TRAVEL AND EXPENSES POLICY

FIN-TEP-001-v1.0

Segment 1 of 3 — Policy Framework · Governance · Travel Authorisation · Air Travel ·

Ground Transportation · Accommodation · Meals and Per Diem · International Travel

Version	1.0	**Effective Date**	01 April 2024
Review Date	31 March 2025	**Classification**	Internal Use Only
Approved By	Mr. Rajesh Arjun, CEO	**Policy Owner**	Ms. Divya Rao, CFO
Finance Contact	finance@arjuntech.in	**IT Liaison**	Mr. Kiran Bhat
Doc Reference	FIN-TEP-001-v1.0	**Segment**	1 of 3 (Pages 1–35)

This is Segment 1 of the Arjun Technologies Pvt. Ltd. Travel and Expenses Policy, Version 1.0. It establishes the complete policy framework, governance structure, travel authorisation process, and detailed provisions for air travel, ground transportation, accommodation, meals and per diem, and international travel. Segment 2 covers entertainment, client-related expenses, technology and communication expenses, conference and training expenses, and the full expense claim and reimbursement process. Segment 3 covers the corporate card programme, advances, non-reimbursable expenses, policy exceptions, compliance and audit, and all appendices. For queries contact finance@arjuntech.in or your Finance Business Partner.

Table of Contents — Segment 1

SEGMENT 1 — This Document (Pages 1–35)

Section 1 — Purpose, Principles, and Governance
- 1.1 Why This Policy Exists
- 1.2 Policy Principles — The Five Standards
- 1.3 Scope — Who This Policy Covers
- 1.4 Governance, Ownership, and Version Control
- 1.5 Relationship to Other Policies and Systems

Section 2 — Band Structure and Entitlement Framework
- 2.1 Band Classification and Travel Entitlement Tiers
- 2.2 Entitlement Philosophy — Business Need Over Seniority
- 2.3 City Classification — Tier 1, Tier 2, and International

Section 3 — Travel Authorisation
- 3.1 Pre-Travel Authorisation Requirements
- 3.2 Authorisation Matrix — Who Approves What
- 3.3 Emergency and Short-Notice Travel
- 3.4 Declined Authorisation and Appeal Process

Section 4 — Air Travel
- 4.1 Class of Travel by Band and Route
- 4.2 Booking Requirements and the Travel Management Platform
- 4.3 Advance Booking Standards and Cost Optimisation
- 4.4 Flight Selection Criteria
- 4.5 Upgrades, Loyalty Programmes, and Ancillary Fees
- 4.6 Cancelled and Changed Travel

Section 5 — Ground Transportation
- 5.1 Ground Transport Hierarchy
- 5.2 Taxi and App-Based Transport
- 5.3 Company Vehicles and Car Rental
- 5.4 Personal Vehicle Use
- 5.5 Airport Transfers and Parking

Section 6 — Accommodation
- 6.1 Accommodation Booking Policy
- 6.2 Accommodation Rate Limits by City Tier
- 6.3 Extended Stays and Serviced Apartments
- 6.4 Incidentals, Room Service, and In-Hotel Expenses
- 6.5 Guest and Spousal Travel

Section 7 — Meals and Per Diem
- 7.1 Per Diem Structure and Rates
- 7.2 Actual Expense Claims for Meals
- 7.3 Meals Included in Other Costs
- 7.4 Alcohol — Policy and Limits

Section 8 — International Travel
- 8.1 International Travel Authorisation
- 8.2 Visa, Travel Documents, and Insurance
- 8.3 International Air Travel Class
- 8.4 Foreign Currency and Exchange
- 8.5 International Per Diem and Accommodation Rates

8.6 Health, Safety, and Duty of Care

SEGMENT 2 and SEGMENT 3 — Continuation Documents

1. Purpose, Principles, and Governance

1.1 Why This Policy Exists

Business travel and the expenses that accompany it are a necessary and significant cost of operating a professional services firm. Arjun Technologies spends meaningfully on travel each year — flights, hotels, ground transport, client entertainment, conferences, and the dozens of smaller costs that accumulate across more than 4,200 employees and five office locations. Managing this spend well requires three things: clear rules that employees can follow confidently; an approval and reimbursement process that is efficient rather than burdensome; and controls that protect the company from fraud, waste, and reputational risk without making ordinary professionals feel suspected.

This policy is written for the employee who is trying to do the right thing and needs to know what the right thing is. It provides unambiguous answers to the questions that arise most frequently: what class of air travel am I entitled to, how much can I spend on a hotel in Mumbai, do I need pre-approval for this trip, what happens if my flight is cancelled. Where the policy imposes a limit, it explains the reason. Where discretion exists, it describes how that discretion should be exercised.

This policy does not exist to create barriers to legitimate business activity. A policy that makes it so difficult to claim reasonable expenses that employees absorb costs personally — or worse, that discourages necessary client visits — imposes a hidden cost far larger than the expenses it saves. The goal is appropriate, transparent, and efficient management of a real business cost.

1.2 Policy Principles — The Five Standards

Every decision made under this policy — by an employee booking a trip, a manager approving a claim, or a finance reviewer processing a reimbursement — should be consistent with the following five standards.

Standard	What It Means in Practice
Business Necessity	Travel and expenses must serve a genuine business purpose. The question to ask before incurring an expense is: would a reasonable manager, aware of all the circumstances, regard this as a necessary cost of doing business? Personal convenience, habit, or preference are not business necessity.
Value for Money	The company's money should be spent with the same care a prudent professional would apply to their own money. This does not mean always choosing the cheapest option — a saving that costs three hours of productive time is not value for money. It means choosing the option that best balances cost and efficiency.
Accuracy and Honesty	Expense claims must accurately represent what was spent, when, and for what purpose. Rounding up, claiming personal expenses as business expenses, or submitting claims for items not actually incurred are serious breaches of the Code of Conduct and may constitute fraud. The standard is complete accuracy, not approximate accuracy.
Timely Compliance	Travel must be authorised before it occurs. Expenses must be claimed within the required timeframe. Late claims create accounting problems and suggest either carelessness or an attempt to circumvent controls. The timely compliance standard means building the administrative process into the travel rather than deferring it.
Proportionality	Entitlements are set by band and route because these are reasonable proxies for the business context. A senior professional on a 12-hour international flight has different reasonable needs from a junior professional on a 1-hour domestic sector. Proportionality means that entitlements increase with seniority and trip complexity, and that claims are proportionate to the business context, not to personal preference.

1.3 Scope — Who This Policy Covers

Category	Coverage	Key Variations
Permanent employees — all bands	Full policy applies	Entitlements vary by band per Section 2

Fixed-term contract employees	Full policy applies for duration of contract	Same band entitlements as permanent employees of equivalent band
Graduate trainees and interns	Policy applies with Band 1 entitlements	International travel requires VP-HR and CFO approval regardless of purpose
Contractors and consultants	Not covered by this policy	Travel costs for contractors are governed by the engagement contract. Billed directly or reimbursed per contract terms.
Candidates (interview travel)	Economy class domestic only; standard hotel rate	Managed by the Talent Acquisition team per HR-TA-002
Clients (company-hosted travel)	Section 9 of Segment 2 governs client entertainment and hosted travel	Must be pre-approved per the Entertainment and Client Hosting provisions

1.4 Governance, Ownership, and Version Control

This policy is owned by the Chief Financial Officer with operational co-ownership from the VP of Human Resources (people-related provisions) and the Head of IT (technology expense provisions). It is reviewed annually in January for a 01 April effective date. Material changes are communicated to all employees through the HRMS portal and a Finance-led policy briefing before the effective date.

The policy is maintained in the company Finance Policy Register at HRMS → Policies and Documents → Finance. Finance Business Partners are the first point of contact for all employee queries. For escalated or complex situations, the Finance Business Partner escalates to the CFO's office. Anonymous reporting of expense policy violations is available at ethics@arjuntech.in.

1.5 Relationship to Other Policies and Systems

Document	Reference	Interaction with This Policy
Code of Conduct	HR-COC-001-v2.4	Section 8 (Financial Integrity) governs expense fraud. Expense misrepresentation is a Code of Conduct violation with disciplinary consequences up to and including termination.
Finance Authorisation Matrix	FIN-AUTH-001-v3.1	Defines approval authorities for all financial commitments. This policy's authorisation matrix (Section 3.2) is a subset of the Finance Authorisation Matrix.
Corporate Card Policy	FIN-CCP-001-v2.0	Corporate cards are the preferred payment method for all travel expenses. Segment 3 of this policy covers the corporate card programme in full.
Concur (Travel and Expense Platform)	System at concur.arjuntech.in	All travel bookings, pre-approvals, and expense claims are processed through Concur. Paper-based claims are not accepted except in defined exceptional circumstances.
Anti-Bribery and Corruption Policy	LEGAL-POL-007-v1.2	Client entertainment and gifts provisions in this policy must be read alongside the Anti-Bribery provisions. Any expense that could constitute a bribe or improper inducement is prohibited regardless of amount.
POSH Policy	HR-POL-006	The Code of Conduct standards apply at all company-funded events and travel. POSH provisions are not suspended when employees are travelling on business.

2. Band Structure and Entitlement Framework

2.1 Band Classification and Travel Entitlement Tiers

Travel entitlements are structured in three tiers corresponding to the company's band levels. Tier assignments reflect both the business context of the role (frequency and nature of travel) and the principle of proportionality. Tier 1 covers senior leadership and Band 6+ employees; Tier 2 covers experienced professionals at Bands 4 and 5; Tier 3 covers Bands 1 through 3 including all new joiners, graduate trainees, and analysts.

Tier	Bands	Typical Roles	Air (Domestic)	Air (International >6hr)	Hotel — Tier 1 City
Tier 1	Band 6+	VP, Director, C-Suite	Business Class permitted	Business Class	Up to ₹12,000/night
Tier 2	Bands 4–5	Senior Manager, Manager, Lead	Economy; upgrade if >4hr	Business Class if >8hr	Up to ₹8,000/night
Tier 3	Bands 1–3	Analyst, Consultant, Senior Consultant	Economy only	Economy; upgrade if >10hr with CFO approval	Up to ₹5,500/night

Note: These are entitlement ceilings, not targets. Employees are expected to book within their entitlement and at the lowest practical cost within that entitlement. Booking at the entitlement ceiling when a lower cost meets the business need is not good practice.

2.2 Entitlement Philosophy — Business Need Over Seniority

The tier structure creates reasonable default entitlements, but business need governs in all cases. A Band 3 employee who is the lead presenter at a major client event the morning after a 6-hour overnight flight has a legitimate case for a hotel room upgrade that allows adequate sleep — this case should be raised with the manager before booking, not solved by exceeding the entitlement without approval. Conversely, a Band 6 employee travelling 45 minutes by road between two company offices has no entitlement to first-class rail simply because their band tier allows it.

Managers are expected to apply judgement when approving travel, not to rubber-stamp entitlement ceilings. The question is always: is this the right level of expenditure for the business purpose being served?

2.3 City Classification — Tier 1, Tier 2, and International

Accommodation rate limits, per diem rates, and certain transport allowances vary by city tier. The classification reflects general cost-of-living and business travel cost differentials between cities.

City Tier	Cities Included	Notes
Tier 1 — Metro	Mumbai, Delhi/NCR, Bengaluru, Chennai, Hyderabad, Pune, Kolkata	Company offices in Bengaluru, Mumbai, Delhi, Hyderabad, and Pune. All five are Tier 1.
Tier 2 — Secondary	Ahmedabad, Jaipur, Chandigarh, Kochi, Coimbatore, Nagpur, Bhubaneswar, Indore, Lucknow, Surat, and other major cities not listed in Tier 1	Rate limits approximately 25% below Tier 1. Full list maintained in Concur city database.
Tier 3 — Other India	All other Indian cities and towns not classified in Tier 1 or Tier 2	Rate limits approximately 40% below Tier 1. Where no rate is specified for a particular city, apply the nearest Tier 2 or Tier 3 rate and confirm with Finance Business Partner.
International — Standard	Southeast Asia, Middle East, Africa	International rates in Section 8.5. Rates in USD unless otherwise noted.

International — High Cost	UK, Europe, Australia, Japan, Singapore, Hong Kong, USA, Canada	Higher rate limits apply. See Section 8.5.

3. Travel Authorisation

3.1 Pre-Travel Authorisation Requirements

All business travel requires pre-authorisation before any booking is made. This is not a formality — it is the mechanism by which the company ensures that travel is genuinely necessary, appropriately planned, and within budget. Retrospective authorisation (seeking approval after the trip has occurred) is not permitted except in documented emergencies per Section 3.3.

The pre-authorisation requirement applies regardless of how the travel is being paid for — whether by corporate card, personal card with reimbursement, or company-paid booking. The payment method does not affect the authorisation obligation.

What Requires Pre-Authorisation	What Does Not Require Separate Authorisation
All domestic air travel	Local transport within a city during an approved trip (taxi, auto, metro) up to daily per diem limits
All overnight stays away from the base city	Meals during an approved trip within per diem limits
All international travel	Incidental expenses under ₹500 per item during an approved trip
Car rental for more than one day	Transport to/from airport for an approved trip (pre-authorised by the trip authorisation)
Conference registrations over ₹5,000	
Any trip where total estimated cost exceeds ₹25,000	

3.1.1 How to Submit a Travel Authorisation Request

All travel authorisation requests are submitted through Concur at concur.arjuntech.in → Travel Request → New Request. The request must include: purpose of travel (client name or internal project reference); proposed travel dates and destination(s); estimated total cost (flights, accommodation, ground transport, meals); and any exceptions to standard entitlements with justification. Requests without a complete business purpose or missing cost estimates will be returned for completion. Finance Business Partners can assist with cost estimates for unfamiliar destinations.

3.2 Authorisation Matrix — Who Approves What

Travel Type / Cost	Tier 3 (Bands 1–3)	Tier 2 (Bands 4–5)	Tier 1 (Band 6+)	Notes
Domestic travel — any cost	Direct manager	Direct manager	BU Head or CEO	
Domestic travel >₹50,000 total	Manager + Finance BP	Manager + Finance BP	CFO	
International travel — all	Manager + VP-HR + CFO	Manager + CFO	CEO + CFO	
International travel >₹2,00,000 total	Manager + VP-HR + CFO + CEO	CFO + CEO	Board Chair (for CEO travel)	
Business class upgrade — domestic	Not permitted	Manager + Finance BP	Permitted by entitlement	
Policy exception (any type)	Manager + Finance BP + CFO	CFO	CFO + CEO	Section 13, Segment 3
Conference attendance (external)	Manager	Manager + Finance BP	CEO	Segment 2, Sec 8

Note: The direct manager cannot approve their own travel. A manager's travel is approved by their manager. C-Suite travel is approved by the CEO (for other C-Suite) or Board Chair (for CEO). The CFO's travel is approved by the CEO.

3.3 Emergency and Short-Notice Travel

Genuine business emergencies occasionally require travel to be arranged before formal pre-authorisation can be obtained — a client site crisis requiring an immediate on-site response, for example. In such cases, the following process applies:

Step 1: The employee contacts their manager by phone or messaging immediately to obtain verbal authorisation. This verbal authorisation must be documented — a WhatsApp message or email confirming 'I authorise this travel' from the manager is sufficient.

Step 2: The travel is booked through Concur in the standard manner. A note is added to the Concur booking: 'Emergency travel — verbal authorisation from [manager name] at [time].'

Step 3: A formal travel request is submitted in Concur within 24 hours of the emergency booking, with the verbal authorisation attached as documentation.

Step 4: The formal authorisation is processed within 48 hours of submission. The Finance Business Partner prioritises emergency authorisations.

Important: Verbal authorisation does not remove the obligation to obtain formal authorisation. An employee who books travel verbally authorised but never formalises the Concur request has not complied with this policy.

3.4 Declined Authorisation and Appeal Process

A manager may decline a travel request. The grounds for declining must be communicated to the employee in writing (email or Concur comments). Grounds may include: the business purpose does not justify the cost; the trip can be accomplished by video conference; the timing is operationally inconvenient; or the estimated cost exceeds available budget.

An employee who believes their travel request was unreasonably declined may escalate to the manager's manager within 3 working days of the decline. The escalation should be made by email with the original request attached. The escalating manager's decision is final at the business unit level. Where the dispute involves a policy interpretation question (not a business judgement), the Finance Business Partner is the arbiter.

4. Air Travel

4.1 Class of Travel by Band and Route

The class of air travel entitlement is the most frequently misunderstood provision of most travel policies. The following table provides complete, unambiguous entitlements by tier and route type. Where a route qualifies for a higher class on duration grounds, the duration is measured as scheduled block time — wheels-up to wheels-down — not total journey time including connections.

Route Type	Tier 3 (Bands 1–3)	Tier 2 (Bands 4–5)	Tier 1 (Band 6+)
Domestic — under 2 hours	Economy only	Economy only	Economy; Business if available and cost differential <₹3,000
Domestic — 2 to 4 hours	Economy only	Economy; Business with manager + Finance BP approval	Business Class permitted
Domestic — over 4 hours	Economy only	Business Class permitted	Business Class permitted
International — under 6 hours	Economy only	Economy only	Economy; Business with CFO approval
International — 6 to 8 hours	Economy only	Economy; Business with CFO approval	Business Class permitted
International — over 8 hours	Economy; Business with CFO + CEO approval only in exceptional circumstances	Business Class permitted	Business Class permitted
International — over 10 hours (red-eye or back-to-back critical meetings)	Economy Premium where available; Business with CFO + CEO approval	Business Class permitted	Business Class; First Class not permitted on any route for any band

Important: First Class travel is not permitted for any employee on any route under any circumstances. Upgrades to First Class using personal loyalty points where the company has paid for Business Class are permitted as personal upgrades — the company pays only Business Class cost.

4.2 Booking Requirements and the Travel Management Platform

All air travel must be booked through Concur (concur.arjuntech.in) using the integrated travel management platform. Concur automatically enforces policy compliance — it will flag out-of-policy bookings and require justification and additional approval. Bookings made outside Concur (directly with airlines or via third-party booking sites) are not reimbursable except in documented emergency circumstances where the Concur platform was unavailable.

The preferred booking channels within Concur are: the negotiated corporate fares with our travel management partner (always shown first in results); airline direct bookings through the Concur-integrated airline connections; and the approved hotel programme. Concur automatically applies the company's negotiated rates and corporate discounts.

Booking Requirement	Standard
Booking lead time — standard	Minimum 7 days before travel date. Bookings within 7 days require justification in Concur. Last-minute premium costs are flagged for Finance review.
Booking lead time — recommended	14 days or more for domestic; 21 days or more for international. Advanced booking captures the best available fares and is a policy expectation.
Preferred carriers — domestic	IndiGo, Air India, Vistara (Air India Express for short sectors). Specific route preferences maintained in Concur. Selection from preferred carriers required

	unless fare differential >20% or schedule is materially worse.
Preferred carriers — international	Air India, Emirates, Singapore Airlines, British Airways on applicable routes. Full preferred carrier list in Concur. Same 20% differential rule applies.
Booking class within cabin	Lowest available fare within the entitled cabin class. Booking a higher fare class within the same cabin (e.g., full-flex economy vs. saver economy) requires justification — typically flexibility for itinerary changes.
Stopovers and indirect routing	Direct routing is required unless the price differential for a stopover option exceeds ₹5,000 domestically or USD 200 internationally, or the schedule benefit is material. Adding a personal stopover to a business trip requires Finance BP approval and the company pays only direct route equivalent cost.

4.3 Advance Booking Standards and Cost Optimisation

The single most effective cost control for air travel is advance booking. The company's negotiated fares are most advantageous at 14–21 days before travel. Beyond 21 days in advance, fares are often similar. Within 7 days of travel, costs typically increase by 40–80% above the 14-day benchmark.

Managers approving travel requests should consider the booking timeline as part of their approval. A travel request submitted 3 days before the trip for a meeting that has been scheduled for 2 weeks creates unnecessary cost and should be accompanied by an explanation. Repeated late-booking patterns for a team are reported to the BU Head in the monthly Finance travel report.

4.4 Flight Selection Criteria

Where multiple options exist within the entitled cabin class, the selection criteria are applied in the following order of priority:

Priority	Criterion	Application
1	Schedule fit with business purpose	Arrive at a time that allows the business activity to occur without impairment. Arriving at 02:00 for a 09:00 meeting the next day is not good schedule fit — a later departure the previous day may be justified.
2	Total journey cost	The lowest total cost for an acceptable schedule, within the entitled cabin class.
3	Preferred carrier	Preferred carrier where cost and schedule are comparable. Non-preferred carrier permitted where fare differential exceeds 20% or schedule is materially better.
4	Flexibility for itinerary changes	Fully flexible fares are justifiable when the trip purpose carries high change risk (client-dependent scheduling, ongoing negotiations). Otherwise, standard restricted fares are appropriate.

4.5 Upgrades, Loyalty Programmes, and Ancillary Fees

Loyalty programme membership: Employees may join airline loyalty programmes using their personal details. Mileage and points earned on company-paid travel accrue to the employee personally. The company does not require employees to use personal points for business travel, and does not compensate employees for points used for business upgrades.

Upgrades at check-in: Where a complimentary upgrade is offered by the airline (e.g., due to overbooking), the employee may accept it. The company pays only the booked fare. Paid upgrades at check-in are the employee's personal expense unless pre-approved as part of the original travel authorisation.

Ancillary Fee	Reimbursable?	Conditions
Checked baggage — first bag	Yes	First checked bag is reimbursable on all trips. If the trip includes equipment or materials required for the business purpose (presentation displays, samples), additional bags are reimbursable with manager confirmation.
Checked baggage — second and subsequent bags	Personal expense	Unless the second bag is specifically required by the business purpose and pre-approved.
Seat selection fee	Reimbursable up to ₹500	Standard seat selection fee reimbursable. Exit row or extra legroom premium is personal expense unless route exceeds 4 hours (domestic) or 6 hours (international), where one upgrade is reimbursable.
Airport lounge access	Tier 1 only	Band 6+ employees may claim lounge access on routes over 2 hours. Priority Pass or equivalent — one visit per departure. Bands 1–5: personal expense.
In-flight meals	Yes — economy class	Standard in-flight meal on economy class sectors is reimbursable. Business class meals are included in the fare. Premium add-on meals above the standard offering are personal expense.
In-flight Wi-Fi	Yes — if required	Reimbursable where required for business continuity on flights over 3 hours. Not reimbursable on short sectors or where the employee has no work that requires connectivity.
Travel insurance (personal)	No	The company provides group business travel insurance for all employees travelling on authorised business travel. Personal travel insurance is the employee's expense. See Section 8.6 for international travel insurance details.

4.6 Cancelled and Changed Travel

When travel is cancelled or changed due to business reasons (client cancellation, project change, company decision), the employee should make every effort to obtain a refund or credit before the ticket expires. Where a refund is not available, the credit must be recorded in Concur for future use within 12 months.

When travel is changed or cancelled due to the employee's personal circumstances (personal emergency, illness), standard refund/rebooking rules apply. The company covers the change fee on a restricted ticket only where the personal circumstance is documented and beyond the employee's reasonable control.

When an airline cancels or materially changes a flight, the employee is entitled to rebooking in the same cabin class. If rebooking is not available in the same timeframe, an upgrade to the next available class is reimbursable. The employee should obtain written confirmation from the airline of the cancellation before claiming a class upgrade.

5. Ground Transportation

5.1 Ground Transport Hierarchy

Ground transport choices should follow a cost and practicality hierarchy. Employees should use the most cost-effective option that is practical for the specific journey. The hierarchy below applies — a higher-tier option requires justification when a lower-tier option is practical.

Tier	Mode	When to Use	Reimbursement
1	Public transport (metro, bus, local train)	Where practical for the destination and luggage carried. Always the first consideration within cities with reliable metro or bus networks.	Actual cost — receipts required above ₹200
2	App-based taxi (Uber, Ola, Rapido)	When public transport is impractical (destination not metro-served, after 22:00, with heavy luggage, to/from airport).	Actual cost — Concur-linked app preferred. Screenshot or app receipt required.
3	Auto-rickshaw	Short distances within city where app-based taxi is not practical.	Actual cost — receipt not always available; claimed under daily incidentals
4	Company vehicle (where available)	Where a company vehicle is available at the location and is the most efficient option.	No cost — company vehicle. Fuel claims per Section 5.3.
5	Car rental	Where multiple destinations within a city/region make a rental more cost-effective than multiple taxis, or where transport infrastructure is inadequate.	Per Section 5.3. Requires pre-authorisation.
6	Personal vehicle	Where personal vehicle use is the most practical option and no company vehicle is available.	Per-kilometre rate per Section 5.4.

5.2 Taxi and App-Based Transport

The company has negotiated corporate accounts with Uber and Ola. Employees should link their company Concur profile to their Uber for Business or Ola Corporate account for automatic receipt capture and policy compliance checking. Rides taken through the corporate account are billed directly to the company and do not require out-of-pocket payment.

Provision	Standard
Ride type	Standard category (UberGo, Ola Mini, or equivalent). Premier or luxury categories require justification — typically late night travel, client accompaniment, or carrying valuable equipment.
Shared rides	Permitted and encouraged for airport transfers where co-travellers are making the same journey. Not required where schedules differ materially.
Daily transport cap	₹1,500 per day for local transport during a business trip (excluding airport transfers which are separately reimbursed). Claims above ₹1,500/day require itemised justification.
Late night travel (after 22:00)	Standard app-based taxi reimbursable. Surge pricing is reimbursable when no practical alternative exists. Where surge pricing >2x, employee should consider waiting briefly or using an alternative app.
Receipt requirement	App receipt (email or screenshot) required for all taxi claims above ₹200. Concur-linked corporate account generates automatic receipts. Cash taxi receipts accepted but paper receipts must be photographed and uploaded within 24 hours.

5.3 Company Vehicles and Car Rental

Company vehicles are available at all five office locations for business use. Booking is managed through the office Facilities team. Priority is given to client visits, then cross-office travel, then personal business use. Company vehicle use is recorded in the facilities vehicle log.

Car rental is permitted where: the destination requires transport to multiple sites not efficiently served by taxis; the rental duration is 2 or more days and rental is more cost-effective than multiple taxi journeys; or the destination has inadequate public or app-based transport.

Car Rental Provision	Standard
Vehicle category	Economy or compact car. Mid-size with justification (4+ passengers, mountain terrain, large equipment). Full-size, SUV, and premium categories not reimbursable except for Band 6+ with pre-approval.
Preferred rental providers	Zoomcar, Myles, OlaCabs Rentals, Avis, or Hertz where available. Always book through Concur for negotiated rates.
Insurance	The rental company's standard collision damage waiver (CDW) and third-party liability insurance is reimbursable. Personal accident insurance is not reimbursable (company group travel insurance covers this). No additional insurance products beyond CDW and TPI.
Fuel	Fuel for rental vehicles is reimbursable. Receipts required. Return the vehicle with the fuel level specified in the rental agreement — prepaid fuel options are reimbursable only if they represent a genuine saving.
Traffic violations and fines	Not reimbursable under any circumstances. The employee is personally liable for all traffic violations incurred during rental use.

5.4 Personal Vehicle Use

Where an employee uses their personal vehicle for business travel, the company reimburses at a per-kilometre rate. This rate is reviewed annually and is intended to cover fuel, depreciation, and reasonable wear. It is not a profit centre.

Vehicle Type	Reimbursement Rate (per km)	Maximum Claimable — Single Journey	Notes
Car (up to 1500cc)	₹8.00 per km	₹1,500 per day	Rate covers fuel and wear. Tolls separately reimbursable with receipts.
Car (over 1500cc)	₹10.00 per km	₹2,000 per day	As above.
Two-wheeler	₹4.50 per km	₹800 per day	Two-wheeler claims for distances over 50 km require manager justification.

Odometer readings (start and end) must be recorded and submitted with personal vehicle claims. Google Maps distance for the claimed route is used as the standard for verification — claims materially exceeding the mapped distance require explanation. Parking and tolls are separately reimbursable with receipts.

5.5 Airport Transfers and Parking

Item	Reimbursable?	Standard
Airport transfer — taxi/app (to/from home)	Yes	Standard category app-based taxi or prepaid taxi. Luxury category requires Band 5+ or pre-approval.

Airport transfer — personal vehicle	Yes	Per-km rate per Section 5.4 for distance to airport.
Airport parking — short-term (under 8 hours)	Yes	Where driving to the airport is more cost-effective than an app taxi return trip.
Airport parking — long-term (over 8 hours)	Yes with comparison	Reimbursable where total parking cost is less than or equal to two taxi journeys to/from the airport for the duration of the trip.
Drop-off and pick-up by family member	No	Where a family member drops off or picks up the employee, no transport reimbursement is payable for that leg.

6. Accommodation

6.1 Accommodation Booking Policy

All accommodation for business travel must be booked through Concur to access the company's negotiated rates. The preferred hotel programme includes pre-approved properties in all major Indian cities and key international destinations. Booking outside the preferred programme is permitted but requires justification if the selected property exceeds the applicable rate limit — and the Finance Business Partner may query a non-preferred booking that is not clearly justified.

Accommodation should be appropriate to the business purpose and location. A hotel that is a 45-minute drive from the meeting location creates transport costs and time inefficiency. Being well-located relative to the work is a legitimate factor in accommodation choice, and a higher-priced central hotel may be the better value choice than a cheaper property requiring repeated taxi journeys.

6.2 Accommodation Rate Limits by City Tier

Rate limits are per room per night, inclusive of taxes and service charges but exclusive of meals unless specifically noted. Rate limits represent the maximum reimbursable amount — properties should be selected at or below the limit. Booking above the limit requires CFO approval (Finance BP for amounts within 20% of the limit).

City Tier / City	Tier 3 (Bands 1–3)	Tier 2 (Bands 4–5)	Tier 1 (Band 6+)	Peak / Event Premium
Bengaluru (home city)	Not typically required	Not typically required	Not typically required	Home city stays: pre-approval from manager required
Mumbai	₹5,500	₹8,000	₹12,000	+20% approved by Finance BP
Delhi / Gurugram / Noida	₹5,000	₹7,500	₹11,000	+20% approved by Finance BP
Hyderabad	₹4,500	₹7,000	₹10,000	+15% approved by Finance BP
Pune	₹4,500	₹7,000	₹10,000	+15% approved by Finance BP
Chennai	₹4,500	₹7,000	₹10,000	+15% approved by Finance BP
Tier 2 cities (major)	₹3,500	₹5,000	₹7,500	+10% approved by Finance BP
Tier 3 cities / Other	₹2,500	₹3,500	₹5,500	+10% approved by Finance BP

Note: Where the employee's home city is not Bengaluru and they travel to their home city for business, accommodation in their home city requires manager and Finance BP pre-approval. Generally, employees are expected to stay at home when working in their home city.

6.3 Extended Stays and Serviced Apartments

Where a business trip requires a stay of 7 or more consecutive nights in the same city, the Finance Business Partner should be consulted before booking. Serviced apartments or long-stay hotel rates are typically available at a significant discount to standard nightly rates and should be secured for stays of this duration.

Duration	Accommodation Approach	Approval

7–14 nights	Request long-stay or weekly rate from the hotel. Alternatively, book a serviced apartment through the Concur extended stay programme.	Manager + Finance BP
15–30 nights	Serviced apartment strongly preferred. Finance BP to provide a benchmark rate for the city before booking.	Manager + Finance BP + CFO
Over 30 nights	Serviced apartment or company-arranged accommodation. Finance and HR to assess whether a temporary relocation allowance is more appropriate than daily accommodation.	CFO + VP-HR

6.4 Incidentals, Room Service, and In-Hotel Expenses

Item	Reimbursable?	Limit / Conditions
Minibar	No	Minibar charges are personal expenses regardless of what is consumed.
Room service meals	Yes — within meal limits	Room service meals are reimbursable within the applicable daily meal limit (Section 7). Room service at unusual hours (e.g., late night delivery charge) should be noted in the claim.
Laundry (stay of 3+ nights)	Yes	One laundry claim reimbursable per 3 consecutive nights of travel. Up to ₹500 per claim.
In-room gym access	No	Personal expense. Hotel gym access that is included in the room rate is not separately charged.
Business centre / printing	Yes	Where required for business purpose. Up to ₹300 per stay.
Telephone — domestic calls	Yes — up to ₹200	Where mobile connectivity is unavailable. Calls to personal numbers are not reimbursable.
Safe rental	No	Personal expense.
Early check-in / late check-out	Yes with justification	Reimbursable where required by the business schedule — a very early morning meeting or late-night departure. Not reimbursable for personal convenience.

6.5 Guest and Spousal Travel

The company does not reimburse travel, accommodation, or expenses for an employee's spouse, partner, family members, or personal guests under any circumstances, regardless of the employee's band or seniority. This applies even where the guest accompanies the employee on a legitimate business trip. The employee's own expenses are reimbursable per standard policy — the accompanying person's expenses are not.

Where a guest's presence at a company event is explicitly required (a formal company dinner where spouses are invited as part of the event design, for example), the event budget — not the employee's travel expense claim — covers the guest's cost. Such events require CFO approval at the event planning stage.

7. Meals and Per Diem

7.1 Per Diem Structure and Rates

The per diem system provides a fixed daily allowance for meals and minor incidentals (auto/rickshaw fares under ₹200, tips, mineral water, and similar small items) during business travel. The per diem is paid without requiring individual meal receipts — it is a daily flat allowance designed to simplify the administrative burden of small expense claims.

Per diem rates are set by city tier and travel employee tier. The per diem is the default mechanism for meal reimbursement during domestic travel. The actual expense claim route (Section 7.2) is available but requires itemised receipts for every meal claimed.

City Tier	Tier 3 / Bands 1–3 — Full Day	Tier 2 / Bands 4–5 — Full Day	Tier 1 / Band 6+ — Full Day	Half Day (under 8 hours travel)	Notes
Tier 1 — Metro cities	₹800	₹1,100	₹1,500	50% of full day rate	
Tier 2 — Secondary cities	₹650	₹900	₹1,200	50% of full day rate	
Tier 3 — Other India	₹500	₹700	₹1,000	50% of full day rate	
International — see Section 8.5	USD rates in Section 8.5	USD rates in Section 8.5	USD rates in Section 8.5	Pro-rated by hours as per Section 8.5	

7.1.1 Per Diem Day Calculation Rules

Scenario	Per Diem Calculation
Full day of travel in destination city	Full day per diem for the destination city tier.
Day of departure from home city	Half-day per diem for the destination city tier where departure is before 13:00; no per diem where departure is 13:00 or later (home meals covered).
Day of return to home city	Half-day per diem for the destination city tier where return is after 18:00; no per diem where return is before 18:00.
Multi-city trip in one day (departure from City A to City B)	Per diem at the higher city tier rate for that day.
Company-provided meals (conference, client event, team dinner charged separately)	Per diem reduced by ₹250 (Tier 3) / ₹350 (Tier 2) / ₹500 (Tier 1) per meal provided. Employee declares provided meals in Concur.

7.2 Actual Expense Claims for Meals

Where an employee prefers to claim actual meal expenses rather than taking the per diem, they may do so. Actual claims require itemised receipts for every meal. The following limits apply to actual meal claims:

Meal	Tier 3 / Bands 1–3 Limit	Tier 2 / Bands 4–5 Limit	Tier 1 / Band 6+ Limit	Notes
Breakfast	₹200	₹300	₹450	Where not included in hotel rate
Lunch	₹300	₹450	₹650	Individual meal. See Section 7.3 for group meals.

Dinner	₹450	₹700	₹1,000	Individual dinner during travel
Daily actual total	₹950	₹1,450	₹2,100	Should be compared to per diem — claims significantly below per diem should use per diem for simplicity.

7.3 Meals Included in Other Costs

Where meals are included in another expense (hotel breakfast included in the room rate, in-flight meal provided, conference lunch included in registration), the employee must declare this in Concur. Claiming per diem or a meal expense for a meal that was provided by another source at the company's expense is a policy violation.

Where a hotel room rate includes breakfast but the employee does not take breakfast at the hotel, the meal deduction still applies — the choice not to take an included meal does not restore the per diem entitlement for that meal.

7.4 Alcohol — Policy and Limits

Alcohol is a significant and sensitive category within the expense policy. The company's position is nuanced rather than prohibitive: alcohol consumed at a legitimate client entertainment event or a company-sponsored team dinner is a reasonable business expense within limits; alcohol consumed at a personal dinner during a business trip is not a business expense.

Context	Policy	Limit	Approval
Client entertainment — alcohol	Reimbursable as part of client entertainment per Segment 2, Section 9	Within total entertainment limit. Separate alcohol itemisation required on claims >₹1,000.	Per client entertainment matrix
Company team dinner — alcohol	Reimbursable where the dinner is a formal company event or manager-led team event	Up to ₹500 per person. Total alcohol cost capped at 30% of total dinner bill.	Manager on claim
Personal meal during travel — alcohol	Not reimbursable	Personal expense regardless of amount	N/A
In-room consumption from minibar	Not reimbursable	Personal expense	N/A
Religious and personal objections	Employees are never required to purchase or consume alcohol. Non-alcoholic alternatives at client events are always the employee's right.	—	—

8. International Travel

8.1 International Travel Authorisation

International travel requires a higher level of authorisation than domestic travel due to the greater cost, longer advance planning requirements, and additional duty of care obligations. All international travel must be authorised before any booking — including any visa or document processing — is initiated.

The international travel authorisation request in Concur must include: the business purpose with specific objectives; the countries and cities to be visited; complete itinerary with dates; full cost estimate including flights, accommodation, per diem, visa, and ancillary costs; and the name of the senior leader sponsoring the trip. A trip without a named senior sponsor is not authorised.

Authorisation Level	Required For	Additional Requirements
Manager + CFO	All international travel for Tier 2 employees (Bands 4–5)	Business case document in Concur. Video conference alternative considered.
Manager + VP-HR + CFO	All international travel for Tier 3 employees (Bands 1–3)	Stronger business case required. Senior mentor assigned for first-time international travellers.
CEO + CFO	All international travel for Band 6+ and all travel >₹2,00,000 estimated total cost	Trip brief presented to CEO before booking is initiated.
CFO + CEO + Board notification	Travel to countries under a government travel advisory (any level)	Legal and Security team assessment required. Company travel insurance confirms coverage. Emergency contact plan documented.

8.2 Visa, Travel Documents, and Insurance

The company processes business visas for all authorised international travel. The HR and Administration team manages visa applications through the company's appointed visa agent. The employee is responsible for providing accurate personal information and complete documentation within the timelines the visa agent specifies. Delays caused by incomplete documentation submitted by the employee are the employee's responsibility.

Item	Process	Reimbursable?
Business visa — standard processing	HR Administration raises visa request on Concur travel authorisation approval. Visa agent processes. Employee provides documents within 48 hours of request.	Yes — full visa fee. Processed by Finance centrally.
Visa — express/urgent processing fee	Where standard processing is insufficient due to booking timeline.	Yes, where the urgency is due to business requirements. Where the urgency is caused by late authorisation request by the employee, the express fee is shared 50/50.
Passport renewal (where required for travel)	Employee's personal responsibility. Company does not process passport renewals.	Not reimbursable — personal document.
Company business travel insurance	Automatic coverage for all employees on authorised international travel. Policy details in HRMS Benefits.	Included in company group policy — no employee claim required.

Travel vaccinations (required for destination)	Where vaccinations are required or recommended by the government for the destination country.	Yes — reimbursable on actual expense with medical receipt.
International driving permit	Where the employee will drive in the destination country.	Yes — reimbursable on actual expense.

8.3 International Air Travel Class

International air travel class entitlements by band and flight duration are set in Section 4.1. The following additional provisions apply specifically to international travel:

Rest day provision: Where a flight arrives after 22:00 local time and the employee has an important business engagement before 10:00 the following morning, one additional accommodation night may be claimed for recovery purposes. This provision is available for all bands. A recovery day at the destination is not the same as a rest day — the recovery night must immediately precede a scheduled business engagement.

Red-eye flights: Red-eye flights (departing between 23:00 and 05:00) are reimbursable under standard class entitlements. The disruption of a red-eye flight is not in itself a justification for a higher class of travel — schedule fit and cost are the determining factors. However, where a red-eye is the only direct flight option and the employee has a critical engagement on arrival, an upgrade (for those entitled to it) or the recovery day provision is the appropriate accommodation.

8.4 Foreign Currency and Exchange

Provision	Standard
Preferred method	Use the corporate card for all international expenses wherever card acceptance is available. The corporate card rate is typically better than retail foreign exchange rates. See Segment 3 for corporate card foreign transaction provisions.
Cash foreign currency	Where cash is required (countries with limited card acceptance, local transport, tips), the Finance team provides a cash advance in the relevant currency before departure. Advance request must be submitted in Concur 5 working days before departure.
Personal card used abroad	Where a corporate card is not available and personal card is used, claims are reimbursed at the RBI reference rate for the transaction date. Foreign exchange fees are reimbursable up to 3.5% of the transaction value.
Cash exchange at airport / hotels	Strongly discouraged — rates are typically 4–8% below interbank rates. Where unavoidable, the actual rate applied is reimbursed with exchange receipt. The employee absorbs any exchange cost above the interbank rate that results from using airport or hotel exchange.
Unused foreign currency	Must be returned to Finance within 5 working days of return. Where the advance was in a currency that Finance cannot accept back (some exotic currencies), the employee converts to INR at the best available rate and reimburses the INR equivalent.

8.5 International Per Diem and Accommodation Rates

International per diem and accommodation rates are in USD. Claims are reimbursed in INR at the RBI reference rate for the date of expenditure. Rates are reviewed annually. The following rates are effective 01 April 2024.

Region / Country	Accommodation — Tier 3	Accommodation — Tier 2	Accommodation — Tier 1	Per Diem — Tier 3	Per Diem — Tier 2	Per Diem — Tier 1	Notes
Southeast Asia (Thailand,	USD 80	USD 120	USD 180	USD 50	USD 70	USD 100	

Vietnam, Indonesia, Malaysia, Philippines)							
Singapore / Hong Kong	USD 150	USD 220	USD 320	USD 70	USD 100	USD 150	High cost
Middle East (UAE, Saudi, Qatar, Bahrain)	USD 100	USD 150	USD 220	USD 60	USD 85	USD 120	
Africa (Sub-Saharan)	USD 90	USD 130	USD 200	USD 55	USD 80	USD 110	
UK / Ireland	USD 170	USD 240	USD 360	USD 80	USD 110	USD 160	High cost
Europe (Western)	USD 160	USD 230	USD 340	USD 75	USD 105	USD 150	High cost
USA / Canada	USD 160	USD 230	USD 340	USD 80	USD 110	USD 160	High cost
Australia / New Zealand	USD 150	USD 210	USD 310	USD 75	USD 100	USD 145	High cost
Japan / South Korea	USD 140	USD 200	USD 300	USD 70	USD 95	USD 140	High cost

8.6 Health, Safety, and Duty of Care

Arjun Technologies has a duty of care to all employees travelling on company business. This duty requires the company to provide adequate travel insurance, make available health and safety information for destinations, maintain an employee travel register so employees can be located in an emergency, and have a defined protocol for responding to an employee emergency abroad.

Duty of Care Element	Company Obligation	Employee Obligation
Travel insurance	Group business travel insurance covering: medical expenses up to USD 250,000; medical evacuation; personal accident; baggage loss; trip cancellation. Policy details in HRMS Benefits.	Read the policy before travel. Carry the emergency assistance number. Report any incident within 24 hours.
Travel risk assessment	Finance and HR review destination risk level before authorising travel. Countries with FCO or MEA advisories require additional assessment per Section 8.1.	Read the destination risk briefing. Follow any specific precautions noted in the approval.
Travel register	Concur maintains a live register of all employees on active international travel. HR Operations monitors the register. HRBP Operations has 24/7 access in emergencies.	Keep Concur itinerary updated. Notify HRBP of any material change to international travel plans.
Emergency response	24/7 emergency number provided to all international travellers: +91-80-4500-9999 (HR Operations). Insurance provider emergency line on insurance card in HRMS Benefits.	Contact the emergency line immediately in any serious situation. Do not manage a major emergency independently.

Health precautions	Travel vaccinations reimbursed per Section 8.2. Destination health briefing provided by HR for high-risk regions.	Follow recommended health precautions. Carry any required documentation for vaccinations or medications.
Lone traveller safety	For travel to high-risk regions, the employee must check in with HRBP Operations at least once per 24 hours. A single missed check-in triggers a welfare call; two missed check-ins trigger the emergency protocol.	Check in as required. Share accommodation details with a designated contact before arrival.

Segment 1 Summary and Continuation to Segment 2

This completes Segment 1 of the Arjun Technologies Pvt. Ltd. Travel and Expenses Policy, Version 1.0.

Section 1 established the purpose, five policy principles (business necessity, value for money, accuracy and honesty, timely compliance, and proportionality), scope, governance, and cross-reference to related policies and systems. Section 2 defined the three-tier band entitlement framework, the entitlement philosophy of business need over seniority, and the Tier 1/Tier 2/Tier 3/International city classification. Section 3 delivered the complete travel authorisation framework: what requires pre-authorisation, the full authorisation matrix by travel type and employee tier, the emergency travel process, and the declined authorisation appeal pathway. Section 4 covered air travel comprehensively: class entitlements by band and route duration, booking requirements and the Concur platform, advance booking standards, flight selection criteria, the complete ancillaries reimbursement table (baggage, lounge, Wi-Fi, seat selection, insurance, in-flight services), and cancelled/changed travel provisions. Section 5 addressed ground transportation through the full hierarchy from public transport to personal vehicle, including the taxi corporate account provisions, daily transport cap, car rental standards, per-kilometre rates for personal vehicles, and airport transfer and parking rules. Section 6 provided accommodation policy: booking requirements, the full rate limit table by city and band tier, extended stay provisions for 7-30 nights, in-hotel incidentals reimbursement, and the guest/spousal travel prohibition. Section 7 established the meals and per diem framework: per diem rates by city tier and band tier, day calculation rules for departure/return days, the actual expense claim alternative with meal limits, provided meal deductions, and the nuanced alcohol policy. Section 8 covered international travel in full: enhanced authorisation requirements, visa processing and insurance provisions, foreign currency management, the complete international per diem and accommodation rate table across nine regions, and the comprehensive duty of care framework.

SEGMENT 3 — Continuation Document

9. Entertainment, Client Hosting, and Gifts

9.1 Business Entertainment — Purpose and Principles

Business entertainment — meals, events, hospitality, and gifts provided to clients, prospects, partners, and other external stakeholders — is a legitimate and important part of building and maintaining the business relationships on which the company's revenue depends. It is also one of the most sensitive expense categories from a compliance perspective. Entertainment that is genuinely relationship-building is a business cost; entertainment that is designed to influence a business decision improperly is a bribe, regardless of the amount.

The company's position is that appropriate, transparent, and proportionate entertainment is encouraged where it serves a genuine business purpose. The controls in this section are designed not to prevent entertainment but to ensure it is properly authorised, accurately recorded, and never structured in a way that could constitute an improper inducement. Every entertainment expense must be able to withstand scrutiny — from a Finance reviewer, an auditor, or a regulator — and must be documented to demonstrate that it does.

Principle	What It Requires
Genuine business purpose	Every entertainment expense must have a specific, documented business purpose — a client relationship being maintained, a prospect being cultivated, a partnership milestone being acknowledged. 'General relationship building' is an acceptable purpose only for meals under ₹3,000 per head. Higher-value entertainment requires a more specific purpose.
Accurate documentation	The expense claim must record: who attended (names and company/role for all external attendees), the business purpose, the date, and the venue. Claims that list only 'team entertainment' or 'client dinner' without names are not adequately documented and will be returned.
Prior authorisation for significant spend	Entertainment above the per-person limits in Section 9.2 or total event costs above ₹25,000 require prior written authorisation. Retrospective approval is not available for entertainment expenses.
No cash entertainment	Cash payments for entertainment are not reimbursable. All entertainment must be paid by corporate card or personal card with a receipt. A claim for a client dinner paid in cash cannot be verified and will not be reimbursed.
ABAC compliance	The Anti-Bribery and Anti-Corruption Policy (LEGAL-POL-007) applies to all entertainment. Entertainment that creates an obligation on the recipient — real or perceived — is prohibited. Government officials require a lower threshold than commercial clients. See Section 9.7.

9.2 Client Meals and Dining Entertainment

Client meals are the most common form of business entertainment. The following limits apply to meals where clients, prospects, or external partners are present. These are per-person limits inclusive of food, non-alcoholic beverages, service charges, and taxes. Alcohol is additional within the limits in Segment 1, Section 7.4.

Meal Type	Tier 3 (pp)	Tier 2 (pp)	Tier 1 (pp)	Approval	Documentation
Working breakfast with client	₹600	₹800	₹1,200	Manager on claim	Names + purpose
Business lunch — India	₹1,200	₹1,800	₹2,500	Manager on claim	Names + purpose
Business dinner — India	₹1,800	₹2,800	₹4,000	Manager on claim	Names + purpose
Business lunch — international	USD 40	USD 60	USD 90	Manager on claim	Names + purpose
Business dinner — international	USD 70	USD 100	USD 150	Manager + Finance BP	Names + purpose + itinerary

Large client dinner (10+ attendees)	₹1,500 pp	₹2,500 pp	₹3,500 pp	Manager + Finance BP pre-approval	Guest list + purpose

Employee meals at client entertainment: Where an employee hosts a client meal, their own meal cost is included within the per-person limit. The employee does not claim a separate per diem for a meal at which they are entertaining a client.

Splitting bills: Splitting a bill to bring individual items below approval thresholds is a policy violation. The total cost of an entertainment event determines the applicable limit and approval requirement.

9.3 Client Events, Tickets, and Hospitality

Client events include sporting events, concerts, cultural events, award ceremonies, and company-hosted hospitality events. These represent a higher level of entertainment spend and require a higher level of prior authorisation.

Event Type	Per Person Limit	Total Event Cap	Prior Authorisation	Documentation
Sporting event — general admission	₹3,000	₹30,000	Manager + Finance BP	Guest list, event details, purpose
Sporting event — premium / box	₹8,000	₹80,000	Manager + Finance BP + CFO	Detailed guest list, client business value
Concert / cultural event	₹3,500	₹35,000	Manager + Finance BP	Guest list, purpose
Company-hosted client event (dinner, awards)	₹5,000	Per budget approval	CFO + BU Head pre-approval of event budget	Event brief, guest list, budget vs actuals
International client hospitality	USD 200	USD 2,000	CFO + CEO	Full trip brief, client profile, business case

Note: Company box or premium hospitality packages for recurring events (IPL season tickets, annual events) require CFO and CEO approval at the budget stage each year. Individual event use is then approved by the BU Head within the pre-approved package.

9.4 Gifts to Clients and Third Parties

Gifts to clients, prospects, partners, government officials, and other external stakeholders are subject to strict limits. The gift register in Concur must be updated for all gifts given, regardless of value. Gifts must never be given in cash or cash equivalents (gift vouchers, prepaid cards). Gifts that cannot be openly declared are not appropriate — if the employee would be uncomfortable disclosing a gift in the register, it should not be given.

Recipient Type	Per Gift Limit	Annual Limit (same recipient)	Prohibited Gifts
Commercial client / prospect	₹5,000	₹10,000	Cash, gift vouchers, alcohol (unless known to be acceptable), personal items
Government official or employee	₹500	₹500	Anything beyond a nominal promotional item. Any gift to a government official must be pre-approved by Legal regardless of value.
Business partner / supplier	₹3,000	₹6,000	Cash, gift vouchers, alcohol
Other external stakeholders	₹2,000	₹4,000	Cash, gift vouchers

Seasonal and festival gifts: During Diwali and other major festivals, the company may approve a centralised client gifting programme managed by Marketing and Finance. Individual employees should not give festival gifts outside this programme to the same clients unless the individual gift is within the per-gift limit and is recorded in the gift register.

Gifts received: Employees who receive gifts from external parties must declare them in the gift register in HRMS if they exceed ₹1,000 in value. Gifts exceeding ₹5,000 must be returned or surrendered to the company. The company may choose to donate surrendered gifts to charity.

9.5 Internal Entertainment — Team Events and Recognition

Event Type	Budget	Approval	Notes
Team lunch / dinner (routine)	₹500 pp, up to 10 people	Manager on claim	Maximum once per month per team. No alcohol above ₹150 pp.
Team building event	₹1,500 pp	Manager + Finance BP	Quarterly maximum. Budget includes venue, activity, and meals.
Employee recognition / milestone celebration	₹800 pp, up to 15 people	Manager	Work anniversaries, promotions, project completion. Cake and non-alcoholic beverages standard.
Year-end / festive team party	₹2,500 pp	BU Head + Finance BP	Annual. Centralised company event supersedes individual team parties where one is organised.
Office farewell for departing employee	₹400 pp, up to 20 people	Manager	Light refreshments. Not a formal dinner event.

9.6 Entertainment Authorisation Matrix

Spend Level	Domestic Client Entertainment	International Client Entertainment	Internal Events
Under ₹5,000 / USD 60 total	Manager approval on claim	Manager approval on claim	Manager approval on claim
₹5,000–₹25,000 / USD 60–300	Manager + Finance BP (pre or on claim)	Manager + Finance BP pre-approval	Manager + Finance BP
₹25,000–₹1,00,000 / USD 300–1,200	Manager + Finance BP pre-approval	Manager + CFO pre-approval	BU Head + Finance BP
Over ₹1,00,000 / USD 1,200	CFO pre-approval	CFO + CEO pre-approval	CFO

9.7 Anti-Bribery Compliance — Red Lines

The following are absolute prohibitions under the Anti-Bribery and Anti-Corruption Policy (LEGAL-POL-007). They apply regardless of local custom, client expectation, competitive pressure, or the employee's seniority. Violation of any of these provisions is a serious disciplinary matter and may constitute a criminal offence under the Prevention of Corruption Act 1988 and the Foreign Corrupt Practices Act (for US-connected transactions).

Prohibited Activity	Why It Is Prohibited

Any cash payment to a government official	Cash payments to government officials constitute bribery regardless of the stated purpose. This includes facilitation payments — small payments to expedite routine government actions.
Entertainment or gifts given on the understanding that a business award, contract, or decision will follow	Entertainment that creates a quid pro quo is bribery, not hospitality. The test is whether a reasonable person would conclude that the entertainment was connected to a specific expected business outcome.
Entertainment or gifts to family members of clients or officials	Routing benefits through family members does not change the nature of the payment. Third-party payments to circumvent limits are treated as direct payments.
Gift vouchers, prepaid cards, or cash equivalents to any external party	These are functionally equivalent to cash and are prohibited regardless of the amount or recipient.
Entertainment that exceeds the limits in this policy without approval	Exceeding limits creates an undocumented benefit that cannot be transparently justified — the foundation for a potential corruption allegation.

Important: If you are ever asked by a client, manager, or colleague to provide entertainment or gifts that you believe may constitute a bribe or improper inducement, you must decline and report the request to the Ethics Hotline at ethics@arjuntech.in. You will not be penalised for refusing to participate in potentially corrupt activity.

10. Technology and Communication Expenses

10.1 Mobile Phone and Data Plans

The company provides a mobile phone and data plan to employees in specific bands and roles where mobile connectivity is a genuine business requirement. For employees not provided with a company phone, a mobile data reimbursement allowance applies for business use. Personal phone bills are not reimbursable beyond the defined allowances.

Provision	Band / Role	Company Standard	Reimbursement Basis
Company mobile phone	Band 5+ in client-facing or on-call roles (confirmed by hiring manager at joining)	Mid-range Android or iPhone — model per IT approved list. Replaced on 3-year cycle.	Fully company-provided. No employee claim required.
Company SIM and data plan	Employees with company phone	Standard voice + 10GB data plan. International roaming included on authorised travel.	Company-billed. Excess data charges over 20GB: employee pays 50%.
Personal phone — data reimbursement	Bands 1–4 without company phone who use personal phone for business	₹300/month (Bands 1–2); ₹500/month (Bands 3–4). Fixed monthly allowance — no itemised billing required.	Added to monthly payroll. No Concur claim needed.
International roaming — personal phone	All employees on authorised international travel	Actual cost of an international roaming pack for the destination, for the duration of the trip.	Concur claim with receipt. Capped at ₹3,000 per 7-day trip or ₹500/day.

10.2 Home Internet for Remote and Hybrid Workers

Employees designated as remote-first or working under a formal remote working arrangement approved by VP-HR are eligible for a home internet reimbursement allowance. Standard hybrid workers (office-based with flexibility to work from home) are not eligible for home internet reimbursement — their primary workplace is the office.

Employee Category	Monthly Allowance	Conditions
Fully remote employees (approved remote-first arrangement)	₹800/month	Fixed monthly allowance added to payroll. No receipts required. Confirmed by VP-HR approval of remote working arrangement.
Hybrid employees in formally approved high-WFH arrangements (4+ days/week WFH)	₹500/month	Fixed monthly allowance. Arrangement must be formally approved and documented in HRMS.
Standard hybrid employees	Not eligible	The company provides full office facilities. Home internet is a personal expense for employees whose primary workplace is the office.
Temporary work-from-home during office closure or force majeure	₹500/month for duration	Activated by CFO and VP-HR jointly when applicable. Not a standing entitlement.

10.3 Software Subscriptions and Licences

All software used for business purposes must be procured through the IT team to ensure licence compliance, security review, and cost management. Employees may not purchase personal software subscriptions and claim reimbursement unless specifically approved as an exception.

Software Category	Process	Reimbursable?
Standard business software (Office 365, collaboration tools, code editors)	Provided by IT. Request through IT Service Desk → Software Request.	Company-provided. No reimbursement.
Role-specific professional tools (design software, data platforms, specialised IDEs)	Request through IT. Finance BP approves budget. IT procures and manages licence.	Company-provided through IT procurement. No personal purchase.
AI productivity tools (ChatGPT, Copilot, Gemini — paid subscriptions)	IT maintains approved AI tool licences. Personal subscriptions for company use require IT approval before purchase.	IT-procured licences only. Personal subscriptions not reimbursable without prior IT and Finance BP approval.
Professional development software (learning platforms — Coursera, Udemy, etc.)	Approved under learning budget per Section 11.2. Claimed through Learning & Development budget, not general expenses.	Yes — through L&D budget with manager approval. See Section 11.2.
Personal productivity software used for work	Not eligible for reimbursement. Employees who believe a specific tool is a genuine business necessity should raise a formal IT request.	Not reimbursable.

10.4 Hardware and Peripherals

Company-standard hardware is provided to all employees per the band equipment standards in Appendix E of Segment 1. Additional hardware purchases for business use must be approved by IT and Finance before purchase. Personal hardware purchases claimed as business expenses are not reimbursable.

Item	Process	Reimbursable?
Replacement for lost, damaged, or stolen company equipment	Report to IT immediately. IT assesses and procures replacement. Police report required for theft.	Company replaces. If damage was due to employee negligence, employee may bear a portion of replacement cost per IT Asset Policy.
Additional monitor, keyboard, mouse for home office	Request through IT. One set per approved remote/hybrid arrangement.	Provided by company through IT for approved remote workers. Not reimbursable for standard hybrid workers.
Ergonomic accessories (chair, desk) for home office	Up to ₹8,000 one-time allowance for approved remote-first employees. Request through HR and Finance.	One-time ₹8,000 reimbursable for fully remote employees. Not available for hybrid workers.
Noise-cancelling headset	Provided for Band 5+ per standard equipment. Bands 1–4: request through IT with manager approval if role requires frequent calls.	IT-provided for qualifying roles. Not a personal purchase reimbursement.
External storage, cables, docking stations	IT provides company-standard accessories. Personal purchases for company use: IT approval + Finance BP + manager for items over ₹1,000.	Up to ₹1,000 with pre-approval. Receipts required.

10.5 Communication During Travel

Expense	Reimbursable?	Limit and Conditions

International roaming — company phone	Yes — company billed	Company SIM includes international roaming on authorised travel. Excess data charges over the plan limit: 50% employee/50% company.
International roaming — personal phone	Yes — with limit	Up to ₹3,000 per 7-day trip (₹500/day). Receipt required. Roaming pack preferred over per-MB charges.
Local SIM purchase in destination country	Yes	Where roaming is not available or is substantially more expensive. Actual cost reimbursable — receipt required. Return unused credit to Finance.
In-flight Wi-Fi	Yes — if required	Per Segment 1, Section 4.5. Required for business continuity on flights over 3 hours.
Hotel Wi-Fi	Yes	Where not included in room rate. Charged to room and reimbursed as part of accommodation claim.
Business centre / printing	Yes — up to ₹300	Where required for business purpose during travel.
Personal calls on company phone	Limited	Up to ₹200/month of personal use included in company plan. Excess personal usage deducted from payroll.

11. Conference, Training, and Professional Development Expenses

11.1 External Conference Attendance

External conferences — industry events, professional association conferences, technology summits, and similar gatherings — provide valuable professional development and networking opportunities. Conference attendance must be linked to a genuine development or business objective and should be prioritised based on relevance to current role and company strategic priorities.

Conference Cost Element	Policy	Approval Required
Registration fee — up to ₹15,000	Reimbursable where the conference is relevant to the employee's role and a clear learning or business development objective is documented.	Manager approval in Concur
Registration fee — ₹15,001 to ₹50,000	Reimbursable with stronger business case — specific sessions or speakers to be attended, outcomes expected.	Manager + Finance BP pre-approval
Registration fee — over ₹50,000	High-value conferences (major international events) require a formal attendance brief: conference details, business case, expected outcomes, and proposed post-conference knowledge sharing.	Manager + CFO pre-approval
International conference — full cost	Travel, accommodation, and per diem per standard policy provisions apply. Registration fee per above tiers. Total cost estimate required at authorisation stage.	CFO + CEO for total costs over ₹2,00,000
Conference social / networking events	Included in conference registration as part of the event programme: reimbursable. Additional social events outside the conference programme: client entertainment rules apply.	Per entertainment matrix in Section 9.6

Post-conference knowledge sharing: Employees attending conferences at company expense are expected to share key learnings with their team. For conferences costing over ₹25,000, a brief written summary or presentation to the team is required within 2 weeks of return. The summary is uploaded to the team's Confluence page.

11.2 Training Course and Certification Expenses

Training and certification expenses are managed through two parallel tracks: the Learning & Development (L&D) budget managed by HR, and manager-discretionary training budget within each business unit. The employee's IDP (Individual Development Plan) is the primary document from which training decisions flow.

Training Type	Budget Track	Limit	Process	Notes
Company-mandated training (compliance, certifications required for role)	Company central budget	No personal limit — company cost	IT or HR arranges directly. Employee does not pay and claim.	
IDP-aligned technical certification (AWS, PMP, CFA, etc.)	L&D budget	₹25,000 per certification	Manager approves IDP entry. HR allocates L&D budget. Concur claim or direct payment.	Pass required for full reimbursement. Partial reimbursement on fail at manager discretion.

External training course (1–5 days)	Manager BU budget	₹20,000 per course	Manager pre-approval. Concur claim.	
Online learning platform subscription (Coursera, Udemy, LinkedIn Learning)	L&D budget	₹5,000/year	Manager + HR approval. HR may provide platform access directly.	Annual cap per employee.
Higher education (MBA, MSc, executive programme)	Education assistance programme	Per HR-EAP-001 — separate policy	VP-HR and CFO approval. Service commitment applies.	Separate policy HR-EAP-001

Study leave: Study leave for approved professional certifications is governed by HR-LAP-001 (Leave and Attendance Policy). This policy covers financial reimbursement only — leave provisions are separate.

Reimbursement on resignation: Where the company has funded a certification, training programme, or higher education for which a service commitment applies, and the employee resigns before the commitment period ends, a pro-rated recovery applies per the terms of the individual training agreement. This is recorded in HRMS at the time of funding.

11.3 Professional Membership and Subscription Fees

Membership / Subscription Type	Reimbursable?	Limit	Approval	Notes
Professional body membership directly relevant to current role (ICAI, Bar Council, ISACA, PMI, etc.)	Yes	Actual annual fee	Manager on claim	One primary membership per employee
Industry association membership (NASSCOM, CII, FICCI)	Yes — Band 5+	Up to ₹10,000/year	Manager + Finance BP	Must be role-relevant
Technical journal / publication subscription	Yes	Up to ₹3,000/year	Manager on claim	Role-relevant publications
News aggregators / business press (Bloomberg, FT, Economic Times premium)	Yes — Band 4+	Up to ₹5,000/year	Manager on claim	Where required for role context
Personal gym / wellness membership	No	Personal expense	—	Not a business expense
Alumni membership (IIT, IIM, etc.)	No	Personal expense	—	Not a business expense

11.4 Books, Publications, and Learning Resources

Resource	Reimbursable?	Annual Limit	Conditions
Technical books directly relevant to current role	Yes	₹3,000	Physical or digital. Receipt required. Books remain company property and are registered in the team library.
Business and management books	Yes	₹2,000	Manager confirmation that book is role-relevant.
Fiction, biography, personal interest	No	—	Personal expense regardless of any indirect professional value.
Academic research papers / database access	Yes	₹4,000	Where not covered by company institutional access. IT to check before individual purchase.

12. The Expense Claim Process — End to End

12.1 Expense Claim Submission Requirements

All expense claims must be submitted through Concur. A valid expense claim contains: the correct expense category selected from the Concur category list; a receipt that meets the documentation standards in Section 12.2; a business purpose description that is specific enough for a Finance reviewer to assess (not 'lunch' but 'lunch with [client name] to discuss [project/topic]'); and attendee information for any entertainment or group expense.

Expense categories in Concur map directly to the policy provisions in this document and Segment 1. Selecting the wrong category — for example, categorising a personal meal as 'client entertainment' — is a policy violation whether or not the error is intentional. If an employee is unsure which category to use, the Finance Business Partner can advise before submission.

Claim Element	Requirement
Expense category	Selected from the Concur approved category list. Do not use 'Other' unless no listed category applies — if using 'Other', describe the expense fully.
Business purpose	Specific description: who, what, and why. For travel: destination and purpose. For entertainment: attendee names and business topic. For training: course name and relevance to role.
Receipt	Required for all claims above ₹200 (individual items). See Section 12.2 for receipt standards.
Attendees (entertainment and group meals)	Full names and company/role for all external attendees. For internal meals: names of all attendees. 'Team of 8' is not adequate documentation.
Authorisation	Claimed within the applicable entitlement. Pre-authorisation attached where required. Out-of-policy amounts flagged with justification.
Currency	Claims in foreign currency: enter the amount in the original currency. Concur applies the standard exchange rate. Do not manually convert and enter in INR.

12.2 Receipt Requirements and Documentation Standards

Receipts are the primary evidence that an expense was incurred. The receipt standard is designed to be practical rather than bureaucratic — it ensures that a Finance reviewer can confirm the amount, date, vendor, and nature of the expense without needing to contact the employee.

Receipt Standard	Required	Notes
Amount clearly shown	Mandatory	Total amount including taxes. For restaurant bills: itemised receipt preferred, showing food and alcohol separately where alcohol is claimed.
Date of transaction	Mandatory	Must match the date on the claim. Claims submitted for wrong dates are returned.
Vendor name and location	Mandatory	Sufficient to verify the vendor is a legitimate business.
Tax breakdown (GST where applicable)	Required for claims above ₹1,000	GST-compliant receipts required for company to claim input tax credit. Where vendor is GST-registered, request a proper tax invoice.
Receipt format	Digital preferred	PDF or clear photograph uploaded to Concur. Paper receipts: photograph and upload within 24

		hours of incurring the expense. Blurred, cropped, or incomplete photographs are returned.
Missing receipts	Exception only	Missing receipt declaration in Concur for items under ₹500 — employee declares the amount and circumstance. Two or more missing receipt declarations per quarter triggers a Finance review.
Credit card statement as receipt	Not acceptable alone	A credit card statement shows the amount but not the nature of the expense. It may supplement but not replace a vendor receipt.

12.3 Claim Submission Deadlines

Timely submission of expense claims is a policy obligation, not a courtesy. Late claims create accounting period problems, complicate month-end reconciliation, and may result in claims being rejected or deferred.

Claim Type	Submission Deadline	Consequence of Late Submission
Expenses incurred during a trip	Within 7 calendar days of return from the trip	Claims submitted 8–30 days late: Finance BP notification to employee and manager. Claims submitted over 30 days late: require CFO approval and may be rejected for the current accounting period.
Per diem claims	Within 7 calendar days of return	Per diems not claimed within 30 days of the trip are forfeited. This is a hard deadline — not extendable.
Corporate card transactions	Within 14 calendar days of transaction date	Unreconciled corporate card transactions after 30 days are flagged. Card may be suspended for repeated non-reconciliation. See Segment 3.
Entertainment expenses	Within 7 calendar days of the event	Entertainment claims over 30 days old are presumed to lack contemporaneous documentation and require manager and Finance BP special approval.
Monthly recurring allowances (mobile, internet)	Processed via payroll — no Concur submission required	Payroll-processed allowances cannot be backdated beyond 3 months. HRBP to confirm with Finance if setup is missed.

12.4 The Approval Workflow

The expense claim workflow in Concur is: Employee submits → Manager approves → Finance BP reviews → Finance processes payment. Each stage has a defined timeline.

Stage	Actor	Timeline	Action	Escalation
1 — Submission	Employee	Per Section 12.3 deadlines	Submit complete claim in Concur with receipts and documentation.	—
2 — Manager review	Direct manager	Within 3 working days of submission	Review for policy compliance, business purpose, and accuracy. Approve, return with comments, or escalate.	Reminder after 3 days. Finance BP notified after 5 days.

			Manager cannot approve their own expenses.	
3 — Finance BP review	Finance Business Partner	Within 3 working days of manager approval	Compliance check against policy. Receipt adequacy. Flag anomalies. Approve or return with specific query.	Finance Operations notified after 5 days.
4 — Payment processing	Finance Operations	Next payroll cycle after Finance BP approval	Payment processed to employee's registered bank account. Concur sends payment notification.	—

Note: Managers who routinely approve out-of-policy claims without adequate scrutiny are accountable for those approvals. 'The employee asked me to approve it' is not a defence. Approval is a substantive responsibility, not a formality.

12.5 Finance Review and Compliance Checking

The Finance BP review is a substantive compliance check, not a rubber stamp. Finance Business Partners are empowered and required to query, return, or reject claims that do not meet policy standards. The following are the most common reasons a claim is returned:

Return Reason	Employee Action Required
Receipt missing or inadequate	Upload a clear, complete receipt. If receipt is genuinely lost, complete a missing receipt declaration in Concur explaining the circumstances.
Business purpose insufficient	Edit the claim description to include specific attendee names (for entertainment), project or client reference, and the specific business purpose.
Amount exceeds policy limit without approval	Either reduce the claim to the policy limit (where the excess was personal), or obtain and attach retrospective manager/Finance BP/CFO approval with explanation.
Wrong expense category	Reclassify to the correct category. If unsure, call the Finance BP to discuss before resubmitting.
Duplicate claim detected	Confirm whether the claim is genuinely a different expense from the duplicate flagged. If it is a true duplicate, withdraw the second claim.
Pre-authorisation not attached	Attach the Concur pre-approval reference or the written authorisation email to the claim. Pre-authorisation cannot be obtained after the fact for entertainment.
Claim submitted after deadline	Obtain late submission approval from Finance BP and CFO per Section 12.3.

12.6 Reimbursement Timeline and Payment

The company's commitment is to reimburse all properly submitted and approved expense claims within the next payroll cycle after Finance BP approval. For claims approved before the 20th of the month, payment is in the current month's payroll. For claims approved after the 20th, payment is in the following month's payroll.

Scenario	Expected Payment	Action if Not Received	Escalation
Claim approved before 20th of Month N	Month N payroll (typically last working day)	Check Concur payment status. If showing 'Approved' but no payment, contact Finance Operations.	Finance BP after 5 working days

Claim approved after 20th of Month N	Month N+1 payroll	As above.	Finance BP after 5 working days of Month N+1 payroll
Corporate card claim reconciled in Concur	No reimbursement — company-billed. Reconciliation closes the transaction.	N/A — corporate card transactions are direct company payments.	Finance BP if statement error
Advance — unexpended portion	Employee returns to Finance Operations within 5 days of return	Finance Operations follows up at 7 days. Unrecovered advances escalated at 14 days.	CFO if not returned within 30 days

12.7 Disputed Claims and Queries

Where a claim is returned or partially rejected and the employee believes the Finance decision is incorrect, the following process applies:

Step 1 — Clarification: The employee contacts the Finance BP who returned the claim to understand the specific reason and whether resubmission with additional documentation would resolve the issue. Most return situations are resolved at this stage.

Step 2 — Resubmission: Where additional documentation is available, the employee resubmits the claim in Concur with the supporting information attached and a note explaining what has been added.

Step 3 — Escalation: Where the employee and Finance BP cannot agree on whether the expense is reimbursable, the employee may escalate in writing to the CFO within 10 working days of the return decision. The CFO's decision is final.

Step 4 — Policy interpretation: Where the dispute is about how the policy should be interpreted (not whether an expense is legitimate), the Finance BP seeks guidance from the CFO. The CFO's interpretation is documented and applied consistently.

Important: Escalating a claim dispute does not suspend the resubmission deadline. The employee should resubmit any undisputed portion of a returned claim immediately.

13. Concur Platform — Complete User Guide

13.1 Account Setup and Profile

Every employee receives a Concur account as part of the standard IT provisioning process on joining. The account is accessible at concur.arjuntech.in and through the SAP Concur mobile app. New joiners should complete their profile setup in the first week — an incomplete profile causes delays in travel booking and reimbursement.

Profile Element	Where to Set	Why It Matters
Bank account for reimbursement	Profile → Payment Methods	Reimbursements cannot be processed without a registered bank account. Must match the account in HRMS.
Corporate card linkage	Profile → Credit Cards → Add Card	Links your corporate card to Concur for automatic transaction import. See Section 13.6.
Travel preferences (seat, meal)	Profile → Travel Settings	Pre-populates booking preferences. Saves time on each booking. Must remain within policy — premium preferences selected here do not override entitlements.
Loyalty programme numbers	Profile → Travel Settings → Frequent Traveller	Ensures loyalty points are credited on bookings. Company does not require or endorse specific programmes — personal choice.
Emergency contact	Profile → Emergency Contact	Used by HR Operations for the international travel duty of care register.
Manager (approval chain)	Set by HR/IT on system setup	Drives the approval workflow. If your approval chain is incorrect (wrong manager), contact HR to update — do not submit claims knowing the approver is wrong.

13.2 Travel Booking in Concur

Step	Action	Notes
1	Create a Travel Request	Travel → Requests → New Request. Enter destination, dates, purpose, and cost estimate. Submit for approval before booking.
2	Receive approval notification	Concur emails approval confirmation when all required approvers have approved. Do not book before this notification.
3	Book through the Travel module	Travel → Book → Flights / Hotels / Car. Approved request pre-populates travel details. Select from search results within your policy entitlement. Out-of-policy options are flagged red — these require justification.
4	Review and confirm booking	Review total cost, cancellation terms, and itinerary. Confirm booking. Concur sends confirmation email and adds trip to your itinerary.
5	Manage changes	Travel → Trips → [Trip Name] → Modify or Cancel. Changes to approved bookings that increase cost require the original approver to re-approve.

13.3 Expense Report Creation and Submission

Step	Action	Notes

1	Create Expense Report	Expense → Create New Report. Link to the approved Travel Request for the trip. Enter report name (e.g., 'Mumbai Client Visit — March 2024').
2	Add expenses	Add Expense → select category → enter date, amount, currency. For per diem: Add Expense → Daily Allowance → select dates and destination. Concur calculates per diem automatically.
3	Attach receipts	Attach receipt to each expense line item. Use the Concur mobile app to photograph receipts immediately — the app uses OCR to pre-fill amount and date.
4	Add attendee details	For entertainment expenses: Attendees tab → Add Attendee → enter name, company, and role for each external attendee. Internal attendees: add from HRMS directory.
5	Review and submit	Review the policy compliance check Concur runs before submission. Red flags are policy violations that must be resolved. Yellow flags are warnings — resolve or provide justification. Submit.
6	Track approval status	Expense → Reports → [Report Name] → Approval Flow. See current approver, history, and any comments. Respond to Finance BP queries promptly.

13.4 Receipt Upload and Management

The most efficient receipt management workflow is: photograph receipt on phone using the Concur mobile app immediately after the transaction → receipt auto-uploads to Available Receipts in Concur → assign to expense line item when creating the report. Receipts photographed promptly are clear and complete; receipts submitted days later from crumpled paper are frequently inadequate.

Receipt Source	Upload Method	Common Issues
Physical paper receipt	Concur mobile app → photograph → auto-upload. Or scan and upload as PDF via web.	Blurred photos, cropped amounts, faded thermal receipts. Use the app's receipt photo guidance (hold steady, ensure full receipt is in frame).
Email receipt (flight, hotel confirmation)	Forward to receipts@concur.com from your company email — auto-processes. Or download PDF and upload via web.	Ensure the email contains itemised cost breakdown, not just booking confirmation.
App-based transport (Uber, Ola)	Uber for Business / Ola Corporate automatically syncs to Concur when corporate account is linked. Personal app: screenshot or email receipt upload.	Using personal app instead of corporate account creates manual upload overhead. Always use the corporate account.
Credit card statement	Export the relevant line item as PDF and upload.	Statement alone is insufficient — always pair with vendor receipt.

13.5 Mobile App Usage

The SAP Concur mobile app (iOS and Android) is available at the App Store and Google Play. The company recommends all employees who travel install and use the app — it significantly reduces the administrative burden of expense management by enabling real-time receipt capture, itinerary management, and approval on mobile.

Feature	How to Use
ExpenseIt — receipt scanning	Open app → ExpenseIt → Photograph receipt. OCR extracts amount, date, and vendor. Review pre-filled data and correct if needed. Receipt saved to Available Receipts for report attachment.

Travel itinerary	Open app → Trips → view current and upcoming trips. See real-time flight status, hotel details, and car rental information.
Approve claims (managers)	Open app → Approvals → review pending claims. View receipts, add comments, approve or return. Managers can approve from anywhere without accessing the desktop site.
Per diem request	Open app → Expenses → Add → Daily Allowance → select trip dates and cities. Per diem calculated automatically. Submit within the expense report.
Mileage capture	Open app → Expenses → Add → Mileage → Enter start and end addresses. Google Maps calculates the route distance. Rate applied automatically per policy.

13.6 Corporate Card Reconciliation in Concur

Corporate card transactions are automatically imported into Concur within 48 hours of the transaction. The employee is responsible for reconciling all imported transactions within 14 days by assigning each transaction to an expense report with the correct category, business purpose, and receipt. Unreconciled transactions are highlighted in the Concur dashboard and reported to Finance BP monthly.

Reconciliation Step	Action
1	Open Concur → Available Expenses. All unreconciled corporate card transactions appear here with date, merchant, and amount.
2	For each transaction: click → assign to an existing expense report or create a new one → select the correct category → add business purpose → attach receipt.
3	For transactions that are not business expenses (personal charges on company card — see Segment 3, Section 15.3): flag as 'Personal' and arrange repayment to Finance immediately.
4	Submit the expense report for approval. Card reconciliation is complete when the report is approved by the Finance BP.

13.7 Common Concur Issues and Resolutions

Issue	Cause	Resolution
'Out of policy' flag on hotel booking	Selected property exceeds the rate limit for your band/city tier.	Select a different property within the rate limit. If no suitable property is available below the limit, add a justification note and proceed — the booking will route to Finance BP for approval.
Corporate card not syncing transactions	Card not correctly linked to Concur profile, or bank processing delay.	Profile → Credit Cards → verify card is listed and active. If card is listed but not syncing, contact Finance Operations. Allow 48 hours for new transactions to appear.
Approval stuck — no response from approver	Manager has not actioned the request within the SLA.	Send a reminder from within Concur (Approval Flow → Send Reminder). If no response after 5 working days, contact Finance BP to reassign approval.
Per diem amount appears incorrect	Incorrect city tier selected, or departure/return time not entered correctly.	Edit the daily allowance entry: verify city tier against Section 2.3 of Segment 1, and verify departure/return times. Contact

		Finance BP if the discrepancy persists.
Receipt not accepted — poor image quality	Photograph is blurred, cropped, or the thermal ink has faded.	Rephotograph with the app under good lighting. For faded thermal receipts: photocopy in colour before the ink fades completely. Complete a missing receipt declaration if the original is irretrievably unreadable.
Concur login not working	Password expired or account locked.	IT Service Desk → Reset Concur Password. SSO login via company credentials should be used as the primary login method — this reduces password expiry issues.

14. Common Expense Scenarios — Guidance for Employees

The following scenarios address the expense situations most frequently raised with Finance Business Partners. Each applies the policy provisions to a specific fact pattern.

#	Situation	Correct Policy Application
1	I took a client to dinner and the bill came to ₹6,200 for the two of us. My tier limit is ₹1,800 per person.	Your entitlement is ₹1,800 × 2 = ₹3,600. You may claim ₹3,600. The remaining ₹2,600 is your personal expense unless you obtained pre-approval for a higher amount before the dinner. Document the client's name, company, and purpose on the claim.
2	I upgraded to Business Class on a domestic 3-hour flight. I am Band 4 (Tier 2) and believed I was entitled to upgrade for flights over 2 hours.	Band 4 (Tier 2) employees may book Business Class for domestic flights over 4 hours, not 2 hours. For a 3-hour sector, you needed manager and Finance BP approval for the upgrade. Without prior approval, you may claim only the equivalent economy fare for the same flight. Contact Finance BP — the delta cost is a personal expense.
3	I lost my receipt for a ₹1,400 taxi ride from the airport.	A taxi receipt for ₹1,400 is above the ₹500 missing receipt threshold. Complete a missing receipt declaration in Concur explaining the loss. Provide the Uber/Ola app trip history as supporting evidence where available — app records are acceptable as a receipt substitute for app-based transport. If it was a pre-paid taxi with no app record, the declaration with an explanation of the circumstance will be reviewed by the Finance BP.
4	I booked a hotel for ₹7,200/night in Hyderabad. The policy limit for my band (Tier 2) is ₹7,000. I was not aware of the limit.	The ₹200 excess is within 20% of the limit — Finance BP approval is required, not CFO. Submit the claim and contact your Finance BP to explain that you were unaware of the Hyderabad limit. The Finance BP will typically approve minor overages with an explanation, particularly on a first occurrence. For future trips, check city rates in Concur before booking.
5	My flight was cancelled by the airline and I was rebooked by the airline onto a Business Class flight because Economy was unavailable.	You may claim the Business Class ticket because the upgrade was airline-initiated due to their cancellation, not a personal choice. Obtain written confirmation from the airline (email or booking update) of the original cancellation and the rebook, and attach it to your claim. You claim the original booked fare — if the rebooked Business Class fare was higher, the airline should cover the difference; if they did not, attach the correspondence to the claim for Finance review.
6	I bought a ₹4,500 book on advanced machine learning. I am a data scientist and use it directly in my work.	Technical books relevant to your role are reimbursable up to ₹3,000 per year. You may claim ₹3,000 of the ₹4,500 cost, or claim the full ₹4,500 if you have not yet used any of your annual book allowance — wait, the annual limit is ₹3,000 total, not per book. You may claim ₹3,000 and absorb ₹1,500 personally. Record the book in the team library in Confluence — company-funded books are company assets.
7	I worked from home for 3 days last week while my team was in the office. Can I claim a home internet reimbursement?	Home internet reimbursement applies only to employees in formally approved remote-first or high-WFH arrangements (4+ days/week). Occasional or informal WFH does not qualify. If you believe your working arrangement warrants a formal WFH classification, discuss with your manager and HR to update your arrangement in HRMS. Until it is formally approved, home internet is a personal expense.
8	I bought a client a ₹4,800 Diwali gift hamper. The gift limit is ₹5,000 per gift.	The gift is within the per-gift limit of ₹5,000 for a commercial client. Record it in the Concur gift register with the client's name, company, and the occasion. Check whether the company's centralised Diwali gifting programme has already sent a gift to this client — if so, this personal gift is in addition to the programme gift and both must be declared, with the combined value compared against the annual per-recipient limit of ₹10,000.

Segment 2 Summary and Continuation to Segment 3

This completes Segment 2 of the Arjun Technologies Pvt. Ltd. Travel and Expenses Policy, Version 1.0.

Section 9 covered the complete entertainment, client hosting, and gifts framework: the five entertainment principles (business necessity, accurate documentation, prior authorisation, no cash entertainment, ABAC compliance), client meal per-person limits across all tiers and meal types, client events and hospitality with per-person and total event caps, gifts to clients and third parties with per-gift and annual limits, internal entertainment budgets by event type, the entertainment authorisation matrix, and the six anti-bribery red lines with a warning on reporting obligations.

Section 10 addressed technology and communication expenses: the mobile phone and data plan provisions by band (company phone for Band 5+, monthly data allowances for Bands 1–4), home internet reimbursement for formally approved remote workers, software subscription procurement process (IT-led, not personal purchase), hardware and peripherals policy, and the complete communication-during-travel reimbursement table.

Section 11 established the conference, training, and professional development expense framework: external conference attendance limits by registration fee tier, post-conference knowledge sharing obligations, training reimbursement across five categories (mandatory, IDP-aligned certifications, external courses, online learning, higher education), professional membership and subscription limits by band, and book and publication allowances.

Section 12 delivered the complete expense claim process end to end: claim submission requirements, the seven-element receipt documentation standard, per-category submission deadlines with consequences for late submission, the four-stage approval workflow with SLAs, the Finance BP compliance check and seven common return reasons, reimbursement timelines by scenario, and the three-step disputed claim process. Section 13 provided the full Concur platform user guide: profile setup, travel booking workflow, expense report creation, receipt upload best practices, mobile app features, corporate card reconciliation, and resolutions for seven common platform issues. Section 14 addressed eight common expense scenarios with specific policy application guidance.

Segment	Sections	Key Topics	Pages	Status
