims
Exit interview records (individual)	3 years post-separation	HRMS secure deletion	Anonymised aggregates retained for quality reporting
F&F settlement records	7 years post-separation	Finance system and HRMS deletion	Statutory requirement — tax and labour law
Salary slips (prior employer) collected at joining	6 months post-joining	HRMS deletion — automated	Purpose complete after compensation verification
POSH complaint records	Employment + 3 years minimum; longer if pending litigation	Legal team manages	Legal hold supersedes standard deletion schedule

12. Compliance, Audit, and Escalation

12.1 Compliance Framework and Audit Schedule

Compliance with this SOP is monitored through a combination of HRMS automated tracking, monthly HRBP review, quarterly VP-HR reporting, and an annual compliance audit. The compliance framework ensures that the SOP is not only documented but actively practised.

Compliance Activity	Frequency	Owner	Output	Action if Non-Compliant
HRMS onboarding dashboard review	Weekly	HRBP	Overdue milestones, incomplete completions, active concern cases	HRBP contacts manager directly within 2 working days
Monthly Onboarding Quality Report	Monthly	VP-HR	All 8 quality metrics (Section 12 of Segment 1) by BU and location	Below-target metrics trigger BU Head discussion
Offboarding clearance audit	Monthly	IT Security + HRBP	All offboardings: IT access revoked on last day, clearance complete	Any access not revoked on last day — immediate remediation + root cause
F&F settlement timeliness audit	Monthly	Finance + HRBP	% of F&F settlements completed within 30 days. Target: 95%+	Delays investigated. Finance and HRBP accountable.
Annual SOP compliance audit	Annual (October)	VP-HR + Internal Audit	Sample review of 10% of onboardings and offboardings in the year against SOP requirements	Findings reported to CEO. Remediation plan within 30 days.
BGV completion audit	Monthly	HRBP	% of employees where BGV complete before Day 90	Overdue BGV escalated to hiring manager and Head of IT for system access restriction

12.2 Escalation Pathways

The following escalation pathways apply when issues cannot be resolved at the first point of contact. Escalation should be timely — early escalation allows early resolution.

Issue Type	First Point of Contact	Escalation Level 1	Escalation Level 2
IT provisioning failure	IT Support — itsupport@arjuntech.in / Ext. 1000	Head of IT — within 4 hours if Day One impact	VP-HR — if systemic or repeated failure
Onboarding milestone overdue (>5 working days)	HRBP contacts manager	VP-HR if no response within 3 working days	BU Head — if pattern across BU
BGV material discrepancy	HRBP + Legal	VP-HR	CEO if offer withdrawal required
Probationary concern — performance	HRBP	VP-HR for non-confirmation cases	Legal for any case with protected characteristic
POSH disclosure during onboarding/offboarding	HRBP → ICC immediately	VP-HR	Legal + CEO

F&F settlement dispute	HRBP + Finance	VP-HR	Legal + grievance process per HR-GRM-001
Involuntary separation challenge	HRBP + Legal	VP-HR	CEO + external legal counsel

13. Common Offboarding Scenarios — Guidance for HRBPs and Managers

The following scenarios address the offboarding situations most frequently escalated to HR Business Partners.

Scenario	Facts	Correct Action and SOP Basis
1 — Counter-offer situation	A Band 4 engineer resigns. The manager asks the HRBP whether they can make a counter-offer.	Counter-offers are at the manager's discretion with BU Head approval. The HRBP's role is to confirm the process — not to lead the counter-offer. If a counter-offer is made and accepted, it must be documented in writing in HRMS and the resignation formally withdrawn by the employee. The HRBP conducts a brief retention conversation to understand root causes regardless of the counter-offer outcome — the reasons for resignation are quality data even when the employee stays. (Section 8.2.)
2 — Employee disappears during notice period	A Band 2 employee stops attending work without communication 10 days into their notice period.	The manager attempts contact by phone and email immediately. If no response within 2 working days, HRBP escalates to formal written notice of absence. After 5 working days without contact, HRBP and Legal assess whether to treat the absence as job abandonment under the applicable State SE Act provisions. Legal confirms process before any formal decision. The employee's HRMS record is updated and the offboarding and F&F process are suspended pending contact. (Section 8.2, Legal team consultation required.)
3 — Sensitive exit: POSH complaint during notice period	An employee submits a POSH complaint on the same day as their resignation letter.	The POSH complaint and the resignation are completely independent processes. The resignation is acknowledged and processed per standard process. The POSH complaint is referred to the ICC immediately and independently per HR-POL-006. The employee's decision to leave does not affect the ICC's obligation to investigate. The ICC investigation may affect the timeline of offboarding steps where a potential respondent is involved in clearance approvals — HRBP coordinates with VP-HR and Legal. (HR-POL-006.)
4 — Employee requests early access revocation	An employee on garden leave requests that their system access be revoked immediately, before the contractual last working day.	The employee's request to waive access during garden leave is accommodated. IT Security revokes access on the requested date. The HRMS offboarding record is updated. F&F calculation date is based on the contractual last working day, not the date of access revocation — access revocation during garden leave does not reduce the notice period entitlement. (Section 8.2.2.)
5 — Knowledge transfer obstruction	A Band 3 employee in their notice period is uncooperative with knowledge transfer — not attending handover sessions and not updating documentation.	The manager raises the non-cooperation directly with the employee in a documented conversation. Knowledge transfer is a contractual obligation during the notice period. If non-cooperation continues after the formal conversation, HRBP escalates with a written notice to the employee. Persistent non-cooperation may be grounds for withholding discretionary components of the F&F settlement (variable pay, notice period reduction) but not statutory entitlements. Legal confirms before any deduction. (Section 8.7.2.)
6 — Redundancy challenge	Following a redundancy notification, the affected employee states they believe they were selected because of their disability.	Legal is notified immediately. The selection process documentation is reviewed by Legal before any response is given to the employee. The employee is entitled to the full consultation process including the right to be accompanied. Legal advises on the substantive response. VP-HR approves all communications. Any indication of discriminatory selection requires immediate management intervention before the process continues. (Section 8.3, Legal consultation mandatory.)

14. Appendices

Appendix A — Pre-Joining Documentation Checklist (New Joiner Copy)

This checklist is provided to the new joiner via the pre-joining portal at T-15 working days. It lists all documents required before Day One. Items not submitted by T-5 days are chased by the HRBP. Items not submitted by Day One are followed up in the first week — their absence does not defer the joining date unless legally required (e.g., work authorisation documents).

Document	Mandatory?	Upload Deadline	Format Accepted
Government-issued photo ID (Aadhaar / PAN / Passport)	Mandatory	T-5 days	PDF or JPEG — clear, unobstructed scan
PAN Card	Mandatory	T-5 days	PDF or JPEG
Bank account details (IFSC + account number)	Mandatory	T-5 days	Cancelled cheque or bank statement PDF
Educational certificates (highest qualification)	Mandatory	T-5 days	PDF scan of original or digitally issued certificate
Experience / relieving letters (lateral hires)	Mandatory (lateral)	T-5 days	PDF — all employers listed in CV
Last 3 months salary slips (Band 3+ lateral hires)	Required (Band 3+)	T-5 days	PDF payslips from previous employer
BGV Consent Form	Mandatory	T-10 days	Digital signature via pre-joining portal
Professional certifications (where claimed in CV)	Where claimed	T-5 days	PDF — original certificate or issuer digital credential
Medical fitness certificate (Band 5+ specific roles)	Role-specific	T-5 days	PDF from registered medical practitioner

Colour key: Green shading = Mandatory for all. Yellow shading = Mandatory for the specified category. Unshaded = Where applicable only.

Appendix B — Day One Manager Checklist (Printable Version)

Print this checklist and keep it at your desk when onboarding a new team member. All items are mandatory. Items with an HRMS action must also be completed in HRMS by end of Day One.

Timing	Action	HRMS?	✓
09:00 Day One	Be at the office (or on the video call) to personally greet the new joiner. Do not delegate this.	No	
Morning	Confirm laptop and all system access is working. Contact IT immediately if anything is not ready.	No	
Morning	Introduce the new joiner to all immediate team members.	No	
Lunch	Attend team lunch or welcome event. If unavailable, confirm buddy has it covered.	No	
16:30	Conduct 30-minute private 1-on-1: first-week schedule, role expectations, key relationships, open questions.	Yes — Day One Manager Checklist	
By 18:00	Complete HRMS Day One Manager Checklist — confirm all obligations individually.	Yes	

Appendix C — Offboarding Clearance Checklist (All Streams)

This checklist is generated automatically in HRMS when an offboarding record is initiated. Owners confirm completion in HRMS against their items. The HRBP monitors overall completion status daily during the notice period.

Clearance Item	Owner	Deadline	Confirmed in HRMS?
HRMS offboarding record initiated	HRBP	Within 1 working day of resignation	Automatic
Notice period and last day confirmed	HRBP	Within 2 working days	HRBP confirms
Knowledge transfer plan agreed	Manager	End of first week of notice	Manager
Exit interview scheduled	HRBP	Within 3 working days of resignation	HRBP
Client handover completed (client-facing roles)	Manager + employee	5 working days before last day	Manager
Finance clearance: expenses, advances, loans	Finance team	5 working days before last day	Finance team
IT clearance: laptop, phone, access card returned	IT team + employee	Last working day by 17:00	IT Security
System access revoked: all company systems	IT Security	18:00 on last working day	IT Security
Facilities clearance: desk cleared, locker emptied	Facilities + employee	Last working day	Facilities
NDA and confidentiality obligations reminder	HRBP / Legal	Last working day	Legal / HRBP
Exit interview conducted and recorded	HRBP	Within notice period	HRBP
F&F Settlement initiated	Finance + HRBP	Within 3 working days of last day	Finance
F&F Receipt signed by employee	Employee + HRBP	Within 30 days of last day	HRMS automated
Offboarding record closed in HRMS	HRBP	After F&F receipt signed	HRBP

Appendix D — Exit Interview Question Guide

The following standard question set is used for all exit interviews. HRBPs may add follow-up questions based on responses. All responses are recorded in HRMS and aggregated for quality reporting.

Category	Standard Questions	Recording Format
Primary reason for leaving	What is the primary reason for your decision to leave? Are there secondary reasons you would like to share?	Category selection + free text
Role and work experience	How would you describe your overall experience in the role? Was the role as described during the recruitment process? What did you most and least enjoy?	Rating 1–5 + free text
Management experience	How would you describe your relationship with your manager? Did you feel supported in your role? Did you receive useful feedback?	Rating 1–5 + free text. Anonymous in reporting.
Career development	Did you feel your career development was supported here? Were there opportunities for growth? Was the IDP process useful?	Rating 1–5 + free text
Culture and environment	How would you describe the culture of the team and the company? Did you feel included and valued? Was the hybrid working model effective for you?	Rating 1–5 + free text
Improvement suggestions	What one thing, if changed, would most improve the experience of people at Arjun Technologies? Is there anything specific you would like to flag to leadership?	Free text only
Future relationship	Would you consider returning to Arjun Technologies in the future? Would you recommend the company to others as an employer?	Rating 1–5

Appendix E — Band-Specific IT Equipment Standards

The following equipment standards apply to all permanent employees. Equipment is provisioned on joining and upgraded per the standard refresh cycle (laptops: 3 years). Band upgrades trigger equipment review.

Band	Laptop Standard	Additional Equipment	Mobile Phone
Bands 1–2	Standard business laptop — 14", Intel Core i5 or AMD Ryzen 5, 16GB RAM, 256GB SSD	Mouse and keyboard. No external monitor standard.	Not standard
Bands 3–4	Premium laptop — 14" or 15", Intel Core i7 or AMD Ryzen 7, 16GB RAM, 512GB SSD	External monitor (24"), mouse, keyboard.	Client-facing and on-call roles: company SIM provided
Band 5	Premium laptop — choice of 13"/14"/15", 32GB RAM, 512GB SSD	External monitor (27" 4K), mouse, keyboard, noise-cancelling headset.	Yes — company SIM + mobile data plan
Band 6+	Premium laptop — employee choice within approved vendor list, 32GB RAM, 1TB SSD	External monitor (27" 4K), docking station, mechanical keyboard, premium headset.	Yes — company SIM + premium mobile plan
Engineering — GPU roles	GPU-enabled workstation or laptop as confirmed by Head of Engineering — see IT provisioning form for spec	Dual external monitors standard. Additional peripherals per role requirements.	Per band standard

Appendix F — Onboarding Quality Metrics Dashboard Reference

This appendix provides the definitions, targets, and action protocols for all eight onboarding quality metrics monitored monthly by the HRBP Operations team and reported to the VP-HR. Full metrics description is in Section 12 of Segment 1.

Metric	Target	Data Source	Reporting Frequency	BU Head Escalation Trigger
Day One provisioning readiness	≥95%	IT Security HRMS confirmation	Monthly	Below 90% for 2 consecutive months
Day One checklist completion rate	≥90%	HRMS Onboarding module	Monthly	Below 85% for any month
30-day milestone timeliness	≥95%	HRMS milestone dates	Monthly	Below 90%
60-day milestone timeliness	≥95%	HRMS milestone dates	Monthly	Below 90%
Mandatory training completion by Day 10	≥95%	HRMS LMS module	Monthly	Below 90%
90-day confirmation rate	≥85%	HRMS confirmation decisions	Monthly	Below 80% for 2 consecutive months
Early attrition (within 6 months)	<5%	HRMS separation records	Monthly	Above 7% in any 3-month period
New joiner NPS — 30-day pulse	>+40 NPS	HRMS pulse survey	Monthly	NPS below +25

Appendix G — Key Contacts Reference

The following contacts are current as of the Effective Date. Updates are maintained in the HRMS Company Directory.

Function / Role	Name	Contact	Purpose
VP — Human Resources	Ms. Priya Menon	hr@arjuntech.in	SOP ownership, escalated HR matters, VP-HR approvals
Head of IT / IT Liaison	Mr. Kiran Bhat	itsupport@arjuntech.in / Ext. 1000	IT provisioning, system access, Day One IT issues
Legal Contact (HR matters)	Mr. Sandeep Iyer	legal@arjuntech.in	BGV discrepancies, involuntary separation, POSH legal advice
HRBP Operations Team	Per BU assignment	hr@arjuntech.in	First point of contact for all onboarding and offboarding queries
Ethics Hotline	Anonymous reporting	ethics@arjuntech.in (24/7)	Reporting concerns about onboarding/offboarding quality, conduct
CEO	Mr. Rajesh Arjun	Via EA / HRMS directory	Band 6+ onboarding welcome; redundancy and senior separation approvals
EAP Provider	Per current contract	EAP access code in HRMS Benefits	Employee Assistance Programme — mental health, career, financial counselling

Segment 2 Summary and Document Completion

This completes Segment 2 of the Arjun Technologies Pvt. Ltd. Onboarding and Offboarding Standard Operating Procedures, Version 2.3.

Section 8 delivered the complete offboarding SOP across four separation streams: voluntary resignation (including notice period provisions and the voluntary offboarding checklist), redundancy and restructuring (including the legally required consultation framework and selection criteria standards), retirement (including the 12-month advance planning timeline), and involuntary separation (including the documentation and approval requirements). Section 8.6 provided the Full and Final Settlement framework with component-by-component calculation basis and timeline commitments. Section 8.7 covered exit interview standards and knowledge transfer obligations.

Section 9 addressed the internal transfer and promotion onboarding addendum — recognising that existing employees transitioning to new roles require structured support distinct from the full new joiner process. Section 10 consolidated the complete Manager and Buddy Obligations Guide as a single practical reference. Section 11 provided the HRMS Offboarding Module reference and the DPDP Act-aligned data retention and deletion schedule. Section 12 set out the compliance framework, audit schedule, and escalation pathways. Section 13 addressed six common offboarding scenarios. Section 14 provided all appendices: the pre-joining documentation checklist, the Day One manager checklist, the full offboarding clearance checklist, the exit interview question guide, band-specific IT equipment standards, the onboarding quality metrics dashboard reference, and the key contacts reference.

Segment	Sections	Key Topics	Pages	Status
Segment 1	1–7	Purpose and Scope · Pre-Joining · Day One Experience · First Week · 30-60-90 Day Induction · Role-Specific Tracks · Probation Management	1–40	Published Apr 2024
Segment 2	8–14 + Apps A–G	Offboarding SOP (4 streams) · Internal Transfer Addendum · Manager and Buddy Guide · HRMS Admin · Compliance and Audit · Common Scenarios · Appendices A–G	41–80	Published Apr 2024

Both segments are available on the HRMS portal under Policies and Documents. For onboarding and offboarding queries contact hr@arjuntech.in or your HRBP directly. For IT provisioning issues: itsupport@arjuntech.in or extension 1000. For anonymous reporting of concerns: ethics@arjuntech.in (24/7). Document reference: HR-OBS-001-v2.3. Owner: Ms. Priya Menon, VP Human Resources. Approved: Mr. Rajesh Arjun, CEO. Effective: 01 April 2024.
